

# ANNUAL BUSINESS RECYCLING AND WASTE REDUCTION REPORT

Refer to the *Montgomery County Business Recycling Regulation Handbook* for guidance on recycling and completing this Report.

Send completed Report to: Division of Solid Waste Services, Attn: SORRT, 101 Monroe Street, 6th Floor, Rockville, MD 20850

## Business filing this Annual Report, provide:

Business Name: Maryland–National Capital Park & Planning Commission – Montgomery County

Mailing Address: 9500 Brunett Avenue, Silver Spring, Maryland 20901

Phone Number: 301-670-8009

Contact Person Name and Title: John Nissel, Deputy Director Operations & Amanda Aparicio, Sustainability Coordinator

Contact Person Email: John.Nissel@montgomeryparks.org

Business Website: http://www.MontgomeryParks.org

## What is your relationship to the business(es) for whom this Annual Report is being filed?

(Check the box that corresponds to appropriate description.)

☐ I'm filing for my business at the above address only.

☐ I'm a **Property Manager** filing for one or more tenant(s) leasing property at a single site.

*If address of the building occupied by your tenant(s) is different from the address provided above, provide address of building occupied by your tenant(s) covered by this Report: \_\_\_\_\_*

☒ Business **Headquarters** filing for multiple business locations in the County.

*Provide the address of each location that is covered under this report.*

☐ I'm a **Collector** filing for my customer. (NOTE: One Annual Report per customer)

*Provide the business name, address, contact name and phone number of the customer whom this report covers.*

☐ Other. Explain relationship: \_\_\_\_\_

## LIST BUSINESS(ES) COVERED BY THIS ANNUAL REPORT, IF APPLICABLE.

BUSINESS NAME & ON-SITE CONTACT PERSON	PHONE NUMBER and ADDRESS	EMPLOYEE NUMBER	SQUARE FEET
<u>See Attached Summary</u>	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

(Attach a separate page for additional business(es).)

If Government Agency, check applicable: County ☒ State ☐ Federal ☐ Other \_\_\_\_\_

Total number of employees covered by this Report: 800 (Employee means person working 20 or more hours per week for more than 6 months in a calendar year.)

Total square feet of building space covered by this Report: 1,232,614 Square Feet

Total acreage of green area (landscaped and grassy area) covered by this Report, if applicable: 36,991 Acres

## **Annual Business Recycling Report 2019**

### **M-NCPPC, Montgomery County**

**Describe the process in waste reduction and reuse efforts that have been undertaken by your business in an effort to reduce the amount of refuse generated.**

With the instability of many recycling markets globally and the saturation of domestic markets nationwide, waste reduction has become an even more vital component of our solid waste and recycling program at M-NCPPC in Montgomery County. A primary driver of the program at M-NCPPC, Montgomery County includes well-labeled, conveniently located and co-located trash and recycling containers to help staff make appropriate decisions about material disposal.

As part of the culture of the organization, attempts are made to reduce use of paper in office settings. This includes increased use of digital files, digital signatures to reduce hard-copy paper routing, double-sided printing etc. The Department makes use of ePlans, a digital plan review and comment software which reduces the amount of printing required for review of large-file plan sheet documents.

Shared storage areas for office supplies and the ability to share/reuse durable supplies (e.g. binders/folders etc.) is common practice at staffed sites. The Department communicates widely over email when larger reusable, durable equipment or furniture is available to be repurposed at other M-NCPPC sites. Additionally, a number of our office sites maintain reusable plates, flatware, and drinkware for use by staff in place of single-use materials.

Waste reduction involves being thoughtful about material acquisition and material management but also includes going the extra mile to divert materials from the trash when it can be recycled through less convenient or less traditional channels.

Since 2018, through a partnership with the Maryland Department of Agriculture and the Montgomery County Department of Environmental Protection, a M-NCPPC, Montgomery Parks site now serves as the Montgomery County collection site for #2 HDPE pesticide/fertilizer containers used by businesses, organizations and citizens. Since these containers are not allowed to be disposed of through commingled recycling, this program helps to divert these materials from the trash and finds new and acceptable uses for the plastic. Through joint awareness campaigns between program partners, this program is increasing in popularity and use.

**Describe your efforts to educate tenants (if report is filed by a property manager) or employees about the recycling program in place. Examples include, but are not limited to: newsletters, email reminders, training workshops etc.**

Recycling training (powerpoint and hands-on display workshop) has been provided to nearly all staff in the M-NCPPC, Department of Parks within the last 2 years. Additionally, Recycling Captains have been identified at each staffed site. These staff are trained to assist in ensuring that recycling bins are co-located with trash bins, are located conveniently at the work site, and that clear messaging is provided to help users make appropriate waste disposal decisions.

In addition to the Recycling Captains, the Sustainability Coordinator for the Department makes themselves readily available and encourages staff to ask questions about recycling and waste disposal. Staff regularly reach out for guidance on these topics through phone, email and in-person communication. Having in-house staff that can serve as resources for others has proven to be very effective in communicating about disposal of a variety of materials.

The Recycling Truck Operator for the Department completes a report each time he visits a site to collect recyclables. This report includes compliance and contamination information as well as an estimated volume collected. This information makes it back to the Sustainability Coordinator who then follows up with the manager of any site where issues were identified. This communication helps to address and correct specific issues in a timely manner and allows staff to feel supported in making improvements at their site.

Staff at some M-NCPPC sites have taken the opportunity to improve reuse, reduce waste, and enhance recycling quality by identifying common-use materials and creating hands-on educational outreach for staff regarding reuse or disposal. For example, at Brookside Gardens, plastic growing pots are commonly used for growing plants in the gardens. While some of these containers can be reused multiple times before disposal, others may or may not be recyclable. Staff have created a board where plastic pots are stored to help educate and remind staff of the different routes for reuse or disposal that are expected (see below image).

*Brookside Gardens plastic growing pot educational display*

Special engagement activities are also provided for staff to encourage increased thought about waste reduction, reuse, and recycling. A popular activity takes place the week leading up to America Recycles Day in November of each year called (reusable) MUG SHOTS. Staff are encouraged to take a picture of themselves with their favorite reusable beverage container, also known as their MUG SHOT, and submit it into a raffle. The 2019 participant photos are shown below.

*2019 collage of staff and their favorite reusable mug/beverage container*

## **M-NCPPC Planned Program for 2020**

The M-NCPPC Montgomery County Sustainability Plan was updated for FY20/FY21. Details of sustainability initiatives can be found in this plan. In addition, strategies planned for the 2020 calendar year for improvement to the M-NCPPC solid waste and recycling program include:

1. Implement projects and programs to encourage reuse, reduction in waste, and improved recycling by both M-NCPPC employees and park patrons.
2. Develop and implement a visual waste assessment protocol/survey to begin assessing the current waste stream and to ensure recyclables are being properly diverted from trash. Dependent on the outcome, develop additional training and outreach for M-NCPPC employees.
3. Continue support of Recycling Captains as site leaders for ensuring program consistency across staffed facilities.
4. Develop (in process) and implement improved signage decals for trash and recycling containers out in the parks that are primarily used by park patrons.
5. Continue analysis of and move forward, if feasible, on implementation of the use of trash/recycling container volume sensors. This technology has the potential to improve allocation of resources, reduce fuel consumption, reduce greenhouse gas emission and provide an improved customer experience through more targeted trash/recycling container maintenance.
6. Continue offering opportunities for reuse of durable equipment, furniture etc. to staff for reuse/repurposing at other M-NCPPC facilities.

## M-NCPPC Montgomery County Infrastructure

### MONTGOMERY PARKS, M-NCPPC

Parks Information Line: 301-495-2595

[www.MontgomeryParks.org](http://www.MontgomeryParks.org)

#### OUR MISSION

Protect and interpret our valuable natural and cultural resources; balance the demand for recreation with the need for conservation; offer a variety of enjoyable recreational activities that encourage healthy lifestyles; and provide clean, safe, and accessible places for leisure-time activities.

#### PARK SYSTEM HIGHLIGHTS

Total number of parks: 422

Stream Length: 490 miles

Total owned or managed acres of parkland: 36,991

Total Park Boundary: 941.39 miles

#### TYPES OF PARKS
