Appendices of Events for Properties Required to Comply With Forest Conservation Plans, Exemptions from Submitting Forest Conservation Plans, and Tree Save Plans

**Due to the limited number of pages that can be printed on this document, some content may be omitted. For complete details, please refer to the original source.**

**Appendix A: Forest Conservation Plan Requirements**

1. **Special Tree Protection Devices**
   - Chain link fence (four feet high)
   - 14 gauge 2 inch x 4 inch welded wire fencing supported by steel T-bar posts

2. **Fertilization**
   - Removal, and possible replacement, of dead, dying, or hazardous trees

3. **Soil Aeration**
   - Any stress reduction measures. Documentation of the process (including photographs)

4. **Watering**
   - Any stress reduction measures. Documentation of the process (including photographs)

5. **Crown Reduction or Pruning**
   - Any stress reduction measures. Documentation of the process (including photographs)

6. **Temporary Fencing**
   - Requires a temporary fence to be installed and maintained for the duration of the construction process.

7. **Temporary Shoring**
   - Requires temporary shoring to be installed and maintained for the duration of the construction process.

8. **Temporary Soil Erosion Control Measures**
   - Requires temporary soil erosion control measures to be installed and maintained for the duration of the construction process.

9. **Tree Protection Fencing**
   - Fencing must be installed and maintained by the property owner for the duration of the construction process.

10. **Tree Protection Signs**
    - Signs must be installed at the property owner's expense for the duration of the construction process.

11. **Final Soil Erosion Control Measures**
    - Final soil erosion control measures must be installed and maintained for the duration of the construction process.

---

**Appendix B: Forest Conservation Plan Submission Requirements**

1. **Pre-Construction Meeting**
   - The property owner must arrange for the meeting and the following people must participate at the meeting: the property owner, their representative, the construction superintendent, the International Society of Arboriculture (ISA) certified arborist, and the Maryland Licensed Tree expert.

2. **Construction Period**
   - Periodic inspections will be made by the Forest Conservation Inspector. Corrections and modifications may be required by the Inspector.

3. **Final Inspection**
   - The property owner must immediately notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix C: Forest Conservation Plan Approval Requirements**

1. **Approval by the Forest Conservation Inspector**
   - The Forest Conservation Inspector must approve the Forest Conservation Plan before construction begins.

2. **Notification of Construction Impacts**
   - The property owner must notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix D: Long-term Protection Measures**

1. **Permanent Signs**
   - Permanent signs must be installed and maintained for the duration of the construction process.

2. **Tree Protection Fencing**
   - Fencing must be installed and maintained by the property owner for the duration of the construction process.

---

**Appendix E: Other Requirements**

1. **Temporary Fencing**
   - Requires temporary fencing to be installed and maintained for the duration of the construction process.

2. **Temporary Shoring**
   - Requires temporary shoring to be installed and maintained for the duration of the construction process.

3. **Temporary Soil Erosion Control Measures**
   - Requires temporary soil erosion control measures to be installed and maintained for the duration of the construction process.

---

**Appendix F: Plan Approval Requirements**

1. **Pre-Construction Meeting**
   - The property owner must arrange for the meeting and the following people must participate at the meeting: the property owner, their representative, the construction superintendent, the International Society of Arboriculture (ISA) certified arborist, and the Maryland Licensed Tree expert.

2. **Construction Period**
   - Periodic inspections will be made by the Forest Conservation Inspector. Corrections and modifications may be required by the Inspector.

3. **Final Inspection**
   - The property owner must immediately notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix G: Final Approval Requirements**

1. **Approval by the Forest Conservation Inspector**
   - The Forest Conservation Inspector must approve the Forest Conservation Plan before construction begins.

2. **Notification of Construction Impacts**
   - The property owner must notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix H: Long-term Protection Measures**

1. **Permanent Signs**
   - Permanent signs must be installed and maintained for the duration of the construction process.

2. **Tree Protection Fencing**
   - Fencing must be installed and maintained by the property owner for the duration of the construction process.

---

**Appendix I: Other Requirements**

1. **Temporary Fencing**
   - Requires temporary fencing to be installed and maintained for the duration of the construction process.

2. **Temporary Shoring**
   - Requires temporary shoring to be installed and maintained for the duration of the construction process.

3. **Temporary Soil Erosion Control Measures**
   - Requires temporary soil erosion control measures to be installed and maintained for the duration of the construction process.

---

**Appendix J: Plan Approval Requirements**

1. **Pre-Construction Meeting**
   - The property owner must arrange for the meeting and the following people must participate at the meeting: the property owner, their representative, the construction superintendent, the International Society of Arboriculture (ISA) certified arborist, and the Maryland Licensed Tree expert.

2. **Construction Period**
   - Periodic inspections will be made by the Forest Conservation Inspector. Corrections and modifications may be required by the Inspector.

3. **Final Inspection**
   - The property owner must immediately notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix K: Final Approval Requirements**

1. **Approval by the Forest Conservation Inspector**
   - The Forest Conservation Inspector must approve the Forest Conservation Plan before construction begins.

2. **Notification of Construction Impacts**
   - The property owner must notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix L: Long-term Protection Measures**

1. **Permanent Signs**
   - Permanent signs must be installed and maintained for the duration of the construction process.

2. **Tree Protection Fencing**
   - Fencing must be installed and maintained by the property owner for the duration of the construction process.

---

**Appendix M: Other Requirements**

1. **Temporary Fencing**
   - Requires temporary fencing to be installed and maintained for the duration of the construction process.

2. **Temporary Shoring**
   - Requires temporary shoring to be installed and maintained for the duration of the construction process.

3. **Temporary Soil Erosion Control Measures**
   - Requires temporary soil erosion control measures to be installed and maintained for the duration of the construction process.

---

**Appendix N: Plan Approval Requirements**

1. **Pre-Construction Meeting**
   - The property owner must arrange for the meeting and the following people must participate at the meeting: the property owner, their representative, the construction superintendent, the International Society of Arboriculture (ISA) certified arborist, and the Maryland Licensed Tree expert.

2. **Construction Period**
   - Periodic inspections will be made by the Forest Conservation Inspector. Corrections and modifications may be required by the Inspector.

3. **Final Inspection**
   - The property owner must immediately notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix O: Final Approval Requirements**

1. **Approval by the Forest Conservation Inspector**
   - The Forest Conservation Inspector must approve the Forest Conservation Plan before construction begins.

2. **Notification of Construction Impacts**
   - The property owner must notify the Forest Conservation Inspector of any construction impacts.

---

**Appendix P: Long-term Protection Measures**

1. **Permanent Signs**
   - Permanent signs must be installed and maintained for the duration of the construction process.

2. **Tree Protection Fencing**
   - Fencing must be installed and maintained by the property owner for the duration of the construction process.

---

**Appendix Q: Other Requirements**

1. **Temporary Fencing**
   - Requires temporary fencing to be installed and maintained for the duration of the construction process.

2. **Temporary Shoring**
   - Requires temporary shoring to be installed and maintained for the duration of the construction process.

3. **Temporary Soil Erosion Control Measures**
   - Requires temporary soil erosion control measures to be installed and maintained for the duration of the construction process.
