

Ordinance No:  
Zoning Text Amendment No: 09-08  
Concerning: Commercial/Residential (CR) Zones - Establishment  
Draft No. & Date: ~~[[3-9/15/09]]~~ 6-1/15/09  
Introduced: September 22, 2009  
Public Hearing:  
Adopted:  
Effective:

**COUNTY COUNCIL FOR MONTGOMERY COUNTY, MARYLAND  
SITTING AS THE DISTRICT COUNCIL FOR THAT PORTION OF  
THE MARYLAND-WASHINGTON REGIONAL DISTRICT WITHIN  
MONTGOMERY COUNTY, MARYLAND**

---

By: District Council at Request of the Planning Board

---

**AN AMENDMENT** to the Montgomery County Zoning Ordinance to:

- Establish Commercial/Residential (CR) zones; and
- Establish the intent, allowed land uses, development methods, general requirements, development standards, density incentives, and approval procedures for development under the Commercial/Residential zones.

By adding the following Division to the Montgomery County Zoning Ordinance, Chapter 59 of the Montgomery County Code:  
DIVISION 59-C-15 "COMMERCIAL/RESIDENTIAL ZONES"  
Sections 59-C-15.1 through 59-C-15.9

**EXPLANATION:** ***Boldface** indicates a heading or a defined term.*

*Underlining indicates text that is added to existing laws by the original text amendment.*

*[Single boldface brackets] indicate text that is deleted from existing law by the original text amendment.*

*Double underlining indicates text that is added to the text amendment by amendment.*

*[[Double boldface brackets]] indicate text that is deleted from the text amendment by amendment. For ease of reading, these deletions have also been struckthrough. All additions and deletions have been highlighted.*

*\* \* \* indicates existing law unaffected by the text amendment.*

OPINION

*ORDINANCE*

*The County Council for Montgomery County, Maryland, sitting as the District Council for that portion of the Maryland-Washington Regional District in Montgomery County, Maryland, approves the following ordinance:*

1 **Sec. 1. Division 59-C-15 is added as follows:**

2 \* \* \*

3 **DIVISION 59-C-15. COMMERCIAL/RESIDENTIAL (CR) ZONES**

4  
5 **59-C-15.1. Zones Established.**

6 **59-C-15.11.** The Commercial/Residential (CR) zones are established as combinations of a sequence of  
7 [[four]] 4 factors: maximum total floor area ratio (FAR), maximum non-residential FAR, maximum  
8 residential FAR, and maximum building height. These zones are identified by a sequence of symbols: CR,  
9 C, R, and H, each followed by a number where:

- 10 a) the number following the symbol “CR-“ is the maximum total FAR;  
11 b) the number following the symbol “C” is the maximum non-residential FAR;  
12 c) the number following the symbol “R” is the maximum residential FAR; and  
13 d) the number following the symbol “H” is the maximum building height in feet.

14 The examples in this Division do not add, delete, or modify any provision of this Division. Examples are  
15 provided only to demonstrate particular applications of the provisions in the Division. Examples are not  
16 intended to limit the provisions.

17 **59-C-15.12.** Each unique sequence of CR, C, R, and H is established as a zone under the following limits:

18  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28  
29  
30  
31  
32  
33  
34

- a) the maximum total FAR must be established as an increment of 0.25 from 0.5 up to 8.0;
- b) the maximum non-residential and residential FAR must be established as an increment of 0.25 from 0.25 up to 7.5; and
- c) the maximum height must be established as an increment of 5 feet up to 100 feet and an increment of 10 feet from 100 feet up to 300 feet~~[[; and]].~~
- d) ~~P[[p]]~~ermitted density may be averaged over 2 or more directly abutting or confronting lots in ~~[[the same]]~~ one or more CR zones, provided that:
  - 1) the lots are subject to the same sketch plan;
  - 2) the lots are created by the same preliminary subdivision plan;
  - 3) the maximum total density and non-residential and residential density limits apply to the entire development ~~[[subject to the sketch plan and subdivision plan]],~~ not to individual lots;
  - 4) no building may exceed the maximum height set by the zone;
  - 5) public benefits must be provided in ~~[[proportion to any phased development on individual lots]]~~ accordance with the phasing element of an approved sketch plan; and
  - 6) the resulting development must conform to the design and land use objectives of the applicable master or sector plan and design guidelines.

35 **59-C-15.13.** The CR zones can only be applied by sectional map amendment ~~[[in conformance with the~~  
 36 ~~zoning recommendations of]], and when specifically recommended in~~ an approved and adopted master or  
 37 sector plan.

38 *Examples:*

- 39 • An area zoned CR-2.0, C1.0, R1.0, H80 allows a total FAR of 2.0, with maximum non-residential and residential FARs of 1.0,  
 40 thereby requiring an equal mix of uses to obtain the total FAR allowed. The height for any building in this zone is limited to  
 41 80 feet.
- 42 • An area zoned CR-6.0, C3.0, R5.0, H200 allows a residential FAR of up to ~~[[of]]~~ 5.0, ~~[[whereas]]~~ a non-residential ~~[[density is~~  
 43 ~~only allowed an]]~~ FAR of up to 3.0, and a mix of the two uses could yield a total FAR of 6.0. This combination allows for  
 44 flexibility in the market and shifts in the surrounding context. The height for any building in this zone is limited to 200 feet.
- 45 • An area zoned CR-4.0, C4.0, R4.0, H160 allows the ultimate flexibility in the mix of uses, ~~[[even]]~~ including buildings with no  
 46 mix, because the maximum allowed non-residential and residential FARs are both equivalent to the total maximum FAR  
 47 allowed. The height for any building in this zone is limited to 160 feet.

48  
 49 **59-C-15.2. Description and Objectives of the CR Zones.**

50 The CR zones permit a mix of residential and non-residential uses at varying densities and heights. The zones  
 51 promote economically, environmentally, and socially sustainable development patterns where people can live,  
 52 work, and have access to services and amenities while minimizing the need for automobile use. ~~The application of~~  
 53 the CR zones ~~[[are]]~~ is appropriate where ecological impacts can be moderated by co-locating housing, jobs, and  
 54 services. The objectives of the CR zones are to:

- 55 a) implement the policy recommendations of applicable master and sector plans;
- 56 b) target opportunities for redevelopment of single-use areas and surface parking lots with a mix of uses;

- 57 c) reduce dependence on the automobile by encouraging development that integrates a combination of housing
- 58 types, mobility options, commercial services, and public facilities and amenities;
- 59 d) encourage an appropriate balance of employment and housing opportunities and compatible relationships
- 60 with adjoining neighborhoods;
- 61 e) establish the maximum density and building height for each zone, while retaining appropriate development
- 62 flexibility within those limits; and
- 63 f) standardize optional method development by establishing minimum requirements for the provision of the
- 64 public benefits that will support and accommodate density above the standard method limit.

65 **59-C-15.3. Definitions Specific to the CR Zones.**

66 The following words and phrases, as used in this Division, have the meaning indicated. The definitions in Division

67 59-A-2 otherwise apply.

68 **Car share space:** a parking space that serves as the location of an in-service vehicle used by a vehicle-sharing

69 service.

70 **Cultural institutions:** public or private institutions or businesses including: art, music, and photographic studios;

71 auditoriums or convention halls; libraries and museums; recreational or entertainment establishments,

72 commercial; theater, indoor; theater, legitimate.

73 **Day care facilities and centers:** facilities and centers that provide daytime care for children and/or adults,

74 including: child daycare facility (family day care, group day care, child day care center); daycare facility for not

75 more than 4 senior adults and persons with disabilities; and day care facility for senior adults and persons with  
76 disabilities.

77 **Frontage:** a property line shared with an existing or master-planned public or private road, street, highway, or  
78 alley right-of-way or easement boundary.

79 **LEED:** the series of Leadership in Energy and Environmental Design (LEED) rating systems developed by the  
80 Green Building Council as amended.

81 ~~[[**Locally-owned small business:** a commercial business that:~~

82 ~~**a)** is majority owned by a resident of Montgomery County or any adjacent jurisdiction; and~~

83 ~~**b)** meets the size standards as determined by the Small Business Administration's Table of Small Business  
84 Size Standards (SBA Table) or is a franchised company with total holdings by the local owner that  
85 meets the size standards of the Table.]]~~

86 **Live/Work unit:** Buildings or spaces within buildings that are used jointly for ~~[[commercial]] non-residential~~ and  
87 residential purposes where the residential use of the space may be ~~[[is]]~~ secondary or accessory to the primary  
88 use as a place of work.

89 **Manufacturing and production, artisan:** The manufacture and production of commercial goods by a skilled  
90 manual worker or craftsman, such as jewelry, metalwork, cabinetry, stained glass, textiles, ceramics, or hand-  
91 made food products.

92 ~~[[**Priority retail street frontage:** Frontage along a right-of-way identified in a master or sector plan to be  
93 developed with street-oriented retail to encourage pedestrian activity.]]~~

94 **Public Arts Trust Steering Committee:** A committee of the Arts and Humanities Council that allocates funds  
 95 from the Public Arts Trust.

96 **Public owned or operated uses:** Activities that are located on land owned by or leased and developed or operated  
 97 by a local, county, state, or federal body or agency.

98 **Recreational facilities, participatory ~~[[, indoor]]:~~** Facilities used for ~~[[indoor]]~~ sports or recreation. ~~[[Spectators~~  
 99 would be incidental on a nonrecurring basis. Such uses typically include bowling alleys, billiard parlors, indoor  
 100 tennis and handball courts, and health clubs.

101 **Recreational facilities, participatory, outdoor:** Facilities used for outdoor sports or recreation. Spectators  
 102 would be incidental on a nonrecurring basis. Such uses typically include driving ranges, miniature golf courses,  
 103 swimming pools, and outdoor ice skating rinks]].

104 **Seasonal Outdoor Sales:** A lot or parcel where a use or product is offered annually for a limited period of time  
 105 during the same calendar period each year. The availability or demand for the use or product is related to the  
 106 calendar period, such as Christmas trees, pumpkin patches, or corn mazes.

107 **Transit proximity:** Transit proximity is the distance, determined at the time of a sketch plan application, a  
 108 proposed project is from an existing or planned public transit station or stop. There are three levels of transit  
 109 stations or stops: 1. Level 1 is a Metrorail Station; 2. Level 2 is a light rail or bus rapid transit station; and 3.  
 110 Level 3 is a bus stop that does not have both a dedicated and fixed path but has service intervals that are no  
 111 longer than 15 minutes during peak commute hours. ~~[[Level 1 proximity is based on the location of a project~~  
 112 with access to an existing or planned Metrorail Station. Level 2 proximity is based on the location of a project

113 ~~with access to an existing or planned MARC Station, light rail station, or a stop along a transportation corridor~~  
 114 ~~with fixed route bus service where service intervals are no longer than 15 minutes during peak commute hours.~~  
 115 ~~A project adjacent or confronting a transit station or stop shares a property line, easement line, or is only~~  
 116 ~~separated by a right-of-way from a transit station or stop. In addition to a project that is adjacent or confronting,~~  
 117 ~~a project is also considered to have access to a transit facility if all parcels and lots within the project's gross~~  
 118 ~~tract area have no more than 25 percent of their area farther than the applicable distance from the transit station~~  
 119 ~~or stop and if not more than 10 percent of the residential units in the project are farther than the applicable~~  
 120 ~~distance from the station or stop. A planned transit station or stop must be funded for construction within the~~  
 121 ~~first 4 years of the Consolidated Transportation Program or the Capital Improvement Program. If a project~~  
 122 ~~qualifies for more than one transit proximity level, the project may only take incentive density for one of the~~  
 123 ~~qualifying benefits.]]~~

124 **59-C-15.4. Methods of Development and Approval Procedures.**

125 Two methods of development are available under the CR zones.

126 **59-C-15.41. Standard Method.**

127 Standard method development must comply with the general requirements and development standards of the  
 128 CR zones. Unless otherwise provided for in this division, a[[A]] site plan approval under Division 59-D-3 is  
 129 required for a standard method development project only if:

- 130 a) the gross floor area exceeds 10,000 square feet; or
- 131 b) any building or group of buildings contains 10 or more dwelling units.]]; ~~or~~

c) ~~the proposed development generates 30 or more new peak-hour trips.~~

**59-C-15.42. Optional Method.**

Optional method development must comply with the general requirements and development standards of the CR zones and must provide public benefits under Section 59-C-15.8 to obtain ~~the full~~ greater density ~~ies~~ by ~~and~~ or height than allowed ~~by the zone~~ under the standard method. A sketch plan and site plan are required for any development using the optional method. A sketch plan must be filed under the provisions below; a site plan must be filed under Division 59-D-3. Any required preliminary subdivision plan must be submitted concurrently with a sketch plan ~~or the~~ site plan.

**(a) Contents of a sketch plan:**

- 1) ~~A justification statement for optional method development addressing the requirements and standards of this Division, how the development will further the objectives of the applicable master or sector plan, and how the development will be more efficient and effective than the standard method of development;~~
- 2) ~~total FAR, conceptual uses and maximum densities per use;~~
- 3) ~~building massing, height, public use and other open spaces, and the relationship of proposed buildings to adjacent buildings;~~
- 4) ~~general vehicular, pedestrian, and cyclist circulation and access;~~
- 5) ~~table of proposed public benefits and incentive density requested for each benefit; and~~
- 6) ~~general phasing of structures, uses, public benefits, and site plans.~~

- 151 ~~b) Procedure for a sketch plan:~~
- 152 ~~1) Before filing a sketch plan application, an applicant must comply with the provisions of Section~~
- 153 ~~4 of the Manual for Development Review Procedures for Montgomery County, as amended,~~
- 154 ~~that concern the following procedures:~~
- 155 ~~(a) notice;~~
- 156 ~~(b) holding a public meeting; and~~
- 157 ~~(c) posting the site of the submission.~~
- 158 ~~2) The submittal, review procedure, and fees for a sketch plan are the same as a pre-application~~
- 159 ~~submission under Section 50-33A(a), except that there is no requirement to submit a~~
- 160 ~~preliminary subdivision plan within 90 days.~~
- 161 ~~3) The Planning Board may require some elements of the sketch plan to be binding on any~~
- 162 ~~subsequent site plans.]]~~
- 163 ~~a) A sketch plan application must contain:~~
- 164 ~~1) A justification statement that addresses how the project meets the requirements and standards of~~
- 165 ~~this Division for optional method development and describes how the development will further~~
- 166 ~~the objectives of the applicable master or sector plan;~~
- 167 ~~2) An illustrative plan and/or model that shows the maximum densities for residential and non-~~
- 168 ~~residential uses, massing, and heights of buildings; locations of public use and other open~~
- 169 ~~spaces; and the relationships between existing and/or proposed buildings on adjoining tracts;~~

- 170 3) An illustrative diagram of proposed vehicular, pedestrian, and bicycle access, circulation,  
171 parking, and loading areas;
- 172 4) A table of proposed public benefits and the incentive density requested for each; and  
173 5) The general phasing of structures, uses, public benefits, and site plan applications.
- 174 b) Procedure for a sketch plan:
- 175 1) Before filing a sketch plan application, an applicant must comply with the provisions of Section  
176 4 of the Manual for Development Review Procedures for Montgomery County, as amended,  
177 that concern the following:
- 178 1. Notice;  
179 2. Posting the site of the application submittal; and  
180 3. Holding a pre-submittal meeting.
- 181 2) A public hearing must be held by the Planning Board on each sketch plan application no later  
182 than 90 days after the filing of an optional method development application unless a request to  
183 extend this period is requested by the applicant, Planning Board staff, or other interested parties,  
184 provided that such extension is found to be reasonable and not to constitute prejudice or undue  
185 hardship on any interested party. A recommendation regarding any request for extension must  
186 be acted upon as a consent agenda item by the Planning Board on or before the 90-day hearing  
187 period expires. Notice of the extension request and recommendation by Staff must be posted no  
188 less than 10 days prior to the item's agenda date.

189           3) No less than 10 days prior to the public hearing on a sketch plan, Planning Board staff must  
190           submit its analysis of the application including its findings, comments, and recommendations  
191           with respect to the requirements and standards of this division and any other matters that may  
192           assist the Planning Board in reaching its decision on the application. This staff report must be  
193           included in the record of the public hearing.

194       c) In approving a sketch plan, the Planning Board must find that the following elements are appropriate  
195       in concept and ready for further detailed review at site plan:

196           1) The plan meets the requirements and standards of this division, the development will further the  
197           objectives of the applicable master or sector plan, and will provide more efficient and effective  
198           development of the site than the standard method of development;

199           2) The proposed building massing and height and public use and other open spaces are located and  
200           scaled to achieve compatible relationships with each other and with existing and proposed  
201           buildings and open space adjacent to the site and with adjacent communities;

202           3) The general vehicular, pedestrian, and bicyclist access, circulation, parking, and loading areas  
203           are adequate, safe, and efficient;

204           4) The proposed public benefits and associated requested incentive density will further the  
205           objectives of the applicable master or sector plan and will improve the environmental,  
206           economic, and social sustainability of the project and its environs; and

207           5) The general phasing of structures, uses, public benefits, and site plans is feasible and  
208           appropriate to the scale and characteristics of the project.

209           d) The Planning Board may approve changes or modification of its findings regarding a sketch plan at  
210           the time of site plan review. The applicant must identify any inconsistency between the approved  
211           sketch plan and the proposed site plan in the notice of application for the site plan.

212   **59-C-15.5. Land Uses.**

213   No use is allowed in the CR zones except as indicated below:

- 214           - Permitted Uses are designated by the letter “P” and are permitted subject to all applicable regulations.
- 215           - Special Exception Uses are designated by the letters “SE” and may be authorized as special exceptions  
216           under Article 59-G.

217

<b>a) Agricultural</b>	
<u>Farm and country markets</u>	<u>P</u>
<u>Farm, limited to crops, vegetables, herbs, and ornamental plants</u>	<u>P</u>
<u>Nursery, horticultural – retail or wholesale</u>	<u>P</u>

<u>Parking garages, automobile</u>	<u>P</u>
<u>Public utility buildings, structures, and underground facilities</u>	<u>P</u>
<u>Radio and television broadcast studios</u>	<u>P</u>
<u>Rooftop mounted antennas and related unmanned equipment buildings, cabinets, or rooms</u>	<u>P</u>

219 **59-C-15.6. General Requirements.**

220 Development in the CR zone must comply with the following requirements.

221 **59-C-15.61. Master Plan and Design Guidelines Conformance.**

222 Development that requires a site plan must be consistent with the applicable master or sector plan and must  
223 address any design guidelines ~~[[adopted]]~~approved by the Planning Board to guide implementation of the  
224 applicable plan.

225 **59-C-15.62. Priority Retail Street Frontages.**

226 Development that requires a site plan and is located on a street identified as a priority retail street frontage in  
227 a master or sector plan or associated design guidelines must ~~[[provide the following:]]~~ be developed in a  
228 manner that is consistent with the recommendations and objectives of the applicable plan and/or guidelines.

- 229 ~~[[a)] on-street parallel parking, unless specifically denied by the agency maintaining the right-of-way;~~
- 230 ~~b)] majority of display windows and entrances arranged between zero and 45 degrees to the sidewalk;~~
- 231 ~~c)] shop entrances spaced at minimal distances in order to activate the street;~~
- 232 ~~d)] building façade along at least 65 percent of the aggregate length of the front street right-of-way;~~
- 233 ~~e)] front building wall no farther than 10 feet from the public right-of-way or 5 feet if no public~~  
234 ~~utility/improvement easement (PUE or PIE) is required; and~~

235 f) windows or glass doors on 60 percent of the building façade between 3 and 9 feet above sidewalk  
236 grade.

237 These provisions may be modified or waived by the Planning Board during the review of a site plan if found  
238 to be unreasonably burdensome to a proposed development due to conditions such as unusual lot size,  
239 topography, limited frontage, or other atypical circumstance.

240  
241

*Priority Retail Building Requirements Illustrative ]]*

242  
243  
244

245 **59-C-15.63. Streetscape.**

246 Streetscape improvements must be consistent with the recommendations of the applicable master or sector  
247 plan and must address any design guidelines approved by the Planning Board to guide implementation of the  
248 applicable plan.

249 **59-C-15.64. Bicycle Parking Spaces and Commuter Shower/Change Facility.**

250 a) Bicycle parking facilities must be free of charge, secure [,] and accessible to all residents or  
251 employees of the proposed development. Unsecured, exterior bicycle parking, such as inverted U-  
252 racks, must be provided free of charge.

253 b) The number of bicycle parking spaces and shower/change facilities required is shown in the following  
254 table (calculations must be rounded to the higher whole number):

255

<b><u>Bicycle and Shower/Change Facilities Required</u></b>	
<u>Use</u>	<u>Requirement</u>
<i><u>Residential</u></i>	
<u>In a building containing less than 20 dwelling units.</u>	<u>At least 4 bicycle parking spaces.</u>
<u>In a building containing 20 or more dwelling units.</u>	<u>At least 0.5 bicycle parking spaces per dwelling unit, not to be less than 4 spaces and up to a maximum of 100 required spaces.</u>
<u>In any group living arrangement expressly for senior citizens.</u>	<u>At least 0.1 bicycle parking spaces per unit, not to be less than 2 spaces up to a maximum of 100 required spaces.</u>
<i><u>Non-Residential</u></i>	
<u>In a building with a total non-residential floor area of 1,000 to 9,999 square feet.</u>	<u>At least 2 bicycle parking spaces.</u>

<p><u>In a building with a total non-residential floor area of 10,000 to 99,999 square feet.</u></p>	<p><u>Two bicycle spaces for the first 10,000 square feet plus one additional space for every additional <del>[[One bicycle parking space per]]</del> 10,000 square feet, up to a maximum of 100 <del>[[required]]</del> spaces.</u></p>
<p><u>In a building with a total non-residential floor area of 100,000 square feet or greater.</u></p>	<p><u>Two bicycle spaces for the first 10,000 square feet plus one additional space for every additional <del>[[One bicycle parking space per]]</del> 10,000 square feet, up to a maximum of 100 <del>[[required]]</del> spaces. <u>One shower/change facility for each gender available only to employees at any time the building is accessible.</u></u></p>

256 **59-C-15.65. Parking.**

257 a) For projects that meet the requirements for transit proximity levels 1 or 2, t~~[[T]]~~he ~~[[maximum]]~~  
 258 number of parking spaces provided on site must not exceed the ~~[[minimum]]~~ number ~~[[established]]~~  
 259 required under Article 59-E, except that the maximum number of parking spaces allowed for general  
 260 retail and restaurant uses is 4 spaces for every 1,000 square feet of gross leasable area and no parking  
 261 spaces are required for restaurant outdoor patron areas.

262 b) All projects that do not satisfy the requirmetns for transit proximity levels 1 or 2 must meet the  
 263 parking requirements established under Article 59-E, except the number of parking spaces for general  
 264 retail and restaurant uses established by paragraph (a) may be provided without a waiver.

265 c) ~~[[b)]~~ Except for retail and restaurant uses that satisfy subsection (a) and projects that satisfy  
 266 subsection (b), ~~[[T]]~~the minimum number of parking spaces required is based on transit proximity as  
 267 follows:

<b><u>Minimum Parking Requirements</u></b>
--

	Transit Proximity (Level 1 or 2)			
	Up to ¼ mile from transit	¼ to ½ mile from transit	½ mile to 1 mile from transit	>1 mile from transit
Non-residential: the <del>[[minimum]]</del> number of required spaces under Article 59-E multiplied by the following factor:	0.20	0.40	0.60	0.80
Residential: the <del>[[minimum]]</del> number of required spaces under Article 59-E multiplied by the following factor:	0.60	0.70	0.80	0.90

269 A minimum of 75% of the gross tract area of a project must be within the designated proximity level  
 270 to qualify for the applicable reduction.

271 ~~d) [[e)]]~~ Parking requirements must be met by any of the following:

- 272 1) providing the spaces on site;
- 273 2) constructing publicly available on-street parking, including on-street parking in the public right-  
 274 of-way; or
- 275 3) participating in a parking lot district or entering into an agreement for shared parking spaces in  
 276 a public or private facility within 1,000 feet of the subject lot[[, provided that ]] if the off-site  
 277 parking facility is not in an agricultural (Division 59-C-9), planned unit development (Division  
 278 59-C-7), or residential (Division 59-C-1) zone.

279 ~~e) [[d)]]~~ Every “car-share” space provided reduces the total minimum number of required spaces by 6  
 280 spaces for non-residential use or 3 spaces for residential use.

281 Example: A non-residential site requiring at least 100 spaces under Article 59-E would be required to provide a maximum of 100  
 282 spaces on site. If that site was within ¼ to ½ mile of a transit station, the minimum requirement for parking would be 40 spaces (100  
 283 x 0.40 = 40). If 2 car-share spaces were provided, that requirement would be 28 for non-residential use or 34 for residential use.

284 f) [(e)]

The design of surface parking facilities must comply with the following:

- 285 1) a parking facility at or above grade must not be located between the street and the main front  
 286 wall of the building or the side wall of a building on a corner lot ~~[(; however,)] unless the~~  
 287 Planning Board ~~[[may approve a design if it]] finds that ~~[[the alternative design would provide]]~~~~  
 288 safe~~[[r]]~~ and ~~[[more]]~~ efficient circulation would be better served by a different arrangement;
- 289 2) if a site is adjacent to an alley, the primary vehicular access to the parking facility must be from  
 290 that alley; and
- 291 3) curb cuts must be kept to a minimum and shared by common ingress/egress easements  
 292 whenever possible.

293 g) [(f)]

The design of parking facilities with drive-through services must comply with the following;  
 294 however, the Planning Board may approve a design if it finds that the alternative design would  
 295 provide safer and more efficient circulation:

- 296 1) the driveway must not be located between the street and the main front wall of a building or the  
 297 side wall of a building on a corner lot;
- 298 2) the drive-through service window must be located on the rear ~~or side~~ wall of the building,  
 299 provided that, in unusual circumstances such as an atypical lot configuration or steep site, if

300 located on the side wall of the building, the drive-through service window must be permanently  
 301 screened from any public street; and

302 3) curb cuts to a street must be minimized to one drive aisle of no more than 20 feet in width for  
 303 two-way traffic or two drive aisles each of no more than 10 feet in width for one-way traffic.

304 h) [[g)] Landscaping for surface parking facilities must satisfy the following requirements, except when  
 305 modifications are necessary for internal driveway and sidewalk connections between adjacent non-  
 306 residential lots or parcels:

307

<b>Minimum Landscape Standards for Surface Parking</b>	
<u>Subject</u>	<u>Requirement</u>
<u>Right-of-Way Screening</u>	<u>6-foot width of continuous soil panel or stormwater management recharge facility (not including any PUE or PIE) with groundcover, planting bed, or lawn; a minimum 3-foot high continuous evergreen hedge or fence; and one deciduous tree per 30 feet of street frontage or per the applicable streetscape standards.</u>
<u>Adjacent to a lot or parcel in any Commercial, Industrial, or Mixed-Use Zone</u>	<u>4-foot width continuous soil panel or stormwater management recharge facility with groundcover, planting bed, or lawn; one deciduous tree per 30 feet of frontage.</u>
<u>Adjacent to a lot or parcel in an Agricultural or Residential District</u>	<u>10-foot width continuous soil panel or stormwater management recharge facility with groundcover, planting bed, or lawn; 6-foot high continuous evergreen hedge or fence; and one deciduous tree per 30 feet of frontage.</u>
<u>Internal Pervious Area</u>	<u>10 percent of the parking facility area comprised of individual areas of at least 100 square feet each.</u>
<u>Tree Canopy Coverage</u>	<u>30 percent of the parking facility area (at 15 years growth).</u>

308

309

*Surface Parking Landscape Requirements Illustrative*

310

311

312

**59-C-15.7. Development Standards.**

Development in any CR zone must comply with the following standards.

**59-C-15.71. Density.**

a) The maximum density for any standard method project is the greater of 0.5 FAR or 10,000 gross square feet of floor area. Any single land use or any combination of land uses allowed in the zone may achieve the maximum density.

b) The maximum total density and mix of maximum non-residential and residential density for any project using the optional method of development is specified by the zone. [The difference between

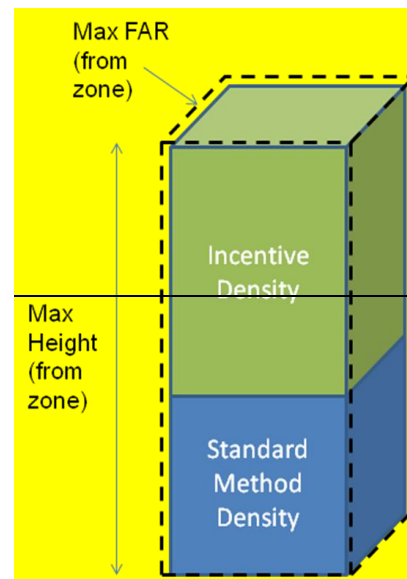

320

321 ~~the standard method density and optional method density is defined as “incentive density” and is~~  
322 ~~allowed under the incentive density provisions of Section 59-C-15.8.]]~~

323 **59-C-15.72. Height.**

- 324 a) The maximum height for any building or structure in a standard method project is 40 feet.  
325 b) The maximum height for any building or structure in an optional method project is determined by the  
326 zone.

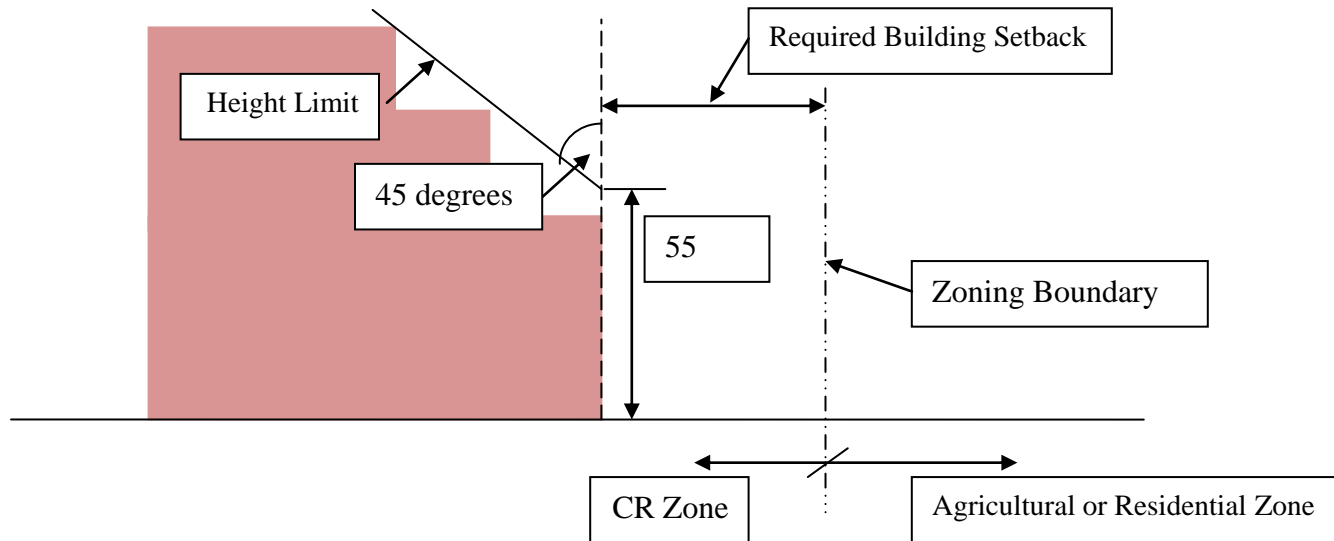

327 *[[Incentive Density Illustration (with maximum FAR)]]*

328  
329 **59-C-15.73. Setbacks.**

330 A building must not be any closer to a lot line ~~[[of an]]~~ shared with a property in an agricultural (Division 59-  
331 C-9) or residential (Division 59-C-1) zone than:

- 332 a) 25 feet or the setback required by the adjacent lot, whichever is greater; and  
 333 b) the building must not project beyond a 45 degree angular plane projecting over the lot measured from  
 334 a height of 55 feet at the setback determined above, with the exception of those features exempt from  
 335 height and setback restrictions under Section 59-B-1.

*Angular Plan Setback Illustration*

- 336 c) A building existing when the CR zone is applied may retain its pre-existing setback if the height is not  
 337 increased within that setback and the setback required by the CR zone, if greater.  
 338  
 339

**59-C-15.74. Public Use Space.**

- 340  
 341 a) The minimum public use space for any standard method project is 10 percent of the net ~~[[tract]]lot~~  
 342 area of the site.  
 343 b) Projects using the optional method of development must provide public use space as follows:

344

<b>Minimum Required Public Use Space (% of net <del>lot</del> tract area)</b>				
Acres (Gross)	Number of Existing and Planned Right-of-Way Frontages			
	<b>1</b>	<b>2</b>	<b>3</b>	<b>4+</b>
< 1/2	0	0	<del>4</del> 10%	<del>6</del> 15%
1/2 - 1.00	0	<del>4</del> 10%	<del>6</del> 15%	<del>8</del> 10%
<b>1.01 - 3.00</b>	<del>4</del> 10%	<del>6</del> 15%	<del>8</del> 10%	10%
<b>3.01 - 6.00</b>	<del>6</del> 15%	<del>8</del> 10%	10%	10%
<b>6.01 +</b>	<del>8</del> 10%	10%	10%	10%

345

c) Public use space must:

346

1) be calculated on the net ~~lot~~ tract area of the ~~site~~ area included in a sketch plan application;

347

2) be rounded to the next highest 100 square feet;

348

3) be easily and readily accessible to the public;

349

4) ~~be placed under a public access easement in perpetuity~~be distributed within the entire tract area included in the sketch plan application; and

350

351

5) contain amenities such as seating options, shade, landscaping, or other similar public benefits.

352

d) Instead of providing on-site public use space, for any site of 3 acres or less, a development may propose the following alternatives, subject to Planning Board approval:

353

354

1) public use space improvements ~~to an area equal in~~ of an equal or greater size within 1/4 mile of the subject site; or

355

356 2) a payment in part or in full to the Public Amenity Fund~~[[, equal to the average cost of required~~  
 357 ~~site improvements, added to the current square foot market value of the area required as public~~  
 358 ~~use space]] as provided for in section 59-D-2.~~

359 e) A development on a site greater than 3 acres may only provide off-site public use space in order to  
 360 provide master-planned open space improvements, or a payment per paragraph 2 above, for an area of  
 361 equal or greater size within the master plan area of the proposed development and in accordance with  
 362 an approved sketch plan.

363 **59-C-15.75. Residential Amenity Space.**

364 a) Any building containing 20 or more dwelling units must provide amenity space for its residents as  
 365 follows:

<b><u>Required Residential Amenity Space</u></b>	
<u>Type of Amenity Space</u>	<u>Area of Amenity Space</u>
<u>Indoor space in a multi-purpose room, fitness room, or other common community room(s), at least one of which must contain a kitchen and bathroom.</u>	<u>20 square feet per dwelling unit up to 5,000 square feet.</u>
<u>Passive or active outdoor recreational space.</u>	<u>20 square feet per dwelling unit, of which at least 400 square feet must adjoin or be directly accessible from the indoor amenity space.</u>

367 b) The amenity space is not required for Moderately Priced Dwelling Units (MPDUs) on a site within a  
 368 metro station policy area or where the Planning Board finds that there is adequate recreation and open  
 369 space within a ½ mile radius of the subject site.

- 370 c) The amenity space requirement may be reduced by ½ for Workforce Housing Units (WFHUs) located  
 371 within a metro station policy area or if the minimum public open space requirement is satisfied on site.  
 372 d) The provision of residential amenity space may be counted towards meeting the required recreation  
 373 calculations under the M-NCPPC Recreation Guidelines, as amended.

374 **59-C-15.8. Special Regulations for the Optional Method of Development**

375 **59-C-15.81. Incentive Density Provisions.**

376 This section establishes incentives for optional method projects to provide public benefits in return for  
 377 increases in density and height above the standard method maximums, consistent with the applicable master  
 378 or sector plan, up to the maximum permitted by the zone.

379 [(a) — The incentive density approved for each proposed public benefit is calculated as a percentage of the  
 380 total incentive density, which is the incremental difference between the standard method maximum  
 381 FAR (0.5) and the proposed project FAR up to the maximum FAR allowed by the zone.

382 b) — The minimum and maximum incentive density percentage increases for each public benefit are  
 383 established in Section 59 C 15.81(f).

384 e) — The Planning Board may accept, reject, or modify a proposed incentive density or modify the  
 385 requested percentage above the minimum of incentive density established up to the maximum  
 386 established. Except for those benefits with specific maximum standards, in approving incentive  
 387 densities above the minimum, the Planning Board must consider:

388 1) — the size and configuration of the parcel;

- 389           2) — the policy objectives and priorities of the applicable master or sector plan;
- 390           3) — the applicable design guidelines;
- 391           4) — the relationship of the site to adjacent properties;
- 392           5) — the presence or lack of similar benefits nearby; and
- 393           6) — quantitative and qualitative enhancements provided exceeding the delineated minimum
- 394           incentive density standards.
- 395           d) — Public benefits that apply to 1 building in a multi-building project must be weighted proportionally to
- 396           the density of the applicable building compared to the total density of the project.
- 397           e) — In addition to the public benefits set forth below, an applicant may propose other public benefits that
- 398           will further the goals and objectives of the applicable master or sector plan for the purpose of
- 399           obtaining an incentive density increase.
- 400           f) — The Planning Board may grant no more than 30 percent of the total incentive density for a project for
- 401           the connectivity, design, diversity, or environment incentive categories under (h) below or any public
- 402           benefit approved under (e) above.
- 403           *Example: A development in a zone with a maximum FAR of 5.5 would base all public benefit calculations on the incentive density of*
- 404           *5.0 FAR (5.5 - 0.5). Thus, being on a site adjacent to a metro station would yield an automatic incentive density of 2.5 FAR (5.0 x*
- 405           *0.50), and full density would be allowed by providing public benefits equal to an additional 50 percent.*
- 406           g) — Provision for inspections, maintenance, and enforcement of public benefits provided in return for
- 407           incentive density must be established in a Site Plan Enforcement Agreement approved by the

408  
 409  
 410  
 411  
 412  
 413

Department of Permitting Services and by resolution of the Planning Board before the certification of a site plan.

<u>h) Table of density incentives: Incentive Zoning Table</u>

<u>Transferable</u> <u>Development Rights</u>	<u>10</u>	<u>30</u>	<u>15.868</u>
<u>Tree Canopy</u>	<u>10</u>	<u>20</u>	<u>15.869</u>

<u>Vegetated Area</u>	<u>5</u>	<u>10</u>	<u>15.8610</u>
<u>Vegetated Roof</u>	<u>10</u>	<u>20</u>	<u>15.8611</u>

414 **59-C-15.82. Transit Proximity Incentives.**

415 A project on a site near transit encourages greater transit use and reduces vehicle miles traveled, congestion,  
416 and carbon emissions. The additional percent of incentive density automatically allowed is as follows:

417

418

<u>Transit Proximity</u>	<u>Level 1 Transit</u>	<u>Level 2 Transit</u>
<u>Adjacent or confronting</u>	<u>50%</u>	<u>25%</u>
<u>Within ¼ mile</u>	<u>40%</u>	<u>20%</u>
<u>Between ¼ and ½ mile</u>	<u>30%</u>	<u>15%</u>
<u>Between ½ and 1 mile</u>	<u>20%</u>	<u>10%</u>

419 **59-C-15.83. Connectivity and Mobility Incentives.**

420 A project that enhances connectivity and mobility encourages pedestrian and other non-auto travel for short  
421 and multi-purpose trips as well as for commuting. Such a project facilitates social interaction, provides  
422 opportunities for healthier living, and stimulates local businesses.

423 **59-C-15.831. Community Connectivity.**

424 a) The minimum incentive density increase for a building that enhances community connectivity by  
425 locating near existing retail uses or provides retail uses, requires that:

- 426 1) — at least 10 different existing or proposed retail uses with direct pedestrian access are within 1/2  
427 mile; and
- 428 2) — at least 35 percent of those uses have a maximum floor area of 5,000 square feet and that any  
429 newly provided retail uses remain at or below that area for a period of at least 4 years after the  
430 initial use and occupancy permit is issued for that use.
- 431 b) — The maximum increase requires additional benefits, such as a large diversity of retail uses, a greater  
432 number of retail shops, provision of services associated with live-work units, or that the required  
433 number of retail uses are within 1/4 mile.

434 **59-C-15.832 Community Garden.**

435 A community garden allows any resident to grow their own produce, reduce reliance on automobiles,  
436 increase water and air quality, and interact with other residents.

- 437 a) — The minimum incentive density increase requires that the garden:
- 438 1) — is located on the subject site or within 500 feet of the subject site;
- 439 2) — provides all garden spaces with at least 12 inches of soil depth and access to water; and
- 440 3) — provides community garden space at a rate equivalent to 1 space per 20 dwelling units. Each  
441 space must be at least 16 square feet. At least 1 out of each 10 spaces must be accessible under  
442 ADA standards.
- 443 b) — The maximum increase requires additional features such as a composting facility, additional garden  
444 space, seating areas, doubling as a green roof, or additional accessible garden plots.

445 **59-C-15.833. Parking at the Minimum.**

446 a) ~~The minimum incentive density increase requires that sites of 1 acre or more provide on site only the~~  
447 ~~minimum required number of parking spaces.~~

448 b) ~~The maximum increase requires that sites of less than 1 acre provide on site only the minimum~~  
449 ~~required number of parking spaces.~~

450 **59-C-15.834. Pedestrian Through-Block Connections.**

451 ~~A through block connection enhances pedestrian mobility and helps to create a variety of open spaces,~~  
452 ~~particularly on larger blocks.~~

453 a) ~~The minimum incentive density increase for a pedestrian through block connection requires that:~~

454 1) ~~the pedestrian connection must provide direct access between streets;~~

455 2) ~~the pedestrian connection must be at least 15 feet in width;~~

456 3) ~~at least 35 percent of the walls facing the interior pedestrian connection below a height of 8 feet~~  
457 ~~must have clear, unobstructed windows, unless the Planning Board finds that an alternative~~  
458 ~~design is at least equally safe;~~

459 4) ~~the pedestrian connection must be open to the public between sunrise and sunset and, where it~~  
460 ~~leads to a transit facility or publicly accessible parking facility within ½ mile, for the hours of~~  
461 ~~operation of the transit and/or parking facility; and~~

462 5) — retail uses fronting both a pedestrian connection and a street must maintain operable doors from  
463 both unless not required by the Planning Board during site plan review due to exceptional site  
464 circumstances.

465 b) — The maximum increase requires additional benefits such as:

466 1) — direct connection to parks;

467 2) — transit facilities;

468 3) — public buildings;

469 4) — pedestrian connection with accessible retail uses along a majority of its length;

470 5) — connections increased in width; or

471 6) — public artworks integrated into the walk.

472 **59-C-15.835. Public Parking.**

473 a) — The minimum increase requires providing on-site the difference between the minimum number of  
474 required parking spaces and the maximum number of allowed parking spaces as publicly accessible  
475 spaces for free or at a market rate.

476 b) — The maximum increase requires providing public parking spaces, as required above, in combination  
477 with additional improvements, such as constructing those spaces underground or in a structure.

478 **59-C-15.836. Transit Access Improvement.**

479 a) — The minimum incentive density increase for transit access improvements requires that the  
480 improvements:

- 481 1) — are located within 1/2 mile of the proposed development site or, in the case of mobile transit  
482 improvements such as a bus shuttle, provide regular access for passengers within 1/2 mile; and  
483 2) — are built to ADA accessibility standards as amended.

484 b) — The maximum increase requires additional benefits such as closer access, new access easements,  
485 connecting walkways, mezzanines, seating areas, structures for wind/rain protection, or concourse  
486 areas.

487 **59-C-15.84. Diversity Incentives.**

488 **59-C-15.841. Adaptive Buildings.**

489 An adaptive building can adjust to a diversity of uses over time, which makes the building more  
490 accommodating of mixed uses, more sustainable, and more embedded in the pattern of a community.

491 a) — The minimum incentive density increase for an adaptive building requires that:

- 492 1) — the floor to floor dimension must be at least 15 feet for all floors; and  
493 2) — the internal floor plan is based on a structural system allowing flexibility of volumes divisible  
494 from 1 open floor plate to any number of parceled volumes.

495 b) — The maximum increase requires additional benefits such as that:

- 496 1) — the structural system has additive capacity for any available density and height that is not used  
497 by the building without demolition of the structure; or  
498 2) — the internal layout is built to allow changes between residential, retail, and office uses by minor  
499 modifications.

500 **59-C-15.842. Affordable Housing.**

501 a) — All residential development must comply with the requirements of Chapters 25A and 25B for the  
502 provision of Moderately Priced Dwelling Units (MPDUs) and Workforce Housing Units (WFHUs).

503 b) — Provision of MPDUs above the minimum required grants an incentive density increase, providing the  
504 following standards are met:

505 1) — the increase in density is calculated on the incentive density as required by Chapter 25A;

506 2) — the MPDUs must be reasonably distributed throughout the project; and

507 3) — any dwelling units built under this section must be controlled under the MDPU or WFHU  
508 provisions for a minimum period of 99 years.

509 *Example:* Provision of 14.5 percent MPDUs achieves an incentive density increase of 20 percent (25-A-5(c)(3)). In the case of a  
510 CR4.5, that would equal  $0.20 \times 4.0$  (the incentive density), which is 0.8 FAR.

511 c) — Provision of WFHUs grants an incentive density increase at the following rate: 2 times the percentage  
512 of units provided as WFHUs up to 30 percent.

513 *Example:* Provision of 5 percent WFHUs achieves an incentive density increase of 10 percent; provision of 12 percent WFHUs  
514 achieves an incentive density increase of 24 percent.

515 **59-C-15.843. Care Center.**

516 a) — The minimum incentive density increase for a center for daytime adult or child care requires a facility  
517 for at least 12 users and the general public must have the opportunity to comprise at least 25 percent of  
518 the users.

519 ~~b) — The maximum increase requires additional benefits such as providing for additional users, a safe drop-~~  
520 ~~off area, an increase in users from the general public, and recreation facilities provided above those~~  
521 ~~required by law.~~

522 **59-C-15.844. Community Facility.**

523 a) — ~~The minimum incentive density increase for a community facility that helps meet the needs of~~  
524 ~~residents and workers requires that the community facility:~~

525 1) — ~~is recommended in the applicable master plan or sector plan; and~~

526 2) — ~~is accepted for operation and use by an appropriate public agency, community association, or~~  
527 ~~nonprofit organization.~~

528 b) — ~~The maximum increase requires further benefits, such as an entrance to the facility directly on the~~  
529 ~~street, location of the building within 10 feet of a public sidewalk, associated outdoor open space, or~~  
530 ~~integration into an area with a residential FAR of at least 2.0 (or at least 30 dwelling units per acre).~~

531 **59-C-15.845. Local Retail Preservation.**

532 ~~Preservation of locally owned small businesses on site is eligible for incentive density as follows:~~

533 a) — ~~preservation of up to 2 small businesses: 10 percent; and~~

534 b) — ~~preservation of 3 or more small businesses: 20 percent.~~

535 ~~Exact terms of lease requirements and rental agreements must be established by the site plan enforcement~~  
536 ~~agreement.~~

537 **59-C-15.846. Unit Mix and Size.**

538 a) ~~The minimum incentive density increase for creating residential buildings with a minimum mix of~~  
539 ~~dwelling unit types (calculated by rounding to the next higher whole number) requires provision of at~~  
540 ~~least:~~

- 541 1) ~~7.5 percent as efficiency dwelling units;~~
- 542 2) ~~8 percent as one-bedroom dwelling units;~~
- 543 3) ~~8 percent as two-bedroom dwelling units; and~~
- 544 4) ~~5 percent as three-bedroom dwelling units.~~

545 b) ~~The maximum increase requires provision of at least (calculated by rounding to the next higher whole~~  
546 ~~number):~~

- 547 1) ~~10 percent as efficiency dwelling units;~~
- 548 2) ~~10 percent as one-bedroom units;~~
- 549 3) ~~10 percent as two-bedroom units; and~~
- 550 4) ~~7.5 percent as three-bedroom units.~~

551 **59-C-15.85. Design Incentives.**

552 **59-C-15.851. Floor Plate Size.**

553 a) ~~The minimum incentive density increase for the provision of floor plate restrictions requires that:~~

- 554 1) ~~the floor area of any floor above a height of 120 feet does not exceed 10,000 square feet for~~  
555 ~~residential uses or 19,000 square feet for non-residential uses, or 12,000 square feet for mixed-~~  
556 ~~uses (if not more than 60 percent of a mixed-use floor is used for any single use); and~~

557 2) — the exterior of the building facing any street or public open space has at least 60 percent glass  
558 on the floors with the reduced floor plate.

559 b) — The maximum increase requires additional benefits, such as providing the reduced floor plates in  
560 conjunction with the Exceptional Design factor, providing smaller floor plates, combining this  
561 incentive with the tower setback, providing a larger percentage of glass, or integrating sustainable  
562 technologies into the architecture.

563 **59-C-15.852. Historic Resource Protection.**

564 a) — The minimum incentive density increase for the preservation of a historic resource designated in the  
565 Master Plan for Historic Preservation requires that a preservation strategy for the resource is approved  
566 by the Planning Board as part of the site plan enforcement agreement and that a historic area work  
567 permit is issued by the Historic Preservation Commission.

568 b) — The maximum increase requires that other benefits are provided, such as interpretive signs/exhibits,  
569 integration and construction of context-appropriate landscapes and settings, or protection of important  
570 viewsheds.

571 **59-C-15.853. Parking Below Grade.**

572 a) — The minimum incentive density increase requires that sites of 1 acre or more provide all on-site  
573 parking spaces below the average grade of the primary street frontage.

574 b) — The maximum increase requires that sites of less than 1 acre provide all on-site parking spaces below  
575 the average grade of the primary street frontage.

576 **59-C-15.854. Podium/Tower Setback.**

577 a) — The minimum incentive density increase for the provision of a tower setback requires that the tower  
578 must be set back from the first floor building frontage at or below 72 feet and the setback must be at  
579 least 6 feet.

580 b) — The maximum increase requires that the tower setback be at or below 50 feet and that the setback be at  
581 least 12 feet.

582 **59-C-15.855. Public Art.**

583 Public art is considered a public benefit because it enhances the quality of place and creates a sense of  
584 identity in a community.

585 a) — The minimum incentive density increase for public art requires that it:

- 586 1) — enhances the general or specific cultural objectives of the applicable master or sector plan; and  
587 2) — is approved by the Public Arts Trust Steering Committee.

588 b) — The maximum increase requires that, in addition to the above requirements, the artwork fulfill at least  
589 5 of the following goals as determined by the Public Arts Trust Steering Committee:

- 590 1) — achieve aesthetic excellence;  
591 2) — ensure an appropriate interaction between the art and the architectural setting in terms of scale,  
592 materials, and context;  
593 3) — ensure public access and invite public participation;

- 594 4) — encourage collaboration between the artist(s) and other project designers early in the design  
595 phases;
- 596 5) — ensure long-term durability of permanent works through material selection or a documented  
597 maintenance program;
- 598 6) — encourage a rich variety of arts including permanent, temporary (revolving), and event  
599 programming;
- 600 7) — increase public understanding and enjoyment of art through interpretive information and/or  
601 programmed events; and
- 602 8) — achieve a collection of commissioned art that is unique and contributes in a positive way to the  
603 identity of the community.
- 604 e) — A fee instead of public art may be accepted for incentive density as follows:
- 605 1) — the minimum fee is calculated on 1 percent of the development's projected cost;
- 606 2) — the fee is paid to the Public Arts Trust Steering Committee;
- 607 3) — the fee is used for installation, management, and maintenance of public art at the discretion of  
608 the Public Arts Trust Steering Committee, with preference given to the policy area where the  
609 proposed development is located; and
- 610 4) — the incentive density is equal to a 5 percent increase for every 1 percent of projected  
611 development cost paid to the Public Arts Trust, up to 20 percent.

612 **59-C-15.856. Public Plaza/Open Space.**

613 Plazas are important public amenities and create interesting spaces and active gathering areas.

614 a) — The minimum incentive density increase for any plaza requires that:

615 1) — the plaza is directly accessible to a street;

616 2) — the plaza must be open to the public at least between sunrise and sunset;

617 3) — no proposed loading or parking facilities should be visible below a height of the fourth floor;

618 and

619 4) — the plaza must be in addition to any public use space required by the development standards or  
620 other minimum open space requirement of this Division.

621 b) — The maximum increase requires that the above requirements are met, in addition to the following:

622 1) — the plaza's width must be at least 50 feet;

623 2) — where the plaza is provided as part of a redevelopment, buildings facing the plaza must be  
624 designed so that:

625 A) — the walls of any non-residential floor area facing the plaza must have windows on at least  
626 60 percent of the façade below a height of 40 feet; and

627 B) — the main entry to any dwelling units is from a wall facing the plaza; and

628 3) — the plaza should contain seating, trash receptacles, landscaping, and other amenities such as  
629 water features, kiosks, and passive recreation areas.

630 **59-C-15.857. Streetscape, Off-Site.**

631 Streetscape improvements enhance the pedestrian experience and better connect buildings to the public  
632 spaces.

633 a) — The minimum incentive density increase for streetscape improvements requires that the following  
634 criteria are met:

635 1) — the improvements must be located within 1/2 mile of the subject site; and

636 2) — the improvements are equal to 18 percent of the net lot.

637 b) — The maximum increase requires that the improvements be equal to at least 36 percent of the net lot  
638 area.

639 **59-C-15.858. Exceptional Design.**

640 The minimum incentive density increase for high-quality site and architectural design requires that at least 3  
641 of the following criteria are met; the maximum density increase requires that at least 5 of the following  
642 criteria are met:

643 a) — provides innovative solutions in response to the architectural context and surrounding landscape, for  
644 example, by rotating floor plates for views or reconciling offset street walls;

645 b) — creates a sense of place that will serve as a landmark in the community, for example, by creating a  
646 distinguishing element that is visible from an important view or at a gateway to an area;

647 c) — enhances the public realm in a distinct and original manner, for example, by using existing materials  
648 and forms in new ways to provide continuity and contrast;

- 649 d) — adds to the diversity of the built realm within the community, for example, by introducing new  
650 materials, building methods, or design styles;
- 651 e) — uses design solutions to make compact/infill living, working, and shopping environments pleasurable  
652 and desirable, for example, by retrofitting surface parking lots and single use retail malls or creating  
653 multi-use, pedestrian dominated realms in previous auto-oriented areas; and
- 654 f) — integrates environmentally sustainable solutions, for example, by using stormwater management  
655 facilities that incorporate best management practices in an apparent and observable way or integrating  
656 passive solar features into the visible structure of a building or site.

657 **59-C-15.86. Environment Incentives.**

658 **59-C-15.861. Bio-retention and Stormwater Recharge.**

- 659 a) — The minimum incentive density increase for the use of bio-retention and recharge facilities requires  
660 that at least 25 percent of projected stormwater outfall for a 10-year event be contained and recharged  
661 on site or within ¼ mile of the site.
- 662 b) — The maximum increase requires that at least 50 percent of projected stormwater for a 10-year event be  
663 contained and recharged.

664 **59-C-15.862. Conveyed Parkland.**

- 665 a) — The minimum incentive density increase for land conveyed to the M-NCPPC for inclusion in or  
666 provision of parkland, trail area, or other master-planned Parks' use requires conveyance of at least of  
667 15 percent of the gross lot area.

668 b) — The maximum increase requires conveyance of at least 30 percent of the gross lot area.

669 **59-C-15.863. Dark Skies.**

670 a) — The minimum incentive density increase for dark skies-compliant projects requires that they be built  
671 and maintained in conformance with the standards established by the International Dark Sky  
672 Association as amended.

673 b) — The maximum increase requires that the exterior lighting plan be integrated into an energy efficiency  
674 plan for the entire project submitted and approved by the Planning Board with a site plan application.

675 **59-C-15.864. Energy Efficiency and Generation.**

676 a) — The minimum density incentive increase for the use of on-site renewable energy generation requires  
677 that buildings must meet the minimum energy efficiency standards of 17.5 percent for new buildings,  
678 10.5 percent for existing buildings, or generate at least 1.5 percent of their energy on-site.

679 b) — The maximum increase requires additional benefits such as greater energy efficiency and the  
680 generation of at least 2.5 percent of energy on-site.

681 **59-C-15.865. Green Walls**

682 a) — The minimum incentive density increase for a green wall requires that it:

683 1) — must be designed, installed, and maintained to cover at least 30 percent of the area of a blank  
684 wall or parking garage facing a street or plaza; and

685 2) — must be found to add to the aesthetic quality and environmental sustainability of the project.

686 b) The maximum increase requires additional benefits such as a greater percent of coverage, southern or  
687 western exposure, the use of plants with varying flowering seasons, or integration into an overall  
688 energy or environmental site design program.

689 **59-C-15.866. LEED Rating.**

690 A LEED-rated building or equivalent rating system approved under Chapter 8 Article VII is eligible for an  
691 incentive density increase if it meets any continuing requirements necessary to maintain that status.

692 (<http://www.usgbc.org/Default.aspx>) The amount of incentive density increase is equal to the following:

693 a) LEED Silver: 10 percent

694 b) LEED Gold: 20 percent

695 c) LEED Platinum: 30 percent

696 **59-C-15.867. Rainwater Reuse.**

697 a) The minimum incentive density increase for the collection of rainwater for on-site irrigation, grey-  
698 water use, or filtration for re-use requires that a minimum of 25 percent of projected rainwater for a  
699 10-year event be collected and used on-site or within ¼ mile of the site.

700 b) The maximum increase requires that at least 50 percent of projected rainwater for a 10-year event be  
701 collected and used.

702 **59-C-15.868. Transferable Development Rights.**

703 The incentive density increase for the purchase of transferable development rights (TDRs) must meet the  
704 following:

705 a) — the purchase must be executed and recorded before approval of a record plat;

706 b) — the use of this incentive must be for development on land recommended as a TDR receiving area in  
707 the appropriate master or sector plan;

708 c) — TDRs must be purchased in increments of 10; and

709 d) — the incentive density increase is equal to 10 percent for every 10 TDRs purchased, up to 30 percent.

710 **59-C-15.869. Tree Canopy.**

711 a) — The minimum incentive density increase for the provision of tree canopy requires coverage of at least  
712 25 percent of the on-site open space at 15 years growth.

713 b) — The maximum increase requires coverage of at least 50 percent of the on-site open space at 15 years  
714 growth.

715 **59-C-15.8610. Vegetated Area.**

716 a) — The minimum incentive density increase for a vegetated area requires that the following criteria are  
717 met:

718 1) — the area must be in addition to any required on-site open space or any vegetated roof incentive;

719 2) — the area must replace at least 5,000 square feet of impervious area;

720 3) — the area provides at least 12 inches of soil depth; and

721 4) — the area is planted with well-maintained vegetation.

722 b) — The maximum increase requires additional benefits, such as larger area or greater soil depth.

723 **59-C-15.8611. Vegetated Roof.**

- 724 a) ~~The minimum incentive density increase for a vegetated roof requires that the:~~  
725 ~~1) vegetated roof must cover at least 33 percent of the roof of the building, excluding any space~~  
726 ~~occupied by mechanical equipment; and~~  
727 ~~2) soil or media depth must be at least 4 inches.~~

728 b) ~~The maximum increase requires coverage of at least 60 percent of the roof area.~~

729 **59-C-15.87. Special Regulations for Purchase of Building Lot Termination (BLT) Development Rights.**

730 a) ~~A development under the Optional Method must purchase building lot termination (BLT) easements~~  
731 ~~under Chapter 2B, or a contribution must be made to the Agricultural Land Preservation Fund under~~  
732 ~~Chapter 2B equal to 12.5 percent of the incentive density floor area using the following formula:~~

- 733 ~~1) one BLT easement is required for each 9,000 square feet of residential floor area;~~  
734 ~~2) one BLT easement is required for every 7,500 square feet of non-residential floor area.~~

735 b) ~~When a BLT easement cannot be purchased or the amount of floor area attributed to a building lot~~  
736 ~~termination easement is a fraction of the floor area equivalent, payment must be made to the~~  
737 ~~Agricultural Land Preservation Fund according to the rate set annually by executive regulation.}}~~

738 a) ~~Public benefits must be provided that enhance or contribute to the environmental, economic, and~~  
739 ~~social sustainability of a project and its environs in the following categories:~~

- 740 ~~1) Master-planned major public facilities;~~  
741 ~~2) Transit proximity for residents, workers, and patrons;~~  
742 ~~2) Connectivity between uses and activities and mobility options~~

- 743 3) Diversity of uses and activities;
- 744 4) Quality of building and site design; and
- 745 5) Protection and enhancement of the natural environment.

746 Sections 59-C-15.82 through 59-C-15.87 elaborate the types of public benefits that may be accepted in  
747 each of these categories.

748 b) Incentive density is calculated in one of two ways:

- 749 1) Method 1. The incentive density for public benefits that are primarily related to buildings or  
750 sites, such as LEED rating, floor-plate size, through-block connection, or rainwater recharge,  
751 may be distributed among one or more buildings or sites within the tract included in a sketch  
752 plan application and is based on the difference between the maximum standard method density  
753 on the entire tract and the approved density of the entire project.

*Example: If a project composed of three buildings in a CR 4.0 zone (regardless of use mix or height) proposes an FAR of 3.5 among the various buildings, the incentive density approved for additional public open space is based on the difference between 3.5 FAR and 0.5 FAR (the assumed standard method maximum), or 3.0 FAR. Further, if the public open space is awarded a 20% incentive, the resulting allowed incentive density applied to the project would be 0.6 FAR.*

- 760 2) Method 2. The incentive density for a public facility, such as a community center or land  
761 conveyed for a school or park, that is conveyed and/or built as part of a project may be

762 distributed among one or more buildings and lots within the tract area included in a sketch plan  
763 application and is based on the difference between the maximum standard method density on  
764 the entire tract and the maximum allowed density of the zone.

765 *Example: If a project in a CR 6.0 zone (regardless of use mix or height) proposes any FAR at or*  
766 *below 6.0 among various buildings and/or sites, the incentive density approved for the*  
767 *construction of a community recreation facility is based on the difference between 6.0 FAR and*  
768 *0.5 FAR (the standard method maximum), or 5.5 FAR. Further, if the community recreation*  
769 *facility is awarded a 30% incentive, the resulting incentive density applied to the project would*  
770 *be 1.65 FAR.*

771 3) The height of any individual building must not exceed the maximum height of the zone and  
772 must be consistent with the recommendations of the applicable master or sector plan.

773 c) In approving any incentive density based on the provision of public benefits, the Planning Board must  
774 consider:

775 1) The policy objectives and priorities of the applicable master or sector plan;

776 2) Any applicable design guidelines and any adopted public benefit standards and guidelines;

777 3) The size and configuration of the tract;

778 4) The relationship of the site to adjacent properties;

779 5) The presence or lack of similar public benefits nearby; and

780 6) Enhancements that increase public access to or enjoyment of the benefit.

781 The Planning Board must adopt, publish, and maintain guidelines that detail the standards and  
782 requirements for public benefits that may be provided for incentive density. These guidelines are in  
783 addition to and do not supercede any standards, requirements, or rules of incentive density calculation  
784 included in this division.

785 **59-C-15.82. Incentives for Master-Planned Major Public Facilities.**

786 Major public facilities such as schools, libraries, recreation centers, urban parks, and county service centers provide  
787 public services at convenient locations, centers for community meetings and civic events, and contribute focus and  
788 civic activity to the public realm. Because of their significance in place-making, the Planning Board may approve  
789 incentive density of up to 70 percent for the conveyance of a site and/or construction of a major public facility that  
790 is designated on a master plan or sector plan and is accepted for use and operation by the appropriate public  
791 agency, community association, or nonprofit organization. Method 2.

792 **59-C-15.83. Incentives for Transit Proximity.**

793 In order to encourage greater use of transit, control sprawl, and reduce vehicle miles traveled, congestion, and  
794 carbon emissions, the Planning Board may approve incentive density for transit proximity under this section. The  
795 percentage of incentive density awarded to a project for transit proximity is calculated according to Method 1 as  
796 follows:

<u>Transit Proximity</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
<u>Adjacent or confronting</u>	<u>50%</u>	<u>30%</u>	<u>15%</u>
<u>Within ¼ mile</u>	<u>40%</u>	<u>25%</u>	<u>10%</u>

<u>Between ¼ and ½ mile</u>	<u>30%</u>	<u>20%</u>	<u>5%</u>
<u>Between ½ and 1 mile</u>	<u>20%</u>	<u>15%</u>	<u>0%</u>

797 a) A project is adjacent to or confronting a transit station or stop if it shares a property line, easement  
 798 line, or is separated only by a right-of-way from an existing or planned transit station or stop and 100  
 799 percent of the gross tract area submitted in a single sketch plan application is within ¼ mile of the  
 800 transit portal.

801 b) For all other projects to qualify for the incentive density available at the other distances, at least 75  
 802 percent of the gross tract area submitted in a single sketch plan application must be within the range  
 803 for which the incentive is proposed. The incentive density for projects with less than 75 percent of the  
 804 gross tract area in one range must be calculated as a weighted average of the percentage of area in  
 805 each range.

806 **59-C-18.84. Incentives for Connectivity and Mobility.**

807 In order to enhance connectivity between uses and amenities and increases mobility options, encourage non-  
 808 automotive travel for short and multi-purpose trips as well as for commuting, facilitate social and commercial  
 809 interaction, provide opportunities for healthier living, and stimulate local businesses, the Planning Board may  
 810 approve incentive density of up to 30% to a project that provides at least two of the following public benefits:

811 a) Neighborhood Services: Safe and direct pedestrian access to 10 different retail services on site or within ¼  
 812 mile, of which at least 4 have a maximum retail bay floor area of 5,000 square feet. Method 1.

- 813 b) Community Gardens: Safe and accessible garden space of 500 square feet or one 16 square-foot plot per 20
- 814 dwelling units, whichever is greater, on site or within 500 feet of the site. Method 1.
- 815 c) Minimum Parking: Provision of the minimum required parking for projects of one acre of gross tract area or
- 816 more. Method 1.
- 817 d) Through-Block Connections: Safe and attractive pedestrian connections between streets. Method 1.
- 818 e) Public Parking: Provision of up to the maximum number of parking spaces allowed in the zone as public
- 819 parking free or at a market rate. Method 2.
- 820 f) Transit Access Improvement: Ensuring that access to transit facilities meets County standards for
- 821 handicapped accessibility. Method 1.

822 **59-C-15.85. Incentives for Diversity of Uses and Activities.**

823 In order to increase the variety and mixture of land uses, types of housing, economic diversity, and community

824 activities; contribute to development of a more efficient and sustainable community; reduce the necessity for

825 automobile use; and facilitate healthier lifestyles and social interaction, the Planning Board may approve incentive

826 density of up to 30% to a project that provides affordable housing or a public facility, as described below, or at

827 least two of the other following public benefits:

- 828 a) Affordable Housing:

829 All residential development must comply with the requirements of Chapters 25A and 25B for the provision

830 of Moderately Priced Dwelling Units (MPDUs) and Workforce Housing Units (WFHUs).

831 1) MPDU Incentive Density: Provision of MPDUs above the minimum required is calculated by Method  
 832 1 and the required number of MPDUs is calculated on the total number of dwelling units as required  
 833 by Chapter 25A and the percent of incentive density increase is based on the proposed FAR for the  
 834 entire project.

835 *Example: Provision of 14.5% MPDUs is awarded an incentive density of 20% (see 25-A-5(c)(3)). In*  
 836 *the case of a CR 4.5 zone that proposes 4.5 FAR, that equals 0.20 x 4.0 (the incentive density), which*  
 837 *is 0.8 FAR.*

838 2) WFHU Incentive Density: Provision of required or additional WFHUs is calculated by method 1 at the  
 839 following rate: 2 times the percentage of units provided as WFHUs.

840 Example: Provision of 5% WFHUs is awarded incentive density of 10%, provision of 12% WFHUs is  
 841 awarded incentive density of 24%.

842 b) Adaptive Buildings: Provision of buildings with minimum floor-to-floor heights of at least 15 feet on any  
 843 floor that meets grade and 12 feet on all other floors. Internal structural systems must be able to  
 844 accommodate various types of use with only minor modifications. Method 1.

845 c) Care Centers: Child or adult day care facilities. Method 2.

846 d) Small Business Retention: Provision of on-site space for small, neighborhood-oriented businesses. Method  
 847 1.

848 e) Dwelling Unit Mix: Provision of at least 7.5% efficiency units, 8% 1-bedroom units, 8% 2-bedroom units,  
 849 and 5% 3-bedroom units. Method 1.

850 **59-C-15.86. Incentives for Quality Building and Site Design.**

851 High quality design is especially important in urban, integrated-use settings to ensure that buildings and uses are  
852 compatible with each other and adjacent communities and to provide a harmonious pattern of development. Due to  
853 the increased density of these settings, buildings tend to have high visibility. High quality design may help to  
854 attract residents and businesses to locate in these settings. Location, height, massing, façade treatments, and  
855 ornamentation of buildings affect sense of place, orientation, and the perception of comfort and convenience. The  
856 quality of the built environment affects light, shadow, wind, and noise, as well as the functional and economic  
857 value of property. In order to promote high quality design, the Planning Board may approve incentive density of  
858 up to 30% to a project that provides at least two of the following public benefits:

- 859 a) Reduced Floor Plate: Provision of buildings in which floor areas above 120 feet that do not exceed 10,000  
860 square feet for residential uses or 19,000 square feet for non-residential uses. The reduced floor plate must  
861 contain a minimum of 60% glass on all exterior walls facing a street or public open space. Method 1.
- 862 b) Historic Resource Protection: Preservation and/or enhancement of an historic resource indicated on the  
863 Master Plan for Historic Preservation in conformance with a plan approved by the Historic Preservation  
864 Commission. A fee-in-lieu for a specific preservation project may be paid to the Historic Preservation  
865 Division as specified in the Guidelines for Public Benefits. Method 1.
- 866 c) Structured Parking: Parking provided within a structure or below-grade. Method 1.
- 867 d) Tower Setback: Setback of building by a minimum of 6 feet beyond the first floor façade at a maximum  
868 height of 72 feet. Method 1.

- 869 e) Public Art: Provision of public art must be reviewed for comment by the Public Arts Trust Steering  
 870 Committee. A fee-in-lieu may be paid to the Trust as specified in the Guidelines for Public Benefits.  
 871 Method 1.
- 872 f) Public Open Space: Provision of open space in addition the the minimum required by the zone. Public open  
 873 space must be easily accessible to the public during business hours and/or at least from sunrise to sunset and  
 874 must contain amenities such as seating, plantings, trash receptacles, kiosks, and water features. Method 1.
- 875 g) Streetscape: Construction of off-site streetscape in addition the requirements of this division. Method 1.
- 876 h) Exceptional Design: Building design that provides innovative solutions in response to the immediate  
 877 context; creates a sense of place and serves as a landmark; enhances the public realm in a distinct and  
 878 original manner; introduces new materials, forms, or building methods; uses design solutions to make  
 879 compact infill development living, working, and shopping environments more pleasurable and desirable; and  
 880 integrates low-impact development methods into the overall design of the site and building. Method 1.
- 881 **59-C-15.87. Incentives for Protection and Enhancement of the Natural Environment.**
- 882 In order to combat sprawl and mitigate or reverse environmental problems such as lack of groundwater recharge,  
 883 inadequate carbon-sequestration, and pollution caused by reliance on the automobile, the Planning Board may  
 884 approve incentive density of up to 50% for certain projects that purchase building lot terminations, as described  
 885 below, or up to 30% to a project that provides a LEED Platinum, or County-approved equivalent, building, as  
 886 described below, or at least two of the other following public benefits:

- 887 a) Building Lot Termination (BLT): The Planning Board may approve incentive density for the purchase of  
 888 Building Lot Termination easements or for payment to the Agricultural Land Preservation Fund in an  
 889 amount set regularly by Executive Regulation under Chapter 2B, subject to the following conditions:  
 890 1) BLT easement purchases or payments must be whole units;  
 891 2) Each BLT easement purchase or payment allows 20,000 gross square feet of incentive density; and  
 892 3) The Planning Board may grant up to 20% of total incentive density for sites greater than ½ acre and up  
 893 to 50% of the total incentive density for sites ½ acre or smaller.
- 894 b) LEED, or County-Approved Equivalent: The incentive density for a building or project that achieves a  
 895 LEED rating, or an equivalent rating approved under Chapter 8, Article VII, is calculated by method 1 for  
 896 LEED for new construction and LEED ND and method 2 for LEED for existing buildings according to the  
 897 following:  
 898 1) 10% for LEED Silver;  
 899 2) 20% for LEED Gold; and  
 900 3) 30% for LEED Platinum.
- 901 c) Groundwater Recharge: Bio-retention and stormwater recharge facilities beyond existing County  
 902 requirements on-site or within ¼ mile of the site must provide a minimum of 25% recharge of projected  
 903 stormwater outfall for a 10-year event. Method 1.
- 904 d) Lighting: Provision of lighting that complies with the standards established by the International Dark Sky  
 905 Association, or county-approved equivalent. Method 1.

- 906 e) Energy Conservation and Generation: Provision of energy-efficiency that exceeds standards for the building  
 907 type by 17.5% for new buildings or 10% for existing buildings, or provision of renewable energy generation  
 908 facilities on-site or within ½ mile of the site for a minimum of 2.5% of the projected energy requirement.  
 909 Method 1.
- 910 f) Green Wall: Installation and maintenance of a vegetated wall that covers at least 30% of any blank wall or  
 911 parking garage façade visible from a public street or open space. Method 1.
- 912 g) Rainwater Reuse: Collection and reuse of at least 25% of rainwater from a 10-year event on site. Method 1.
- 913 h) Tree Canopy: Coverage at 15 years of growth of at least 25% of the on-site open space. Method 1.
- 914 i) Vegetated Area: Installation of plantings in a minimum of 12 inches of soil covering at least 5,000 square  
 915 feet of previously impervious surfaces. This does not include vegetated roofs. Method 1.
- 916 j) Vegetated Roof: Provision of a vegetated roof with a soil depth of at least 4 inches covering at least 33% of a  
 917 building’s roof, excluding space for mechanical equipment. Method 1.

918 **59-C-15.9. Existing Approvals.**

- 919 a) One or more~~[[A]]~~ lawfully existing buildings~~s~~ or structures~~s~~ and the uses therein, which predate~~[[s]]~~ the  
 920 applicable sectional map amendment, are~~[[is-a]]~~ conforming structures~~s~~ or uses, and may be continued,  
 921 renovated, repaired, or reconstructed to the same size and configuration, or enlarged up to a total of 10  
 922 percent above the total existing floor areas of all buildings and structures on site or 30,000 square feet,  
 923 whichever is less, and does not require a site plan. Enlargements in excess of the limitations in this  
 924 subsection will require~~[[A larger addition requires]]~~ compliance with the full provisions of this Division.

925 b) A project that received an approved development plan under Division 59-D-1 or schematic development  
 926 plan under Division 59-H-2 before the enactment of the CR zones may proceed under the binding elements  
 927 of the development plan and will thereafter be treated as a lawfully existing building and may be renovated  
 928 or reconstructed under Subsection (a) above. Such **development plans or schematic development**  
 929 **plans[[projects]]** may be amended as allowed under Division 59-D-1 or 59-H-2[[;]] under the provisions of  
 930 the previous zone; however, any **incremental** increase in the total floor area[[or building height]] beyond that  
 931 allowed by Subsection (a) above **or any incremental increase in building height beyond 15 feet** requires, **with**  
 932 **respect to the incremental increase only, full compliance with the[[full]]** provisions of this Division.

933 **c) At the option of the owner, any portion of a project subject to an approved development plan or schematic**  
 934 **development plan described in Subsection (b) above may be developed pursuant to the provisions of this**  
 935 **Division. The remainder of that project continues to be subject to the approved development plan or**  
 936 **schematic development plan, pursuant to Subsections (a) and (b) above.**

937 **d)** A project which has had a preliminary or site plan approved before the applicable sectional map amendment  
 938 may be built or altered at any time, subject to either the full provisions of the previous zone or this division,  
 939 at the option of the owner. If built under the previous approval, it will be treated as a lawfully existing  
 940 building and may be renovated or reconstructed under Subsection (a) above.

941

942 **Sec. 2. Effective date.** This ordinance becomes effective 20 days after the date of Council adoption.
