Description

Ashton Village Center Sector Plan briefing on the progress of the Sector Plan to the Planning Board with Preliminary Recommendations for land use, zoning, design, environment and open spaces, and transportation.

Staff Recommendation

Planning Board discussion and guidance to Staff on the Ashton Village Center Sector Plan preliminary recommendations.

Summary

Planning Staff will update the Planning Board on the Ashton Village Center Sector Plan, including community outreach efforts and proposed next steps, in addition to the preliminary recommendations of plan elements.
Introduction

In accordance with the work program established by the Montgomery County Council, the Planning Department initiated the Ashton Village Center Sector Plan in April 2019 focusing on the village center of the Ashton Community.

The master plan’s scope of work was approved by the Montgomery County Planning Board in May 2019. It describes the proposed boundaries, purpose, outreach strategy, and schedule. The scope of work also provides background, context, and a summary of the issues to be addressed.

This staff report provides a briefing to the Planning Board on work done to date on the Sector Plan, and presents preliminary recommendations, which include:

- changing the zoning of the commercial properties to a zone more consistent with the rural character of the community and consistent with the existing Overlay Zone,
- emphasizing the completion of missing bicycle and pedestrian transportation networks,
- creating meaningful community open space, and
- recommending architectural treatments consistent with a rural village.

The goal is to create a lively, walkable, attractive and inviting village center to serve the suburban and rural communities surrounding the center.

Purpose of the Plan

The main purpose of this Sector Plan is to provide recommendations to promote the creation of a village center for the Ashton community while protecting the rural character of the greater Ashton area. The plan focuses on zoning that is appropriate in density and use for a rural village, and design recommendations to ensure new development harmoniously blends in with
the existing development. The intent is to implement zoning and design tools that allow for the removal of the Sandy Spring-Ashton Rural Village Overlay Zone. This sector plan also seeks to implement the County’s Vision Zero goals by keeping the roadways right-sized for a village, and to improve upon the available bicycle and pedestrian infrastructure.

**Planning Framework**

The Ashton Village Center Sector Plan is a small part of the greater Sandy Spring-Ashton community. The plan mainly focuses on the properties on the four corners of the intersection of MD 650 (New Hampshire Ave) and MD 108 (Ashton Road / Olney Sandy Spring Road), as well as the properties just west of the intersection around Sherwood High School. The total plan area is approximately 126 acres and is a sub-set of the much larger 1998 *Sandy Spring/Ashton Master Plan*, which covered approximately 5,989 acres around the Sector Plan boundary.

![Figure 2. Location of the Sector Plan within the larger Sandy Spring/Ashton area.](image)

The *General Plan* for Montgomery County, *On Wedges and Corridors*, was adopted by the MNCPPC in 1964. Its purpose is to help establish overall policies for development and to relate these policies to the metropolitan framework. The *General Plan* envisioned development radiating outward from Washington, DC in a series of cities along major transportation corridors, with wedges of lower density and green open space in between them. Each corridor
city was to be relatively self-sufficient, with employment, a range of housing choices, and supportive community services. Ashton lies at the boundary of the residential and agricultural wedges shown in the 1993 General Plan Refinement.

Forty years ago, the 1980 Sandy Spring/Ashton Special Study Plan set the framework for the land use pattern on the ground today. The Special Study Plan recommended the large-lot residential development along MD 108 and MD 650 as a way of creating a rural entry to the two villages and promoted small concentrations of commercial and medium-density residential development within the village centers. Specifically, townhouses and detached houses on 6,000 square foot lots were mentioned to increase housing choices. The 1980 Plan also nominated many historic sites within the study area, although the historic resources are more concentrated in Sandy Spring than in Ashton.

The 1998 Sandy Spring/Ashton Master Plan reinforced the idea of distinct rural village centers and recognized that Ashton was a distinct center with a separate identity. The 1998 Plan encouraged development and revitalization of the village centers and saw the creation of the Sandy Spring/Ashton Rural Village Overlay Zone to allow flexibility for development to occur while offering protections in uses, height, and design review. Since 1998, at least a dozen of the older buildings in the Ashton Village Center that contributed to the character of Ashton have been removed, with many replaced by newer, larger homes that arguably did not retain the same architectural elements as before.

Community Engagement

Community engagement is a key component of this Sector Plan. A variety of methods and techniques were used to create an environment that supported public participation. People and organizations were identified that had an interest in an Ashton Village Center. These stakeholders included local residents, homeowners associations, and business owners who were invited to participate, share ideas, and provide feedback. The plan-visioning and draft preparations to date are shaped by the outreach and engagement we’ve had with the community. Outreach efforts include:

- The Community Kick-off meeting on May 16, 2019
- The Board’s approval of the Scope of Work on May 23, 2019
- Participation in the Strawberry Festival on June 1 and 2, 2019
- Reoccurring office hours at the Sandy Spring Museum during the summer and fall of 2019
- Bus tour of Alexandria with the community on October 1, 2019
- Community walk audit on October 15, 2019
- Two-day design workshop on October 15 and 16, 2019
- Post design workshop summary meeting on October 24, 2019
• A community briefing on early recommendations on January 29, 2020
• Postcards mailed to all properties within ~1 mile of the village center in the 1st week of March 2020

Staff’s focus with the community has centered around the need to create a true “center” in Ashton by adding additional retail and housing opportunities, through appropriate zoning, near the intersection of MD 108 and MD 650. Emphasis has also been placed on creating the right set of design recommendations to ensure the scale of development is compatible with a rural village. The concept of Missing Middle and Attainable Housing has been promoted by Staff to create the housing types that are missing from the Sandy Spring/Ashton area today. The need to establish gathering spaces accessible to the public has also been at the forefront, trying to balance the need to make the gathering spaces feel open and accessible without making them unsafe or unusable along the two major highways that intersect at the heart of the village.

Figure 3. Community members, Planning Staff, and other agency personnel during the walk audit in October 2019.
Correspondence

As a direct result of our engagement and outreach efforts over the past 11 months, Staff has received ample feedback through all stages of the plan development. Much of the feedback from the early kick-off meeting and the design workshop in October focused around the desire to keep the village modest and compatible with the existing suburban and rural development including strict controls on height, density, and design elements. The residents also identified a need for a gathering space accessible to everyone. There was also concern for the lack of pedestrian connectivity and pedestrian safety along the two major highways, including the dozens of Sherwood High School kids that walk to the existing Ashton Village Center shopping center after school.

At the Community Briefing on January 29, 2020, Staff heard a lot of concern from those in attendance that while our focus on design was appreciated, the density and lack of well-integrated green spaces shown in our proposals was out of character for the rural village setting of Ashton. Subsequently, Staff has received over 40 email messages and mail from the community (Attachment A). The majority have continued to raise concerns about the suggested density and massing being out of character; that traffic is unmitigated and intersections are failing; and that they lack a community gathering space. A minority of received emails have voiced support for the options Staff presented in January, including moderate housing densities, as long as the design and architecture is kept appropriate for a village center. Both groups share a common interest in creating a viable village center that provides an opportunity for residents to connect.

Equity

In late 2019, the Montgomery County Council passed the Racial Equity and Social Justice Act, with Bill 27-19, which requires the Planning Board to consider racial equity and social justice impact when preparing a master plan. The act took effect on March 2, 2020, almost one year after the Ashton Village Center Sector Plan scope of work was first adopted. While the full requirements of the Bill are not required for this sector plan update, Staff has been working to ensure the process and recommendations are still looked at through an equity lens.

In addition to all of the outreach efforts undertaken over the past year, Staff, in an attempt to reach less civically engaged citizens, mailed a post card to all residents and property owners within 1 mile of the sector plan boundary notifying them that a plan was underway and that we’d still love to hear from them. We have been working to keep our Sector Plan website up to date and are thinking of ways to keep engagement going even during these times of social distancing. Many recommendations in this Sector Plan also have an eye toward equity, including ensuring complete infrastructure for non-auto transportation modes, new accessible community open and gathering spaces, and zoning that will allow for new housing
opportunities that are more attainable for younger families or people with less means than the median in Ashton.

**Preliminary Recommendations**

Staff presented and discussed very early recommendations with the community at the briefing on January 29, 2020 held at the volunteer fire station in Sandy Spring. Topics discussed included proposed zoning, density, open spaces, and design recommendations. Staff has worked since then to further refine the density and zoning recommendations and to come up with options for open space integration. Staff has also initiated reviews in transportation and the environment. The following are the preliminary recommendations Staff is making broken down by subject, including a description of any analysis that remains outstanding.

**Historic Resources**

Within the Sector Plan boundary, there is only one existing historic resource, the Cloverly Property, which is located across MD 108 from Sherwood High School, near the Sandy Spring Museum. Many of the older, non-historic buildings in Ashton have been torn down over the years leaving few additional cultural resources to protect, though there are a few that remain eligible for the National Register of Historic Places. The greater Sandy Spring/Ashton area also has a deep Quaker heritage and his home to historic African American communities. Staff recommends enhancing and expanding upon existing auto-focused wayfinding with more pedestrian and bicycle scale signage that ties the village center to the greater community area highlighting the cultural resources, and also supporting the 2002 *Montgomery County Heritage Area Management Plan*, highlighting the “Crossroads & Cultures” thematic area.

**Environment**

Approximately 75% of the Sector Plan area is located either in the direct Lower Patuxent River watershed, or in the Hawlings River watershed, which also drains to the Patuxent. These areas are all part of the Patuxent Primary Management Area (PMA), which was developed as a result of the *Patuxent River Policy Plan* from 1984. The PMA guidelines place recommendations on development intensities and imperviousness levels within land under development that is within a certain distance from water bodies, specifically within 1,320 feet of the mainstem of the Patuxent River and within 660 feet of any of its tributaries. However, the imperviousness protection measures only apply to land zoned RE-2 and less dense, and therefore only applies to the RC zoned properties in the northwestern portions of this Sector Plan area. The zoning in the center of the Ashton Village Center area is of a density for which the general environmental guidelines apply but not the strict impervious caps of the PMA. The RC zoning is recommended to remain where it exists now to continue protecting the Hawlings River watershed, a tributary to the Patuxent River.
Staff Briefing and Preliminary Recommendations
Ashton Village Center Sector Plan
04/09/2020

Staff is also considering making recommendations in the Sector Plan to increase shade coverage, including tree canopy and other means of providing shade, such as awnings and building orientation. Many of the commercial properties in the Sector Plan area have limited existing shade and tree cover and opportunities exist in rights-of-way and on private property to increase shade coverage through programs such as Shades of Green and funding from the State Highway Administration.

Additionally, the carbon footprint analysis will be conducted for the Sector Plan once clearer direction is provided for the recommended zoning and land uses within the village center. Because major changes are unlikely to occur to overall allowed density and this Sector Plan strives to increase pedestrian and bicycle activity, the carbon footprint should not show any substantial increase.

Recreation and Open Spaces

Within the Sector Plan area there are no existing publicly owned parks, and the amount of publicly accessible privately-owned open space is minimal. Current open space includes a seating area at the corner of MD 650 and MD 108 in front of the CVS and a small green space with trees in front of the Sandy Spring Bank. There is also a small number of green spaces within existing residential developments.

One of the major concerns Staff heard from the community was the lack of a public green or gathering space. In coordination with Staff from Parks, we are not recommending the creation of a public park but have identified opportunities for additional privately-owned public spaces. Although Ashton was does not fall within the study area of Parks’ Energized Public Spaces Design Guidelines, Parks Staff believes that many of the recommendations contained in the guidelines would be useful for designing their development of such spaces in Ashton.

Parks Staff recommends two types of open space in the plan area: a civic green and a neighborhood green. Civic greens are typically ½ to 1 ½ acres. Neighborhood greens are smaller but at least ¼ acre.

Planning Staff has identified two areas that could possibly accommodate new greens. One is the area around the large stormwater management facility in the northwest area of the Ashton Village townhouse community. Between the two cul-de-sacs is an existing community playground, but nearly two acres of underutilized land exists in and around the stormwater pond. While it is unlikely this townhouse community will redevelop during the life of this Sector Plan, there may be future public-private opportunities for the stormwater facility to be upgraded to meet new standards, which could make this space more accessible and usable.

The other major opportunity for a public green exists with any potential development of the properties on the southeast quadrant of the main intersection where the Sandy Spring Bank now sits. The easternmost portion of this collection of properties is in an identified stream
valley buffer and would be protected through the Forest Conservation law. However, the C/R zones require that an additional 10% of the site be set aside as either common or public open space (dependent on building type). A green should be located adjacent to the stream valley buffer to provide access to this green amenity and to make the space feel larger and more accessible to the greater public. Any green space in this area should also directly access a public or private road to provide access to the larger Ashton community.

A more linear neighborhood green could stretch through the southeastern corner properties to connect the civic green to New Hampshire Ave furthering the connection to the greater community. This linear green could also serve as an outdoor area to gather that is adjacent to any commercial uses. Finally, a small open space area should be designated adjacent to the intersection of New Hampshire Avenue and MD 108 to preserve the large shade trees that already exist at the southeast corner.

In addition to providing new publicly accessible open space in the Ashton Village Center area, this Sector Plan supports the previous efforts of the 1998 Sandy Spring/Ashton Master Plan that called for creating links from the public sidewalks along the state highways to reach the Northwest Branch Stream Valley Park and the Underground Railroad Experience Trail, both of
which are located just south of Sherwood High School. The 1998 Plan identified the high school property as a potential way to link people from the sidewalk network into the park system and this Sector Plan will reiterate support for this link. This trail should only be designed to accommodate pedestrians/hiking because the Underground Railroad Experience Trail does not allow bicycling and horseback riding through the school property should not be encouraged unless the school expressly supports the idea.

**Transportation**

Transportation is a major element in this Sector Plan because the Ashton Village is centered at the intersection of two State Highways, MD 650 and MD 108. As early as the 1980 Plan, recommendations were made to minimize the impact of regional highway traffic on the Ashton community. The 1998 Plan emphasized that major routes like New Hampshire Ave (MD 650) should be maintained as a two-lane road except for essential turn lanes, and that MD 108 should also maintain a cross-section with a village character and total pavement widths under 40 feet. The opening of the Inter-County Connector has provided a significantly easier east-west travel route across Montgomery County and has decreased vehicular trips using MD 108 to make that east-west trek.

Since an essential part of maintaining village character is ensuring the transportation network also be at a village scale, Staff recommends this Sector Plan continue with a two lane road policy for both highways, build upon this policy by recommending against any additional pavement widening at the main intersection of MD 650 and MD 108, and limit the length or use of acceleration/deceleration lanes at other locations within the plan boundary. If changes are needed to address capacity issues, the priority should be to look at signal timing and lane movements to determine if efficiencies can be found.

The other priority is to complete the bicycle and pedestrian infrastructure within the village. There is an existing sub-standard sidewalk that runs along the south side of MD 108 connecting Sandy Spring to Ashton; a very short section of sidepath along the west side of MD 650 south of MD 108; a sidewalk on the east side of MD 650 north of MD 108; and a short section of sidepath on the north side of MD 108 east of MD 650. These have been built over the years as frontage improvements were required by different developments. This Sector Plan continues the recommendations of the most recent Bicycle Master Plan in calling for a full, 10-foot-wide minimum sidepath along the west side of MD 650 from the intersection of MD 108 south to beyond the plan boundary. A minimum 10-foot-wide sidepath should also be built on the north side of MD 108 from the intersection of MD 650 west until it connects with existing sidepath in Sandy Spring. These two sections would likely need to be funded though the CIP because redevelopment is unlikely in the short to mid-term. If the available land on the south east corner of the intersection develops, it should implement five-foot wide sidewalks along both of its frontages as well as along any internal roads.
Within the Sector Plan area are two signalized intersections that also both need improvements: MD 650 at MD 108 and the eastern access to Sherwood High School on MD 108. SHA has a project that identified these two intersections as needing improvements and has let Staff know they are moving forward with improvements to MD 108 at MD 650, including new signal poles, better signage and marking, and crosswalks across all four crossings. On the northeast corner of this intersection is an existing utility pole that, in combination with a less than 90-degree intersection, creates a sharp turning radius that is difficult for larger vehicles and trucks to navigate, especially those with trailers. This pole should be moved back enough to allow for safer turning movements without excessively widening the crossing for pedestrians or encouraging unsafe turning movements.

This Sector Plan recognizes the need remains to rebuild the signal at Sherwood High School and encourages this improvement to provide an opportunity for a crosswalk that would lead to the planned sidepath on the north side of MD 108.

Community Design

An integral part of ensuring a vibrant and successful rural village is the design of the buildings and public spaces. Many basic design elements, such as building placement and orientation toward streets and limiting building heights to between 35 and 40 feet, are already proscribed within the recommended CRN zone. The Sector Plan will build upon the zoning requirements with additional design recommendations that encourage highly visible facades to include porches, stoops, dormers, front gables and other traditional residential elements to be included on all buildings regardless of use. Recommendations will also include ways to address building massing and the use of landscaping to keep any new construction consistent with the rural village center character this Sector Plan seeks to achieve.

Staff hasn’t reached a conclusion on the format of the design recommendations, but could take the form of site specific recommendations, as recommendations in a design guideline ‘chapter’, as a separate design guideline document, or as a pattern book of precedent images and examples.

Zoning and Land Uses

One of the major exercises of this Sector Plan is to evaluate the zoning in the plan area to ensure it is appropriate for the rural village center vision for the community. Around the major intersection of MD 650 and MD 108 the existing zoning is a mix of CRT zones with FAR recommendations between 0.75 and 1.25 and the now obsolete PD-5 zone. Farther west, the Ashton Market local map amendment rezoned some of the land along Porter Road TF-10 (townhouse floating zone allowing up to 10 units per acre). The existing residential development along Hidden Garden Lane and the other parts of the southwest corner are in the
R-90 zone, and parts of the southeast corner are zoned R-60 and RC. Finally, the high school and detached houses across from the school are RNC and RC zoned.

This existing zoning pattern establishes a clear village center that tapers down to rural zones that create a green separation between the village centers of Ashton and Sandy Spring. Most of the Sector Plan area is also in the Sandy Spring/Ashton Rural Village Overlay Zone, which has strict limits on the types of commercial uses allowed, allowed building heights of 24-30 feet, and the maximum density of 0.75 FAR that any property can develop. This Sector Plan proposes modest zoning changes to encourage development of a more meaningful village center.

The PD (Planned Development) zone is no longer used in the current zoning ordinance so a replacement zone must be found. The southeastern portion of the PD zoned area (shown in blue above) is the existing Ashton Village Center shopping center. The remainder of the PD-zoned land is developed primarily with townhouses and a few detached homes. Staff has looked at the development densities and recommends the commercial portion of the area be rezoned to CRN 0.5 C-0.5 R-0.25 H-35, and the remainder be zoned TLD. The CRN zone allows
the existing uses and structures to remain with some limited expansion potential, and the TLD zone adequately accounts for the number of existing dwelling units, lot sizes and setbacks.

The zoning on the southwest corner of the main intersection is currently CRT 0.75 C-0.75 R-0.25 H-35, with the exception of the Ashton Baptist Church which is R-90. Likewise, the southeast corner is zoned CRT 0.75 C-0.75 R-0.25 H-35 on the properties closest to the intersection, but a portion of the southeast quadrant is in the R-60 zone and there is a small sliver in the Rural Cluster (RC) zone. The northeast corner, where the CVS is located, has even denser zoning with CRT 1.25 C-0.75 R-0.50 H-35.

The existing CR zoning in Ashton is the CRT zone, however the Sector Plan will recommend this be converted to the CRN zone to limit the allowed uses similar to the protection provided by the current Sandy Spring/Ashton Village Overlay Zone. Staff has analyzed the uses prohibited by the Overlay Zone and finds that the CRN zone already contains similar restrictions on uses (Attachment B). Virtually every use allowed in the CRN zone which is prohibited in the Overlay Zone is a limited or conditional use in the CRN zone. Staff believes the limited and conditional use restrictions are adequate to protect the rural village character this plan seeks to achieve. The only uses permitted outright in the CRN zone that are prohibited in the Overlay Zone are the following retail/service establishments up to 5,000 SF:

- building materials and supplies
- furniture store, carpet, or related furnishing sales or service
- pawnshop

Planning Staff believes the overlay zone could be safely removed from the Sector Plan area without jeopardizing the protections on use the Overlay Zone provides.

Staff has reviewed the impacts of various zoning recommendations that could occur in these four quadrants (Attachment C) and is recommending a uniform density be applied to the entire area of CRN 0.5 C-0.5 R-0.5 H-35 with the exception of the southeast quadrant where the height could go to 40 feet with an additional recommendations that the 40-foot height limit be only allowed for certain new buildings and not consistently across the entire quadrant. This does include rezoning the R-60 and RC properties in the southeast quadrant to the CRN zone described above.

Except for two of the properties along the west side of MD 650 (the Alloway Building and Cricket Bookstore), all the above-mentioned properties are currently developed at under 0.25 FAR of density. The mixed-use portion of the recently approved Ashton Market development would also exceed 0.25 FAR. Without substantial consolidation and wholesale redevelopment, which is not recommended except for possibly the southeast quadrant, limitations from height, setbacks and parking will impede the ability to realize densities anywhere close to 0.75 FAR. The switch from CRT to CRN zoning is recommended because the existing overlay zone limits
Staff Briefing and Preliminary Recommendations
Ashton Village Center Sector Plan
04/09/2020

the types of uses allowed on these properties, and the allowed uses in the CRN zone more closely align with the overlay zone than the CRT does. The conversion from CRT to CRN would also be consistent with the recommendations from the 2015 Sandy Spring Rural Village Plan.

Conclusion
The Ashton Village Center Sector Plan team presented its initial recommendations to the community at the Community Briefing on January 29, 2020 and will continue to further develop the plan’s recommendations with the feedback provided by the Planning Board. In an effort to continue engagement and seek community input while recognizing the challenges provided by the current Covid-19 outbreak, Staff is in the early stages of coming up with some form of a digital community meeting or series of posts or displays that can be viewed and commented upon online.

Staff seeks guidance from the Planning Board on the preliminary recommendations presented in this report in order to incorporate the comments into a master plan working draft. It is anticipated that the master plan working draft will be presented to the Planning Board in July 2020. While Staff welcomes comments on any recommendations or planned actions, Staff wants to ensure the Board provide guidance on the following recommendations:

- Zoning – Appropriate zone and density for properties around the intersection of MD 650/MD 108
- Design recommendations – format and location (i.e. Pattern Book / Design Guidelines / Design Recommendations within or separate the Sector Plan)
- Transportation—Using measures other than widening the pavement at the MD 650/MD 108 intersection if traffic mitigation is necessary
- Equity – Adequate outreach and plan recommendations
- Schedule – Are we on track for a July Working Draft and September Hearing
Schedule

The Ashton Village Center Sector Plan officially began in April 2019, with background analysis, data collection, information gathering, and outreach.

Transmittal of the Planning Board draft of the master plan to the District Council and the County Executive is scheduled for late fall/early winter of 2020/2021. The plan’s remaining major milestones are outlined below.

Hello,

I’m concerned and have possibly missed in reviewing the latest update/plan. I had expressed specifically during meetings held at the museum a need for a right turn only lane at the intersection of 650 New Hampshire Avenue in Ashton for drivers turning right onto westbound Rt. 108. I don’t see this in the latest information. I’m certainly hoping/praying that this is part of the plan. I must tell you I have had enough and others as well to have to wait in the right-hand turn lane while 50% of the people are heading south rather than turning onto Rt. 108. I’ve lived in the area for over 20 years and why the county/state can’t recognize this need is so hard to understand. I have written several times regarding this issue to the county, I’ve called and have attended meetings with regard to the Ashton plan. The state/county has done this on the southbound lanes of 650 NH at this exact intersection. This intersection is grossly outdated. Left-hand turn arrows for the east and westbound Rt 108 turning north and south are desperately needed as well. Here is exactly what we are looking for:

1. Rather than adding sidewalks and more green space to the northbound side of 650 add a right turn lane only (exactly what has been done on the opposite side of this location) then use the existing two lanes for southbound 650 and put a desperate needed left turn arrow signal on the current traffic light for the eastbound 650 cars, just like the opposite side has. The recent modification to this intersection where we have to stop a ways back from the intersection is insane. I often have to sit through two lights just to make the right turn on Rt. 108 or go through the Ashton shopping center as a cut through.

If you would like to discuss this further please feel free to contact me. I’d appreciate a response one way or the other to this email.

Regards,

Barbara Nash
240-481-6619
Jamey,

I appreciate the quick response. My wife and I saw a notice about it in the Olney Paper which included the web address for the presentation. We live just north of the maps you’ve shown for the sector plan, only 2 plots separate us from Lethbridge Ct., and frequently walk down to the intersection of New Hampshire and 108 and down to Sandy Spring as well. Some of our hopes for Ashton area would be:

- More walkable space (sidewalks and crosswalks)
- A small grocery store
- A community open/green space
- Some additional retail and restaurants
- A face lift to the Ashton shopping center couldn’t hurt but I assume that is the property owner’s issue to handle. The strip is somewhat bland-looking and the pylon sign isn’t great
- Keeping the same small, quiet community spirit
- We would prefer to not have any national chains that may ruin the “rural community” feel of the area
- We are concerned about increased traffic in the area as a result of this. The intersection already backs up different times of day

I believe all of our ideas/concerns are listed in the presentation.

A few more questions if I may: Is the SE corner of the intersection the only area that will be reviewed by the council this fall? If a plan is approved this fall, is there a rough timeline for things to happen? Are there any plans for the old Sole D’Italia building that is currently fenced?

We are curious to see how things progress.

Thanks,

Patrick Smith

Hi, Patrick.

Before I begin, I have a question for you: where did you come across the plan? We are always curious what channels lead people to our plans.

The County Council is the body that approves all master/sector plans in Montgomery County. This particular plan is beyond an academic exercise, but at the same time, it is fairly limited in scope. The plan boundary does not extend very far at all from the intersection of MD 108 with New Hampshire Avenue. We are aware that the “Ashton area” extends far beyond this intersection, but there were no compelling reasons to open up the master plan area to include more properties. That intersection, on the other hand, the “village center,” could probably use some improvements.

Are there any changes you’d like to see in Ashton? Is there anything you would like to see NOT changed? We’d love to hear from you!

Thank you!
Hi Jamey,

I am a resident of Ashton and I came across the Ashton Village Center Sector Plan this weekend for the first time. I have only been in the Ashton area for 2 years now and am obviously curious about the plan options. As I see listed in the “Next Steps” section, this is proposed to be presented to the council in the fall of this year. I am not at all familiar with the process for something like this project from a government perspective. Is there definitely big change coming to Ashton? And if so when? Or does the county council still have to weigh in and this may be more of an academic exercise? Just curious.

Thanks,

Patrick Smith
President

Thank you for a clear presentation. I just wonder why we would get rid of the gas station? The business is useful, and they are very good mechanics. A small village has more than residential and food establishments. Just a thought ...

- Robin Ziek, 18000 Bentley Road, Sandy Spring MD 20860
thanks for the info. From the last plan, they have planted lush garden areas of iris along the sidewalk that are beautiful. fyi. I just want us to avoid Disneyland for our village centers. We need our gas stations (until everyone has a Tesla), dry cleaners, useful shops. The problem with US today is that so many industries are "universal" or chains/franchises. Maybe you can figure out how to support the small independent shops through zoning.

Robin,

Thank you for the email. We aren’t proposing to get rid of the gas station. We are simply trying to show what a village center could be if the gas station were to ever decide to close up. Small businesses like this, especially good ones, are very important. It’s just if you had to start over and design a cute village center, you wouldn’t want an auto-centric use in a prominent location on the corner. It’s not the kind of business that pedestrians would enjoy walking past, and it doesn’t even serve foot traffic by its very nature (although some have a corner store aspect that is useful).

Jamey

Mr. Pratt -

Thank you for coming to Ashton on January 29 to present some of the initial thoughts and concepts under consideration by the County for Ashton Village.

I am one of the residents who spoke in opposition to any significant increases in the housing stock within Ashton Village. As I noted during the information session, I recognize that change is inevitable. I also recognize that there is a real need to increase housing stock within Montgomery County.

Having said that, and as I stated on January 29, Ashton Village should not be asked to take on more than our fair share of the needed increase in housing stock. The character and history of Ashton is unique within Montgomery County and the concepts outlined by the County during the January 29 meeting would upend everything that is unique to Ashton. Most of the residents of Ashton (both old timers and new comers) settled in Ashton because it is different from Rockville, Gaithersburg, Silver Spring and Germantown. It has not (at least not yet) been over run with gigantic townhomes and cookie cutter apartment buildings. It is a small village nestled quietly between Olney, Silver Spring, and Clarksville. Our residents would like for it to stay that way. If we wanted to be over run with dramatic increases in house stock, would could move to any other part of the County.

Thank you for your time. Thank you for the efforts that you are putting forward to balance multiple priorities within the County. Please add my e-mail address to any "notification" groups regarding future meetings, as I would like to have a voice at the table on this topic.

Sincerely,

Walt Fennell

Thanks you for keeping us in the loop. I don’t understand why this is taking so long— and I dont understand why anyone would be against this plan. The corner looks horrible now, and that Sol D’Italia (which may not be part of this), has become a home for rats. We also dont need anymore churches or banks. I appreciate your work, and I hope that you get this done soon.

Shari Boscolo
Dear Mr. Pratt,

Thank you for the opportunity to comment on the Ashton Village Plan. I am a 30 year resident of the Spring Lawn Farm neighborhood and have a few items that are important to my family.

1) When we moved here, part of the allure was the rustic roadway and entryway into Ashton via New Hampshire Avenue driving north. In that time, many of the older large trees that provided a canopy over New Hampshire Avenue have been removed or significantly cut back. Please do not remove any more of this foliage! It is necessary to distinguish Ashton's rural character from the more urban Olney center. Similarly, while sometimes frustrating, please do not widen New Hampshire Avenue for similar rustic reasons.

2) Traffic has been increasingly busy during rush hour due to the increased development along and especially north on New Hampshire Avenue. Anything that can be done to minimize adding more volume to that traffic is important to us, whether that is reduced housing density or reduced large volume businesses in that area.

3) Keeping the height of the development to a minimum (no higher than the Alloway building) is imperative as well as providing adequate parking (something much better than the corner mall where the post office is located) and maintaining visual green space at the center of the intersection (as opposed to the current CVS lot which is way too much concrete!).

4) It would be nice to have a Trader Joe type grocery store in the area and small shops such as a bakery, UPS store, shoe repair store, small deli, and other locally owned businesses.

Thank you for the opportunity to comment.

Sincerely,
Suzanne Burton

To Jamey Pratt
We appreciate your efforts to bring affordable housing to the Ashton center. We are aware that teachers and police and others must live elsewhere and drive here.
We are concerned about the size of the buildings. Three stories seems too tall to us.
Also, please move playgrounds and common spaces away from the two roadways.
We look forward to further plans.

February 25, 2020

Benjamin Berbert
Acting Master Plan Supervisor
Mo. Co. Planning Board

Dear Mr. Berbert:

This is in reference to recent discussions about the Ashton Village Master Plan.

I live one mile north of the 650/108 intersection. My folks bought the farm in 1953 and although I’ve traveled elsewhere, this is the only home I’ve had.

I’ve watched with horror as other charming rural communities like Aspen Hill, Olney, and Norbeck have been dominated by the needs of suburbia’s spread and developers’ greed to become unrecognizable from their past identities. In fairness, those three examples, like others, fall into locations that are in the path of major transportation arteries so their fate was inevitable, unlike Ashton/Sandy Spring.

Presently the Southeast Corner of Ashton is in need of transformation. Very few of my neighbors stand adamantly opposed to developing the corner. It is agreed that it should serve a greater use than its present underutilized state. The Community worked very hard to arrive at a plan which was called Ashton Meeting Place back before the crash of ’08. It had retail, open space, and housing which served a mix of economies. It had design features that reflected the essence of the community. Unfortunately, the State Roads people gave it a thumb’s down and the housing market crashed. Ashton Meeting Place lost oxygen and died.

Here we are again. On January 29th at the Sandy Spring Museum the Community presented a new plan (called a scheme) that satisfies our need for smart development that does not create traffic and safety woes and reflects the widespread desire to maintain the rural nature of our area.

The alternative plans you presented amount to a complete concession to the desires of developers to maximize density with perhaps the seduction of promising you a more robust tax payback for the future. Two recent local plans that dwarf the existing architecture and density are Thomas Village and the to-be-built Ashton Market. It is the local consensus that these 2 projects were approved because the community was asleep and then solidly ignored once their objections were voiced.

Regarding Ashton’s Southeast Corner, will you once again take the side of the few who want to profit or the many who want to live in a community not plagued by bad planning.

A. Peter Austin • P.O. Box 187, 18743 New Hampshire Avenue • Ashton, MD 20861
Thank you just please continue to share updates if you would. Very concerned with the density... will overwhelm the community for certain!!

Subject: RE: Ashton Village Center Plan Update

Hi, Richard.

I got this email from you the other day and the only thing in it is the email address for the Olney Chamber of Commerce (I’m guessing).

Is this an address you’d like us to add, or is this the address we’d like to use for you, or was there something else you wanted us to do with it? Or were you trying to forward it to that address?

Since there was no other content in the message, I wasn’t sure what you were intending.

Thank you!

Jamey

Mr. Jamey Pratt:

March 1, 2020

Please accept these comments regarding development for the Ashton Village Sector Center Plan at the intersection of Route 108 and New Hampshire Avenue (Ashton, MD). Development at that site is understandable, but as residents of Ashton, we are concerned with the type and amount of development proposed. We hope that any development will keep the small town rural feel of the Ashton/Sandy Spring Area.

There is already a lot of traffic and congestion at the Rt. 108/New Hampshire Avenue intersection - that the intersection currently struggles to accommodate. This is particularly a problem during rush hour, in both the morning and evening. The proposed development will only add to the problem. Any development will require improvements to the intersection, such as left turn and right turn lanes and lights. Because New Hampshire Ave is a state highway please ensure any “planned” improvements are approved by the state.

In addition to traffic, we are concerned about pedestrian safety. There is a lack of sidewalks and crosswalks in the area. Development in the area must include plans and funding for sidewalks and crosswalks. And, don’t forget about approval from the state.

Development means more stormwater runoff. We are concerned about the increased amount of impervious surface and the resulting stormwater runoff. Impacts to existing stormwater systems, particularly impacts to streams and existing stormwater management ponds in the surrounding neighborhoods must be considered. Spring Lawn Farm’s existing stormwater pond at the intersection of Crystal Spring Drive and Country Hills Way is already at or above capacity. Recent development in the past two years (2 new houses were built off of Crystal Spring Drive) has resulted in the pond getting noticeably fuller and reaching the surrounding chain link fencing during storm events….when this never happened before. Increased runoff to this pond could potentially infringe on the nearby properties.

The use of bio-retention areas for stormwater management pose an issue regarding maintenance. These areas must be properly maintained by qualified personnel to ensure adequate storm water quality and quantity control. Plans and funding for proper maintenance of bioretention areas must be incorporated into any development.

Please do not overdevelop the site and take away the small town rural feel of the Ashton/Sandy Spring community.
Thank you,

David Knowles and Lizabeth Montgomery

129 Crystal Spring Drive, Ashton, MD 20861
Dear Chairman Anderson and County Planning Commissioners,

I have grave concerns regarding the Ashton Village Sector Plan presented by Planning Department Staff at the community meeting held 1/29/20. Although I agree with the Staff’s stated vision to “maintain the existing small-town character of Ashton with appropriate design and density recommendations,” their proposals undermine this vision. Selected specific concerns are listed below.

Sincerely,

John Hartge

140 Haviland Mill Rd

Brookeville, MD 20833

- The higher density designs proposed by the planning staff conflict with the objectives expressed at the Community Meeting in October 2019 – a rural village town center with open space and community gathering space that supports pedestrian and bicyclers.

- The Staff’s proposals are crammed with large, out-of-character buildings across the entire southeast corner.

- It is extremely unlikely that any design language written into a master plan will be able to truly control the final outcome.

- Heights, massing, architectural elements, open space can all change (see the “open space” in Thomas Village that consists of paver stones with two benches).

- Storm-water management has not been addressed with this future loss of open space, which will be replaced by impervious surfaces and buildings. There has been increasingly unpredictable weather and unprecedented flooding (e.g., Ellicott City, parking garages in Maryland).

- The proposed additional 100+ units likely translates to an additional 200 cars as most families have 2+ cars and over burdens the roads and resources in the area. This project destroys the rural character of this section of the county.

- Our small area has done its part to ease the housing crisis in Montgomery County through Sandy Spring Meadows, Thomas Village, and the (approved but not yet built) Porter Road Projects.
Thursday, March 5, 2020

Dear Chairman Anderson and Planning Commissioners,

We wish to express our concerns over the concepts for the Ashton Village Sector Plan presented by Planning Department Staff at the January 29 community meeting. We have lived in Brinklow (3 miles north of Ashton) for 41 years and have seen many changes to the Ashton-Olney area, not all of them positive.

Many of the proposals offered by the Planning Department Staff fail to recognize the reality of life here and seem to be developed in response to political pressure from the County Council to expand housing offerings in anticipation of the population growth projected over the next decade.

Our specific concerns are the following:

1) Several years ago, the Maryland Department of Transportation (MDT) declared Rt. 108 a “failed highway,” as reported by the now-defunct Olney Gazette newspaper, meaning the amount of traffic has outstripped the capacity of the roadway to carry it. The MDT declared there was no ability to expand Rt. 108 due to existing property and right-of-way restrictions and Rt. 108 would forever be a “failed highway”.

2) The proposed additional 100+ units likely translates to at least an additional 200 cars as most families have 2+ cars. We have driven through the intersection of Rt. 108 and NH Ave. for more than 40 years. Traffic has expanded significantly over the years and congestion, particularly at peak hours, has worsened. Traffic through Ashton to Olney already is bumper-to-bumper, made worse during morning and evening school hours. The effects lower the community’s quality of life, pose dangers to school children and contributes to environmental degradation.

3) The Planning staff admitted to a question at the community meeting that traffic concerns and increased congestion at the intersection were not part of their consideration in the development of their plan. According to staff, traffic studies are the responsibility of the MDT and not them. We urge you to take a hard look at this question.

4) Our issues are not “NIMBY” concerns. We support the need for more “attainable housing” in Montgomery County. Ashton has already contributed to this goal with the Sandy Spring Meadows, Thomas Village, and the (approved but not yet built) Porter Road projects. Additionally, Porter Road includes MPDUs in its design. The current congestion, however, doesn’t yet reflect the impact of the Porter Road project. So we expect more congestion on our “failed” highways.

5) The Planning Board’s report says Missing Middle housing should be located close to transit and jobs. Ashton does not meet this criteria. We live in a “bedroom” community for the most part. The only transit to the area consists of a few buses each day to the Silver Spring Metro. The nearest Metro station is Glenmont, a 20--30 min. drive. Most of the new inhabitants of the proposed development will be forced to commute to their jobs by car, shop by car and perform their daily chores by car. We have not seen additional mass transit provided to our area in the past 40+ years and we believe it highly unlikely that additional mass transit will be available in our area, now or in the future.

6) Staff’s proposal to decorate the buildings with rural village architectural elements, such as front porches and dormer windows, are only design ”suggestions,” not guarantees. The promised “open space” in Thomas Village, for example, consists of paver stones with two benches.
In summary, we believe: 1) Staff’s proposals respond to the political pressure for additional housing and not to the concerns of local residents; 2) Ashton has already contributed to expanded housing needs; 3) Ashton’s “failed” infrastructure does not support the increased congestion recommended by staff; 4) local needs will be sacrificed to the profit demands of developers.

We recognize that Ashton long ago lost the “rural village” character that existed when we moved here. Growth is inevitable and housing needs are important. But growth can be managed to lessen the impact on residents and the quality of life in our community.

Thank you for your consideration of our views.

Respectfully,

Michael & Laura Grace
400 Brighton Knolls Dr. Brinklow, Md. 20862
Dear Mr. Duke,

I am writing to urge you to reduce the density of the development in Ashton more in keeping with its RURAL and—more important—HISTORIC character.

I’m from Annapolis. In the late 40s and early 50s my grandfather, Charles E. Emery, created ‘Historic Annapolis’ and served as its first president. His task, and the overarching task of the organization was to act as a “bit and bridle” for developers who were more than eager to tear down an early colonial home and put up more “modern and efficient” structures for personal gain.

But we see now what Historic Preservation can mean, and what a pearl to the state of Maryland, Annapolis is—for those who live there and those who visit.

The same can be true for Ashton, albeit on a much smaller scale. The history that Ashton embraces is unique in the county, and the teaching opportunities for all who visit are golden. Here are a few to consider ::

- **Clifton** - house built - 1740
- **Cherry Grove** - house built - 1773
- **Cloverly** - house built - 1849
- **Harewood** - house built - 1793
- **Quaker Meeting House and graveyard** - 1817
- **Woodlawn** - house built - 1832
- **The Underground Railroad**
- **Sandy Spring museum**
- **The Sandy Spring Slave Museum**

The “unbridled development” —specifically of the southeast corner of 108 and 650—would kill what amounts to a “metaphysical” sense of the history of this unique area of the county. Although no houses stand in jeopardy, it is that feeling of history that would be destroyed by a mass of retail,
townhouses and multi-story apartment buildings on that property. This should not happen.

What the OVERWHELMING MAJORITY of Ashton/Sandy Spring citizens would like to see is a well-designed and modest RURAL VILLAGE that is more in keeping the the wonderful HISTORY that is already established here. Dwelling units to amount to no more than 35.

The Thomas Village cluster in Sandy Spring and the new Porter Road cluster of townhouses in Ashton already will put as many as 100 cars on unimproved roads. If the design for Ashton Crossroads is left as proposed, in total we could see as many as 300 new cars out on our roads. This should not happen.

Please do not allow over-development to crush Ashton and Sandy Spring's sense of history. The preliminary proposals for Ashton are totally out of character.

Sincerely,

-Charles Glendinning

Dear Chairman Anderson, Planning Commissioners, Councilmember Navarro

I am writing to voice my deep concern over the concepts for the Ashton Village Sector Plan presented by Planning Department Staff at the January 29 community meeting. I agree with the Staff's stated vision to “maintain the existing small-town character of Ashton with appropriate design and density recommendations.” My concern is that Staff’s proposals do not achieve this vision—in fact they undermine it.

The higher density designs proposed by the planning staff do not reflect what was asked for at the Community Meeting in October 2019 – a walkable, bikeable rural village town center with open space and community gathering space.

- Ashton’s rural character is created by a pattern of residences, businesses, trees and open spaces clustered around the crossroads of New Hampshire Avenue and MD Route 108.
- Essential services and amenities are 3 miles away, which is why most people chose Ashton to make their home - we don't want to be in the middle of a bustling commercial center!
- The beauty of the area should be evident in it's 'center'. **This intersection is already developed on 3 corners. It's enough!**
- It is extremely unlikely that any design language written into a master plan will be able to truly control the final outcome. Heights, massing, architectural elements, open space can all change (see the “open space” in Thomas Village that consists of paver stones with two benches). The precedent is there - developers have not adhered to promises made in recent projects.
- The only transit to the area consists of a few buses each day to Silver Spring Metro, so many of the new inhabitants of the proposed development will be commuting by car. Additional mass transit is unlikely to our area, given tight budgets and the fact that residents really need cars to reach shopping, as well as jobs.
- Staff proposes this development to fill the Missing Middle with housing out of character with Ashton such as apartment buildings and massive townhouse blocks. The Planning Board’s report says Missing Middle housing should be located close to transit and jobs, and **Ashton does not provide this context.**
- **Our small area has done its part to ease the housing crisis in Montgomery County through Sandy Spring Meadows, Thomas Village, and the (approved but not yet built) Porter Road Projects. Additionally, Porter Road includes MPDUs in its design.**

I was very vocal in the last meeting at the Sandy Spring firehouse. My observations included that Planning Staff did not understand the depth of opposition to any project at the southeast corner of 108 and New Hampshire - ANY development. The plan that is currently approved was hard fought on both sides. Any changes to that plan affecting/increasing density are simply a money grab by the developer.

It's time for the planning board to put the brakes on development in Ashton. The charming town that I moved to, and invested in 13 years ago is barely the same. It's enough!

Nina Stahl
Ashton Homeowner
March 6, 2020

Dear Chairman Anderson and Planning Commissioners,

I am writing to voice my deep concern over the concepts for the Ashton Village Sector Plan presented by Planning Department Staff at the January 29 community meeting. I agree with the Staff’s stated vision to “maintain the existing small-town character of Ashton with appropriate design and density recommendations.” My concern is that Staff’s proposals do not achieve this vision—in fact they undermine it.

- The higher density designs proposed by the planning staff do not reflect what was asked for at the Community Meeting in October 2019 – a walkable, bikeable rural village town center with open space and community gathering space.
- Ashton’s small-town character is created by a pattern of residences, businesses, and open spaces clustered around the crossroads of New Hampshire Avenue and MD Route 108.
- Developed land in the area consists almost entirely of single-family homes, affordable townhouses, single story retail.
- Currently the developed land in Ashton is interspersed with open space and trees.
- The Staff’s proposals are crammed with large, out of context buildings across the entire southeast corner.
- Proposal has insufficient transitions from taller buildings to the existing homes at the edges.
- Staff’s open spaces are too small and in some scenarios are not visible enough from the roads.
- Staff’s proposal to decorate the buildings with rural village architectural elements, such as front porches and dormer windows, cannot be guaranteed and would not disguise the extreme density.
- It is extremely unlikely that any design language written into a master plan will be able to truly control the final outcome. Heights, massing, architectural elements, open space can all change (see the “open space” in Thomas Village that consists of paver stones with two benches).
- Stormwater management has not been addressed with this future loss of open space, which will be replaced by impervious surfaces and buildings. There has been increasingly unpredictable weather and unprecedented flooding (eg Ellicott City, parking garages in Maryland).
The proposed additional 100+ units likely translates to at least an additional 200 cars as most families have 2+ cars.

The only transit to the area consists of a few buses each day to Silver Spring Metro, so many of the new inhabitants of the proposed development will be commuting by car. Additional mass transit is unlikely to our area, given tight budgets and the fact that residents really need cars to reach shopping, as well as jobs.

Traffic currently backs up at the intersection and many in the area must plan their commutes to avoid this, if they have that luxury. Those with school-aged children likely can’t avoid the traffic.

The current traffic load doesn’t yet reflect the impact of the Porter Road project.

Staff proposes this development to fill the Missing Middle with housing out of character with Ashton such as apartment buildings and massive townhouse blocks.

The Planning Board’s report says Missing Middle housing should be located close to transit and jobs, and Ashton does not provide this context.

Please consider reducing the density and scale of this project. Thank you for your attention.

All best, Susan Fifer Canby

Dear Chairman Anderson and Planning Commissioners,

I would like to voice my opposition to the Ashton Village Sector Plan, Conceptual Schemes 1 and 2, laid out at the Jan Community Meeting.

The Planning website states that the Ashton Village Center Sector Plan will (among other things):

- Maintain Ashton’s rural character.
- Enhance opportunities to provide walkable, neighborhood-serving development.

I am concerned with Conceptual Designs 1 and 2 for the following reasons (not all inclusive):

1. The conceptual designs certainly do not maintain Ashton's rural character

- Conceptual Designs 1 and 2 look NOTHING like a rural village town center, which was what the community was trying to evoke in its own plan developed at the Oct workshop at the Sandy Spring Museum. Rather it appears to be a study in how to shoehorn the greatest number of residences into the smallest space possible.
- The designs are strangely out of character with the surroundings. Imagine driving down Rt 108, along farm fields, and coming upon a development of towering apartments, townhouses, stacked flats and duplexes. There is no design element that could be incorporated to downplay this jarring juxtaposition. Porches and gables, while lovely, will not compensate. Additionally, it is doubtful that these features will be incorporated into the final product as they cannot be written into zoning rules or enforced. It will, instead, feel as if someone has cut out a swath of the Rockville Town Center or downtown Bethesda and dropped in the middle of a farm field in Ashton. I don't think rectangles on aerial design plan can adequately capture how appalling it will FEEL in 3D until it is too late.

2. The conceptual designs lack a "walkable, neighborhood-serving development"

- The proposed plans do not enhance opportunities for a "walkable" development, as there is limited community space built into the plans - unless one counts walking around to the residences themselves as an enjoyable community experience.
- It appears the incorporated open space primarily comes from the stream buffer - which is not buildable to begin with. There is too little planned open space and with that, we run the risk of "open space" similar to what came out of the Thomas Village plans - which is a patio of paving stones with two benches. Not exactly inviting to the community as I have never seen anyone sitting there - including the residents of the townhouses. Or perhaps we'll see something like the benches-of-no-purpose next to the Ashton town sign in front of the CVS - another interesting design element afterthought.

3. Increased traffic
Traffic on 108 is already nightmarish - particularly during school arrivals/departures and rush hour. I am "lucky" to have the flexibility to leave my neighborhood on Hidden Garden Lane (very close to the intersection of 108 and NH Ave) by 6:30AM. I do this not only for my own sanity but so that I am one less car on the road during the crush of rush hour. I cannot imagine what it must be like for those with children who must either wait to leave until a school bus comes, or, even worse, have to drop their child off at school.

Adding the 101 residences proposed in Conceptual Scheme 2 will likely mean an additional 200 cars (let's all admit that we primarily live in 2 car households, if not more when children of driving age are present). These will be cars commuting to/from work, as the number of people taking the metro bus will likely be minimal. I often take the metro into the city, and have a metro bus stop in front of my neighborhood and even I drive to the metro station. The addition of these cars will exponentially increase the traffic problems on our small roads in Ashton/Sandy Spring.

I have other concerns as well, but in the interest of not completely losing your attention, I will stop there. I moved to Ashton 4 years ago from a town near Kennett Square, PA. It was a challenge to find an area in Maryland (Montgomery County or surrounding counties) that evoked the same open-space-yet-small-town feel. I was excited when I found it in the Ashton/Sandy Spring community - with its history of farming, the Underground Railroad, and Free African American and Quaker communities. Moving from a 2 acre homesite to 0.2 acres was hard, but the surrounding open space and sense of community made up for it. Our community is unique. While I am newer to the town, I feel an obligation to fight to maintain the rural village character of Ashton and prevent it from being a carbon copy of the numerous surrounding towns in Montgomery County that blend into each other with little distinction. It is nearly impossible to determine where one town stops and another starts when driving past strip malls and housing complexes. Once we lose the character of Ashton, we won't be able to recapture it. The decisions made now will have repercussions for future residents of our community.

Respectfully,
Amy Medd
Resident of Wyndcrest
On January 29, I attended the community meeting where the Planning Department staff presented concepts for the Ashton Village Sector Plan. I appreciate the efforts that the Planning Staff have made to keep the community informed as the Plan is being developed. However, I am concerned by the number of units that could occur on the southeast corner of the intersection of Route 108 and New Hampshire Avenue as a result of potential provisions of the plan that are inconsistent with the nature of a rural village.

Previously, I attended the initial meeting on the Plan in May, the Planning Commission meeting in which it approved the Planning staff’s proposal for developing the Plan, the October bus tour, and the October community design workshops. In addition, I attended some of the office hours hosted by Fred Boyd prior to his retirement. Further, I have read the County’s, “The Missing Middle Housing Study,” published in September 2018. I was an active participant in the development of the 1998 Sandy Spring Ashton Master Plan.

My biggest concerns about the potential development Is the potential for 100-150 units with the corresponding massing and building heights, along with the safety and other impacts due to a significant increase in traffic at the intersection of Route 108 and New Hampshire Avenue. This additional development will add two more entrances onto Route 108 and New Hampshire Avenue, bringing the total to ten, close enough to the intersection to preclude controlling traffic through additional traffic lights and causing further pedestrian safety issues.

While I support having a mix of housing types and the concept of providing housing units that are affordable as outlined in “The Missing Middle Housing Study,” I seriously question that this site in Ashton is the proper place to implement this strategy. On page 24 of “The Missing Middle Housing Study,” it suggests that, “[t]he most ideal locations for Missing Middle housing typologies are at the following locations:

“Along major transportation corridors, where Missing Middle housing can serve as a transition between busy thoroughfares and neighborhoods on internal streets.

“At the edges of single-family residential neighborhoods adjacent to other more dense uses and building typologies, so as to provide a transition between land uses.

“Within a certain distance of transit and transportation alternatives such as bus, bus rapid transit, Metro and Purple Line light rail.

“A limited number of typologies within single-family neighborhoods, e.g. accessory dwelling units or duplexes.”
The southeast corner does not meet any of these criteria. It is served by a single bus route that only operates on weekdays and the last run starts at 6:10 pm, which means that residents of housing on the site will be dependent on cars, at least in the evenings and on weekends. Only the option presented by the community at the design workshop envisioned single family homes that could accommodate accessory dwelling units.

Further, one of the recommendations of “The Missing Middle Housing Study” suggests:

“Consider a Missing Middle Housing Functional Master Plan for the County that would identify all the ideal locations for Missing Middle housing typologies and result in a sectional map amendment that would rezone appropriate areas.”

This seems like a more prudent way to implement the provisions of the study so that the sites identified for “missing middle” housing meet the criteria and that the units that are built actually are affordable. There is no clear definition for what is affordable in Montgomery County and no guarantee that what actually gets built will be affordable. What is guaranteed if implemented in Ashton is the much higher number of units and that residents will be dependent on cars, adding to the already serious traffic and safety concerns.

Along with the number of units, there is a concern that the potential development on the southeast corner will be inconsistent with the existing development on the other corners in scale and scope. The current FAR of .25 for residential development for the southeast corner is more appropriate for the village center and to retain Ashton’s unique character. If the developer is allowed to increase it to allow for a residential FAR of .5 or as has been suggested to .75, it would allow development that would result in Ashton losing its rural character and would resemble other more densely developed areas of Montgomery County. If the stated goal is to retain the rural character, then the FAR should not changed.

Our Spring Lawn Homeowners Association held our annual meeting last week and the Ashton Village Plan was discussed. These concerns are shared by other residents.

Thank you for your consideration of these concerns. We moved from Olney to Ashton almost 27 years ago because of its special and unique character. We hope that the Ashton Village Sector Plan will preserve it.

Sincerely,

Kathleen Wheeler

Dear Chairman Anderson, Planning Commissioners and Others,

I am writing to you regarding the development planned for the southeast corner of New Hampshire Ave. and Rt. 108 in Ashton, MD. My wife and I have been residents of Ashton since 1993. We live in the Spring Lawn Farm community, so the development of that parcel very much affects us.

I bought a lot in 1992, in large part due to the rural character of the area, including what was to me a “small-town feel”. I moved from Gaithersburg due to the density. I could have moved to Olney, but well, that’s not a small town.

My concern is that we will lose that small-town feel, and will essentially betray the reason that folks moved here in the first place. The master plan that I reviewed back in 1993 did not call for the type of development that has now been put forth by the developer (does he care??), and the staff (why??). Are you now jettisoning the vision of what Ashton is now and is supposed to be going into the future?

The staff seem to want to preserve the small-town character, at least that is what was said, but the plan does not. Why? I don’t understand why the plan has such a high degree of density, and buildings that don’t integrate. Putting a nice face on density and inappropriate buildings does not fix the issue. Density is density, and size is size, no matter what the facades might be.

I don’t understand why? Why so much housing? Why here, when there is NO mass transit to speak of, and where other parcels are being development (to do our share, so to speak). How does the current plan create a better environment for those who lived here for years? Why do we have to bear the burden of this kind of density... to achieve some vision, or to achieve the aspirations of a developer? This is a financial move, not a quality-of-life move.

In this day and age where government seems so much off the rails as it relates to what Americans want, can we at least govern our local, small town in a manner that gives us some control of our day-to-day life, without having to give that up to a developer?

So I’m hoping that you will take these comments to heart and arrive at a sensible plan that can be one that the current residents of Ashton can live with. There have been numerous occasions where our views have been presented. Will they be heard?

Sincerely,

Robert Bulik
17508 Country View Way
Ashton, MD, 20861
Dear Mr. Duke,

There is a line in the movie, "Jurassic Park" that perfectly communicates the entire premise of the movie itself :: "Just because you can do something, doesn't mean you should." In our rural community of Ashton, a developer has access to the 8+ acres of land on the southeast corner of the intersection Routes 108 and 650. He has financial backers, political support, and clever legal representation. This is a difficult trifecta for a loose (but large) confederation of concerned citizens to come up against.

But we DO come up against it with this simple thought :: Just because a developer has access to a piece of property, and the county is interested in fulfilling a self-imposed mandate to make room for 200,000 more residents, and the developer has legal representation and political connections enough to make it all happen, it doesn't mean that Ashton is the place to do it.

Over-developing this property makes no sense. My first note said it was out of character. This note makes the point that it is out of place.

This property sits at the far Eastern border of the county as it crosses the Patuxent and disappears into the more rural parts of Howard County. It is all but devoid of public transportation, and we know what happens then :: people drive.

We don't need to understand the rationale behind making room for 200,000 new residents in Montgomery County. That's wonderful! Bring them on! But doesn't it make sense to put them where public transportation will logically expand to serve them? It should be obvious to a sensible planner that the optimum area for development would be the Georgia Ave. corridor since the Metro would logically begin to extend from Glenmont in that direction... NOT along New Hampshire Avenue.

Yes, we are a loose confederation of residents, but we are speaking to you
with one voice—especially the overwhelming majority who aren't writing you letters. We accept the inevitability of development... but we **totally resist** the mass and density which are out of **place** for our rural crossroads.

Sincerely,

-Charles Glendinning

Dear Mr. Clark,

Thanks for contacting us. I am the Planning Dept member of the Rustic Roads Advisory Committee, so I can update you on what I know about Tucker Lane. My colleagues Roberto Duke and Jamey Pratt are working on the Ashton plan you reference. And our MCDOT colleague, Devang Dave, can tell us if that office has any information for us.

For rustic roads, only part of Tucker Lane is designated as rustic—the segment from Ednor View Terrace to MD 108, Ashton Road. Based on the address you’ve given, your section is not rustic, so Devang may be able to have a discussion about whether the community would support traffic calming. On the rustic section to your north, we don’t generally have traffic calming modifications such as speed humps, but I can think of at least two rustic roads that have had rumble strips added (they can be noisy, though). Do you have any questions or other information on the rustic section?

Devang, do you have any information or questions for Mr. Clark?

And Roberto and Jamey, do you have any info or questions for the Ashton Village Plan?

Thanks to all,

Leslie
Dear Sir or Madam,

Thanks for the online information you are providing on plans for the Ashton Village area. I was on travel in October so missed the earlier meetings. I wanted to mention that, while I live a few blocks outside the Ashton Village plan area, I live in Ashton on Tucker Lane and as such am impacted directly by daily high-MPH commuter traffic flow from New Hampshire Avenue and Route 108: Tucker Lane, a so-called Rustic Road, has become a major cut-through for cars, commercial trucks, and industrial size trucks traveling either from NH Avenue to Rte 108, or from 108 to New Hampshire Avenue. I mention this because Tucker Lane residents now have daily rush hour-type traffic speeding down our rustic road in order to AVOID the Rte 108-New Hampshire intersection, site of the Ashton Village area.

I think it’s crucial that in planning changes to the Ashton Village area, the county consider the impact of the saturated roads intersecting that area in any planning — and in consider ways to avoid the lengthy traffic backups that lead Howard County and other commuters to cut through Tucker Lane in order to avoid long waits at the intersection of NH and Rte 108.

Because Tucker Lane is a "rustic road," those of us who live along the 1.9 miles of Tucker have to put up with Monday through Saturday high-speed commuting on a road that has no curbs, no sidewalks, no Montgomery County Police presence or speed traps, and poor lighting. We are also ineligible for speed bumps, under a MOCO regulation the county transportation staff has cited when we contacted them.

I have almost been hit by speeding cars when leaving my driveway, to enter Tucker Lane, three times in the past three or four years. I have contacted the county police and the county transportation department every six months or so about the overall situation and asked for relief. The police department replies at length, explaining exactly why they don’t have the resources to patrol Tucker lane for speeders or place speed cameras on the road. We do have “enhanced” speed limit signs (orange strip at bottom of sign — zero discernible impact on speeders) and signs at either end of the Lane limiting truck weight to 7000 tons. (This is so fuel oil delivery trucks can use the road — there is no gas line from NH that serves Tucker Lane. It is also frequently ignored.)

I’ll stop ranting for now, but would close by asking you to PLEASE factor into your planning for the Rte108-New Hampshire intersection a means for processing traffic through that intersection without lengthy delays, which make commuters from Howard County use “Tucker Highway,” as we now refer to it, a time-saving cut-through — especially when one speeds. The 15 mph hairpin turn midway down the length of Tucker, where the road actually narrows, is most likely the place where the first tragic traffic accident on Tucker will occur.

I realize this is not an easy problem to fix. But Tucker Lane is no longer a Rustic Road, so perhaps it’s
time to end its Rustic Road status and declare it an Avenue, so that speeding will be monitored, and sidewalks, curbs, and speed bumps can be used to provide safety to residents — including pedestrians, who can no longer walk along Tucker with any sense of safety.

Best regards,

Bruce Clarke

Ashton, MD 20861
Dear Chairman Anderson and Planning Commissioners,

This letter is in response to the Ashton Village Sector Plan presented at the January 29 community meeting. We are strongly opposed to the obvious congestion that will be created at the intersection of Rte. 108 and New Hampshire Ave. by this Ashton Village Proposed plan. We moved out here from inside the Beltway some years ago to escape this very type of congestion.

The high density and tall buildings proposed should not be allowed at that location under any circumstances. Olney already has this kind of density just down the road for those desiring it, but we do not want it here. The rapidly disappearing rural character of Ashton cannot be brought back once destroyed. We respectfully ask you to redesign the Plan to greatly reduce the height of any building to no more than 35 feet and a much lower density with more green space.

In addition, the additional traffic injected into an already congested intersection at 108 and New Hampshire simply does not make any rational sense. The additional traffic is just not logical and should be seriously reevaluated.

We implore you, please do not allow the development to continue without a greatly reduced density and height and providing more open green space. Again, those desiring the congestion and reduced green space can find it just down the road where the beautiful rural character of Olney has been totally destroyed and black top and buildings are everywhere. We do not want this congestion in Ashton under any circumstance.

Thank you for your serious consideration in this matter.

With deep appreciation for your reconsideration and review of the Plan,

M. Leroy Haas and Janet. M Haas

Dear Chairman Anderson and Planning Commissioners:
The purpose of this correspondence is to voice my grave concern over the Ashton Village Sector Plan presented by Planning Department Staff at the January 29 community meeting. I agree with the Staff’s stated vision to “maintain the existing small-town character of Ashton with appropriate design and density recommendations.” What is clear is that Staff’s proposals not only do not achieve this vision—they in fact decimate it. The voters that comprise this portion of Montgomery County are clearly opposed to the proposal for myriad reasons including, but not limited to:

- The higher density designs proposed by the planning staff do not reflect what was asked for at the Community Meeting in October 2019 – a walkable, bikeable rural village town center with open space and community gathering space.
- Ashton’s small-town character is created by a pattern of residences, businesses, and open spaces clustered around the crossroads of New Hampshire Avenue and MD Route 108.
- Developed land in the area consists almost entirely of single-family homes, affordable townhouses, single story retail.
- Currently the developed land in Ashton is interspersed with open space and trees.
- The Staff’s proposals are crammed with large, out of context buildings across the entire southeast corner.
- The Proposal has insufficient transitions from taller buildings to the existing homes at the edges.
- The Staff’s proposed open spaces are wholly insufficient.
- The Staff’s proposal to decorate the buildings with rural village architectural elements, such as front porches and dormer windows, would do nothing to disguise the extreme building density.
- It is extremely unlikely that any design language written into a master plan will be able to truly control the final outcome. Heights, massing, architectural elements, open space can all change (see the “open space” in Thomas Village that consists of paver stones with two benches).
- Stormwater management has not been addressed with this future loss of open space, which will be replaced by impervious surfaces and buildings. There has been increasingly unpredictable weather and unprecedented flooding (eg Ellicott City, parking garages in Maryland).
- The proposed additional 100+ units likely translates to at least an additional 200 cars as most families have 2+ cars.
- The only transit to the area consists of a few buses each day to Silver Spring Metro, so many of the new inhabitants of the proposed development will be commuting by car. Additional mass transit is unlikely to our area, given tight budgets and the fact that residents really need cars to reach shopping, as well as jobs.
- Traffic currently backs up at the intersection and many in the area must plan their commutes to avoid this, if they have that luxury. Those with school-aged children likely can’t avoid the traffic.
- The current traffic load doesn’t yet reflect the impact of the Porter Road project.
- Staff proposes this development to fill the Missing Middle with housing out of character with Ashton such as apartment buildings and massive townhouse blocks.
- The Planning Board’s report says Missing Middle housing should be located close to transit and jobs, and Ashton does not provide this context.
- Our small area has done its part to ease the housing crisis in Montgomery County through Sandy Spring Meadows, Thomas Village, and the (approved but not yet built) Porter Road Projects. Additionally, Porter Road includes MPDUs in its design.

For all these reasons, the voters of this district demand this latest in a series of slippery-slope proposed changes to
the project be rejected.
Thank you for your time,
March 15, 2020

Dear Chairman Anderson and Planning Commissioners,

We are writing to voice our deep concern over the concepts for the Ashton Village Sector Plan that were presented by Planning Department Staff at the January 29, 2020 Ashton/Sandy Spring community meeting. We agree with the Staff’s stated vision to “maintain the existing small-town character of Ashton with appropriate design and density recommendations.” Our concern is that the Staff’s proposals do not achieve this vision—in fact they undermine it.

Items of special concern to us include:

- The higher density designs proposed by the Planning Staff do not exhibit a walk-able, bike-able, and rural village town center with adequate open spaces and community gathering spaces. The Staff’s described open spaces are too small and, in some scenarios, are not visible enough from the roadways.
- The Staff’s proposals indicated crowded, large, and out of context buildings encompassing the southeast corner of the New Hampshire Avenue-Route 108 intersection.
- Traffic currently backs up at this intersection and many in the area must plan their commutes to avoid this. Those with day jobs and those with school-aged children likely can’t avoid the rush hour traffic.
- The current traffic load doesn’t yet reflect the impact of the Porter Road project, presently being built on the former Sole D’Italia restaurant location.
- The proposed additional 100+ units for the Ashton Village Center likely translates to at least an additional 200+ cars for the immediate area; since many families will have 2+ vehicles.
- Also, for the residents of the Spring Lawn Farm community, stormwater management has not been addressed (and is a concern) with this future loss of open space, which will be replaced by impervious surfaces and buildings. There’s been an increasing rise in the level of the neighborhood’s stormwater management pond – which is located near Crystal Spring Drive and Country Hills Road.
- Our small town has done its part to ease the housing crisis in Montgomery County through Sandy Spring Meadows, Thomas Village, and the (currently underway) Porter Road projects. Additionally, Porter Road does already include Moderately Priced Dwelling Units (MPDUs) in its design.

In closing, we are not opposed to development. But, we are in favor of development that will retain the character of our beautiful, rural town area - and the county Master Plan.

Sincerely,

David Knowles

Subject: Ashton Village Sector Plan “StatedVision”

Dear Mr. Anderson,
As long time residents of Spring Lawn Farm, in Ashton, we are seriously concerned regarding the proposed changes that could occur regarding a higher density to our community. We understood the “stated vision” from your January 29, 2019 meeting was respecting our neighborhoods requests. Currently, that is not true. It’s not unreasonable that we want to maintain the existing “small town character” of Ashton. We are not opposed to reasonable and honest changes. Please respect your citizens concerns and stay true to the original “stated vision” proposed.
Thank you for your service to our community, Kevin & Kristine Gannon

Dear Planners,

I am finally getting around to writing, and I think it is significant to note that I am an active member of The Sandy Spring Ashton Rural Preservation Consortium and the Sandy Spring Civic Association. I attended many of the community meetings about this and other development actions in our neighborhood, and can say with some certainty that my one fairly late-in-the-game email represents multiple other people who just won’t get around to writing. And then there are the people who won’t know anything about what is proposed and will be unhappy with building once it starts and it is too late to do anything. The sector plan that was presented on January 29th was so disheartening - it didn’t represent anything like the community input I heard again and again in the process. Consistently, with really one voice, people asked for improved safety - walkability and bikeability and maintaining the Master Plan designation of a rural town center. The idea of as many as 150 dwelling units on that 8 acres along with a bank and other commercial entities just doesn’t match the label “rural” or “rural village center” or even "small town character". We already have (and are about to have more with the Ashton Marketplace project) townhomes in Ashton and Sandy Spring, and the latest entries (Thomas Village and Ashton Marketplace) already too dense and too tall, too devoid of any greenspace or design features that would encourage community building. Their cost is high as well - not serving the missing middle, for instance. Please take something to the planning board more in line with the designs citizens came up with in the design workshops, and be honest about what small town and rural means - not more traffic congestions and tall buildings. Please don’t make us say sarcastically as we did after the hearings about Porter Road “Thanks for pretending to listen”. We want a master plan that has some teeth in the limitations to control developers. Too often we have been presented with drawings that were quite attractive (trees and green space, for example) and have ended up with things not at all like what was proposed. And now I understand that permission is being sought retroactively at Thomas Village for the changes such as the loss of the little park that was to have been an asset but had to go to make room for the fire engines to turn around. That is the kind of thing we count on you to notice before hand.

Yours sincerely,
elizabeth thornton
Dear Planning Board members and staff, and County Council members,

Thank you for serving all of us in Montgomery County. I know that your schedule of meetings and your plans for the spring have all been changed, and I hope that you are all staying safely at home to honor our brave health care workers.

I would guess that the developers who have been planning projects in the county may also have their plans disrupted for some time because of the economic disaster that is occurring along with the health crisis. However, I am concerned that you may be meeting soon using teleconferencing to change the zoning for the Ashton area, and I hope you will consider carefully the ramifications of your decisions.

Some of us may not survive the virus, but some of us will certainly survive, and the world we leave for the next generation will need as much open space and natural beauty as we can possibly spare. Rural preservation is more important than ever. Many of us are able to enjoy walks in the woods and a view of trees and green spaces now to give us strength and encouragement for what we are about to experience as we've been warned by the people of China and Italy.

The desires of the Ashton community to save the rural village character of Ashton were expressed clearly, over and over, in every meeting that I attended with Planning Board staff over the past year, and in every session of office hours held by Fred Boyd in the Sandy Spring Museum. Your Web site, and your printed materials say that you heard that message. Please do everything you can to honor the details that will make that happen, especially on the currently open property next to the Sandy Spring Bank at the corner of New Hampshire Avenue and Route 108. That green space can't be given back to future generations if you change the zoning to allow it to be filled up with townhouses, apartments, and pavement.

I beg you to keep that property on the southeast corner of the Ashton intersection at a F.A.R. of 0.25. If you change it to 0.50, it doesn't matter how many beautiful drawings of buildings your planners can show us, because someday, a developer will fill that space to the max that you allow. No developer should be allowed to do that just so that he/she can make more money. The current owner of some of that property, Fred Nichols, knew what the zoning was when he bought the land, and his desire to add density does not override what we all trusted when we read the Master Plan when we bought our property. The needs of the community have been honored in every version of the Master Plan. If you change the zoning now, you'll be serving the needs of the developer alone.

We all are evaluating our lives these days, and what we've spent our days and years doing. I hope you will each take seriously the important consequences of your decisions for the remaining pockets of open space left in Montgomery County. The environmental stresses of climate change will continue to go on after the virus has been defeated by our brilliant scientists. The smart thing to do for our environment 50 years from now is to focus on planning the important Missing Middle housing near the Metro and other mass transit lines.
Ashton is not the place to add housing in the density that you showed us at the community meeting in the potential plans using a higher F.A.R. than 0.25 for the residential areas of Ashton. You are on the front lines for holding the zoning at the lowest densities for areas where more housing means more cars. Environmentally-conscious planning could save our children from facing the next existential crisis. Please pay attention now.

Sincerely,
Paula Glendinning
Ashton, Maryland
Dear Jamey and Benjamin

As a resident of Ashton / Brinklow / Brookeville (specifically Brinkwood Rd), I'd like to share my support of the development of the Ashton Village Center. Our neighbors are a warm community of Montgomery County that has to travel to Burtonsville, Olney, Clarksville (Howard County) or Columbia (Howard County) to "take care of personal business", supporting other towns and other Counties.

I come through Ashton at least 4 times a day and the benches in front of the 7-11 are the current best place to gather that I can think of. Is that a proper community space?

It has been nice to recently add a CVS and it will be nice to have future options for restaurants (as much as I love El Andariego) and places to shop / run errands. I worry the folks that are opposing any development would be blind to the various local benefits that would improve our fine area.

I would me more than willing to expand upon this if so desired, but will remain brief to state it simply. My cell phone is 301-252-4143

Sincerely,
Andy Bartley

Messers Pratt and Berbert,

This correspondence is to voice my enthusiastic support for the Ashton Village Center Sector Plan as it exists currently. It is my understanding that at this 11th hour, additional amendments have been proposed by some who still oppose this development. I have lived in Montgomery County for 40 years. My home is just 2 miles north of the project site. I understand traffic patterns will be disrupted during construction and will most likely be altered once Ashton Village is open for business. But these inconveniences are well worth the benefits our community stands to gain. I navigate through the New Hampshire Avenue – Route 108 intersection each day. With some careful planning and county cooperation, the additional traffic should be manageable. In my opinion, we live in the best part of Montgomery County but we are greatly underserved by retailers and restaurants. We live in a food desert. A mixed use, community meeting place like Ashton Village is sorely needed and will greatly add to the overall quality of life for all of us in the Ashton, Brookeville and Olney region.

Mike Miller

mike.miller@washingtonexpress.com
Good morning Mr. Pratt and Mr. Berbert,

It is time to make Ashton a viable place to meet, greet, shop and eat!

My family and I have lived up New Hampshire Avenue in Brookeville for the last 17 years. We have been hoping for an Ashton Village for years!

The fact that Sherwood High school kids have to walk to the other and only shopping center at New Hampshire and 108 at their own peril is ridiculous! It is time for a place on the same side as the high school where kids can go and it is time for sidewalks!

We need a user friendly community in Ashton so let us build it!

We have so many people who live in walking distance to that area! Give them a place to walk too, gather and shop.

It is time to stop dragging this on and let's make it happen! Sidewalks, shopping, housing, common areas...a place for families to gather.

Thank you for your time,

stay healthy,

best,

Victoria Copeland and family

Good Day,
I am writing today to offer my support to Ashton Sector Plan as put forth by Fred Nichols. Mr. Nichols plan provides residential and commercial development fitting for a semi rural area such as Ashton. One only needs to look at the development of Christopher’s Hardware and the Nichols Building to get a sense of the care he takes in preserving the rural feel of Ashton. The Sector Plan he has developed will do the same. Of course, there will always be those that oppose any development, but Nichols’ plan provides a common sense development plan was for Ashton.
Sincerely,
Thomas Bartley

Dear Chairman Anderson and Planning Commissioners,

I am writing to voice my deep concern over the concepts for the Ashton Village Sector Plan presented by Planning Department Staff at the January 29 community meeting. I agree with the Staff’s stated vision to “maintain the existing small-town character of Ashton with appropriate design and density recommendations.” My concern is that Staff’s proposals do not achieve this vision—in fact they undermine it.

The higher density designs proposed by the planning staff do not reflect what was asked for at the Community Meeting in October 2019 – a walkable, bikeable rural village town center with open space and community gathering space.

- Ashton’s small-town character is created by a pattern of residences, businesses, and open spaces clustered around the crossroads of New Hampshire Avenue and MD Route 108.
- Developed land in the area consists almost entirely of single-family homes, affordable townhouses, single story retail.
- Currently the developed land in Ashton is interspersed with open space and trees.
- The Staff’s proposals are crammed with large, out of context buildings across the entire southeast corner.
- Proposal has insufficient transitions from taller buildings to the existing homes at the edges.
- Staff’s open spaces are too small and in some scenarios are not visible enough from the roads.
- Staff’s proposal to decorate the buildings with rural village architectural elements, such as front porches and dormer windows, cannot be guaranteed and would not disguise the extreme density.
- It is extremely unlikely that any design language written into a master plan will be able to truly control the final outcome. Heights, massing, architectural elements, open space can all change (see the “open space” in Thomas Village that consists of paver stones with two benches).
- Stormwater management has not been addressed with this future loss of open space, which will be replaced by impervious surfaces and buildings. There has been increasingly unpredictable weather and unprecedented flooding (eg Ellicott City, parking garages in Maryland).
- The proposed additional 100+ units likely translates to at least an additional 200 cars as most families have 2+ cars.
- The only transit to the area consists of a few buses each day to Silver Spring Metro, so many of the new inhabitants of the proposed development will be commuting by car. Additional mass transit is unlikely to our area, given tight budgets and the fact that residents really need cars to reach shopping, as well as jobs.
- Traffic currently backs up at the intersection and many in the area must plan their commutes to avoid this, if they have that luxury. Those with school-aged children likely can’t avoid the traffic.
- The current traffic load doesn’t yet reflect the impact of the Porter Road project.
- Staff proposes this development to fill the Missing Middle with housing out of character.
with Ashton such as apartment buildings and massive townhouse blocks

- The Planning Board’s report says Missing Middle housing should be located close to transit and jobs, and Ashton does not provide this context.

Sincerely,

Clare O’Neill

- The only transit to the area consists of a few buses each day to Silver Spring Metro, so many of the new inhabitants of the proposed development will be commuting by car. Additional mass transit is unlikely to our area, given tight budgets and the fact that residents really need cars to reach shopping, as well as jobs.
- Traffic currently backs up at the intersection and many in the area must plan their commutes to avoid this, if they have that luxury. Those with school-aged children likely can’t avoid the traffic.
- The current traffic load doesn’t yet reflect the impact of the Porter Road project.
- Staff proposes this development to fill the Missing Middle with housing out of character
with Ashton such as apartment buildings and massive townhouse blocks

- The Planning Board’s report says Missing Middle housing should be located close to transit and jobs, and Ashton does not provide this context.
- Our small area has done its part to ease the housing crisis in Montgomery County through Sandy Spring Meadows, Thomas Village, and the (approved but not yet built) Porter Road Projects. Additionally, Porter Road includes MPDUs in its design.

A very concerned resident,

Jamey

I am writing in support of the potential of a new Ashton Village Center. I have been a resident of Ashton for over 20 years and frankly my family is tired of having to drive to other cities to socialize. The popularity of town centers is obvious as all communities across the area embrace the idea of staying local to shop and eat at restaurants. Ashton needs a place where we can all walk to or a short drive and then visit with friends. The center should include an outdoor area.

I have raised three kids in Ashton. We are a proud Sherwood family but frankly it drives me crazy when I needed to drive them to Rockville or Gaithersburg to go to a safe area where they could congregate with friends. We need that in Ashton!

The current Corona Virus emergency only adds to this desire. We will emerge from this crisis and the community will want a local resource to use as we reconnect. It needs to be local. Thank you for your consideration to my points.

Tom Dunwoody
Dear Mr. Pratt and Mr. Berbert,

I am a long time resident of Ashton, MD. I have been a part of this community since 1999. I have also been very active, having served as PTA president for Farquahr middle school for 3 years as well as a volunteer for the Sandy Spring Garden Club and both Sherwood Elementary and High School. I also volunteered and provided input that eventually gave the proposal you have now.

The corner of Rte. 108 and New Hampshire Avenue has long been an eyesore and it does not reflect the climate of our community. Residents of Ashton are active, involved and very proud of the history that exists here. We walk the trails and neighborhoods, work-out in the parks and actively support our wonderful Sandy Spring Museum. This bustling supportive community is NOT reflected at the corner of New Hampshire Avenue and Rte 108.

Our homes are beautiful but the retail on our corner is not. Our kids do not have a sidewalk to go from the school to the 7-11 (the school is less than 1/2 mile from the corner). I have long been in favor of the Meeting Place because:

1. The village center needs more people and activity so it really feels like the center of the community.
2. We need more retail and restaurant options.
3. It would be great to have an outdoor space for community gatherings.

Please APPROVE the proposed plan for the Ashton Meeting Place. This community really needs it!
Hi!

We have lived in Ashton for two years. We see value in adding to the retail/office space in the area as we think it is beneficial for property values and other conveniences. I am concerned with what bringing in so many housing units to the corner of NH and 108 will do to the already crowded congested intersection with no new additional turn lanes or provisions for what will be additional cars on the road during busy times.

With the proximity to Sherwood High School and the fact that 108 is a connector to route 32 in one direction and the ICC in the other this area has a lot of traffic issues in the morning and the evening. My boys attend Good Counsel High School and Farquhar Middle School so we make a left in the mornings from NH onto 108 and it can take 2 or 3 left turn signals to get through the light as it is.

This intersection is a free for all now with two lanes merging into one in front of the Exxon station where cars routinely speed up and cut other cars off.... cars turning right on red in front of the same Exxon station combining with those merging lanes. Cars turning left onto 108 from then left turn lane and because the light is so short cars have started using the middle lane to turn left as well because it is not designated as a straight only lane and then merge into the turning lane after turning left in front of the 7-11. Not to mention the cars entering from the 7-11 parking lot and merging in with ongoing traffic. I have a new driver in the house and it is impossible to anticipate all the things he needs to learn to navigate that intersection as it is now.....spend some time there during rush hour and you will see what I am talking about. It is unreal.

Adding 100-150 additional housing units using this corner intersection and it will be gridlock and I am concerned about what that means for those of us living here. What are the plans to address congestion and safety as it pertains to this intersection.

We also need to address pedestrian safety at this same intersection as Sherwood students routinely are running across the road to the 7-11 not at the light but before the light and it’s just not safe for them. With the new retail establishments this will become more of a walking area between the various shopping areas and this needs to be addressed. You would only know these things if you experienced this intersection routinely during rush hours which is why I am bringing this to your attention.

I would appreciate a response as it pertains to traffic and pedestrian safety.

Thank you.

Hello Mr. Pratt and Mr. Berbert,

I live in Brookeville area, very close to Ashton. I wanted to express my full support for Ashton Meeting Place, and I am excited to see its progress. I feel this development will offer a great place for people to gather to enjoy a cup of coffee, a nice meal, pick up food to take home, or simply enjoy time together in a nice outdoor space. The plans demonstrate that it will be an aesthetically pleasing, upscale development which the community can enjoy for years to come. The architectural design of Christopher’s Hardware store and the Nichols Building provided substantially improved quality and design, while at the same time maintaining a quaint, small-town experience for the community. While this is a larger scale development with the potential for more impact on traffic, I believe the overall benefit will far exceed any disadvantages. While we live in a nice part of the county, our retail and restaurant options are very limited. Whenever there is talk of new restaurants and shopping, the community is abuzz with this news because we typically have to drive a minimum of 10 to 20 minutes to enjoy these amenities. The luxury homes planned will offer options for those that do not care for more typical single-family homes in the area and want to live in a walkable neighborhood that offers more amenities. We are fortunate that this developer lives in the community and deeply cares about providing a development that is attractive, provides the amenities the community wants and needs, and will serve as a community hub.

Thank you,
Julia Miller

I find the plan for the Ashton Meeting Place as part of the Ashton Village Center to have significant benefits to the local community. Not only will it bring a variety of housing options but will bring needed retail and restaurant options and a place for community gatherings. The Nichols Construction Company did a nice job with the Christopher’s Hardware store and the townhouses in Sandy Spring and I think the Ashton Meeting place will turnout well.

Hi Jamey,

It is incredible that the utility pole has not been dealt with. Before the CVS turning north from traveling west on 108 onto 650 for an 18 wheeler was impossible, road strip threshold close too intersection. The 18 wheeler traveling east on 108 to 650 north was some what OK because there was no physical curb to go north, more turning room, because of lots of road shoulder (not technically the official road plan). Now CVS comes in and the physical road for all turns became narrow because of curbs (to accommodate storm water). So now with the new CVS no 18 wheeler or any truck with a trailer traveling west on 108 turning to go north on 650 can make the turn. So the very mindless astute SHA folks decided to move the south bound stop signal threshold line back north on 650 because of the pole. In a typical morning, given there are many landscape business north of 108/650, all trucks with trailers, now one car and one of these truck-trailers in a line at the stop light causes the entrance to the 7Eleven/Dempsey to be blocked. Remember drivers do not care exactly where the stop threshold is just as long as they are close enough, can stop and they can get to their cell phone messages. The reverse happens in the evening. The entrance to 7Eleven/Dempsey parking lot is now constantly blocked causing the 650/108 intersection to be a problem because of the pole that the CVS construction never dealt with.

Yes a mindless SHA traffic engineer can add car/truck lengths, so can I, spend more that an hour at the intersection at rush hours observing really what is happening and what type of vehicles are at the intersection and you might actually prevent problems.

I travel though this intersection every day during rush hour by car. I also ride my bike through this intersection on the weekends.

I am sure you know there are no pedestrian cross walks at this intersection, as a planer you better.

The folks that developed the CVS hid the utility pole problem, everyone with half a brain who truly lives here knows it is the problem in the 650/108 intersection. How this got beyond county planners is dumbfounding.

Because this utility pole is still at the exact same coordinates after the CVS construction demonstrates the failure of the planning board review system.

But we are going to be quibbling about building height issues and the definition of a rural village when the CVS construction created true physical problem?

Hope this input is valuable.

Tim

Tim,

I looked through the documents related to the CVS Ashton project. Nothing I could find in there mentioned the utility pole. The staff report contains letters from both MC DOT and SHA and neither of them discuss this pole. I guess the applicant was able to meet their requirements within the existing pavement near that pole so did not have to do anything
My question to you: how does the pole by CVS end up affecting the traffic going in and out of the 7-Eleven parking lot? Just trying to understand how the two are related.

Also, for your email address, I understand that thbegley is the correct spelling. What I was asking about is the way your name is spelled on the From line of emails that come from you. This is something you never see when you are sending a message, but it is how the recipient sees your name. I was suggesting that perhaps your last name is misspelled within your account settings for gmail and thought you might want to correct it within your Google/gmail account. You can see what I’m talking about just below this sentence in the From line of your email to me.

Jamey,

How did that CVS project go forward without the requirement to move that utility pole? Because that was left were it originally was it has created many traffic issues getting in and out of 7Elleven/Dempsy parking lot. Now that was very bad planning.

Jamey, Ben, I would like to express my support for the Ashton Village Plan as shown at the community meeting earlier this year. I think it is a well thought out plan. The community needs more diverse housing, commercial and retail space. This plan will add to the traffic but not to the extent that will cause to much congestion.

Please express my support for the plan.

Thanks, Carter

Jamey/Benjamin:

I am a life long resident of Ashton, MD and our 50 acre family farm, which happens to be the only working farm left in Ashton, has been in the Conner family since the 1920s. I have seen many changes in Ashton over my 59 years, and have welcomed the growth. Many of the people who are opposed to this development are also lifelong residents of Ashton/Sandy Spring who at one time owned large farms, and sold them to housing developers for profit which has eliminated the rural character they are now disingenuously trying to retain.

My entire family is looking forward to having a true center of our community as the outdated 7-11 anchored "shopping center" does not suffice as the cornerstone of our town. More retail and restaurant options would most certainly be welcomed in this town, and we are afraid that if this proposed Meeting Place falls through, the developer will probably sell the property to a large big box firm, and we will end up with another pharmacy or worse.

I have reviewed the concept plan, and the renderings are tasteful, with a great mix of housing types and some great outdoor space where we can have town gatherings and meetings and our kids can meet with their friends.

I think the overall concept for this planned development is a huge win for our town and we cannot wait for work to begin!

Respectfully,

--

Dear Chairman Anderson and Planning Commissioners,

As active Ashton community members, we attended the Ashton Village Center Sector Plan Kick-Off Meeting, the Design Workshops in October 2019, as well as the Community Meeting on preliminary recommendations in January 2020. We are members of the Sandy Spring Rural Preservation Consortium (SSARPC) that hired Anthony Catania, RA of Michael Watkins Architects, LLC to design the well-received plan presented at the follow-up community meeting. It has been a pleasure to work with Fred Boyd and wish him well in his retirement. We participated in the development of the 1998 Sandy Spring Ashton Master Plan and now look forward to working with Benjamin Berbert the acting supervisor and Jamey Pratt the new lead Planner for Ashton as well as Roberto Duke remains as the community designer for the plan.

We would like to repeat the unanimous opinion voiced at the final community meeting which expressed total dissatisfaction with any plan that:

1. Failed to comply with the primary goals of the Master Plan. Specifically, as it relates to requiring any development that does not support and maintain the rural character of the area as well as complimenting the current surrounding patterns of development.

2. Caused added traffic congestions and road safety concerns to already nightmare traffic delays.

3. Did not include safe walkable, bikeable and well-designed intergenerational open space and playground areas. (This is a perfect location for the community-gathering place or park that Ashton needs.)

4. Ignored that total lack of suitable public transportation.

5. Failed to recognize that the oversized Thomas Village and Porter Road developments were approved with little or no regard for the pleas from the community to limit the height and square footage of the structures.

Clearly the number of units that could occur on the southeast corner of the intersection of Route 108 and New Hampshire Avenue as a result of potential provisions of the plan is completely inconsistent with the nature of a rural village. The potential for 100-150 units with the corresponding massing and building heights, along with the safety and other impacts will create a chaotic increase in auto and pedestrian traffic at the intersection of Route 108 and New Hampshire Avenue. It is most alarming that the
proposed development would add two more entrances onto Route 108 and New Hampshire Avenue, bringing the total to ten!

Our community respects and supports the county’s efforts to meet the growing population’s need for housing. After careful review of The Missing Middle Housing Study it is clear that the idea of having a mix of housing types and the concept of providing housing units that are affordable as outlined in “The Missing Middle Housing Study,” is appealing, but this site is NOT the proper place to implement such a strategy.

This location does not offer many of the requirements specifically stated in the Study: It is not:

1. Along major transportation corridors, where Missing Middle housing can serve as a transition between busy thoroughfares and neighborhoods on internal streets.
2. At the edges of single-family residential neighborhoods adjacent to other more dense uses and building typologies, so as to provide a transition between land uses.
3. Within a certain distance of transit and transportation alternatives such as bus, bus rapid transit, Metro and Purple Line light rail.
4. Able to offer a limited number of typologies within single-family neighborhoods, e.g. accessory dwelling units or duplexes.”

The southeast corner of New Hampshire Avenue and Route 108 does not meet any of these criteria.

In closing, our primary concern is the size and number of units of any potential development on the southeast corner which we fear that it will be inconsistent with the existing development on the other corners in scale and scope. The current FAR of .25 for residential development for the southeast corner is more appropriate for a village crossroads that will reflect Ashton’s unique character. If the Planning Board ignores the community’s input and a developer is allowed to increase it to permit a residential FAR of .5 or as has been suggested to .75, they would consent to a massive housing development destroying Ashton’s unique rural character.

Thank you for your time and kind attention.

Jamey Pratt
Ashton Village Center Sector Plan Lead

RE: Ashton Village Center – Master Plan

Dear Mr. Pratt:

I am writing in opposition to the proposed changes to the Ashton Village Master Center Sector Plan presented by the Planning Department Staff at a community meeting on January 29, 2020.

During the January 29 meeting, the Planning staff stressed the need to increase the housing stock within Montgomery County, the need to address the “Missing Middle” and the need to address Project Zero.

*I recognize the importance of these goals, however the zoning proposal put forward by the Planning staff should be rejected as it would inextricably change the nature and character of the small Ashton village and in actuality is out-of-sync with the perspective of the Ashton residents and out-of-sync with the goals of the County.*

Under specific consideration is the Ashton Village Center, which as presented by the Planning staff, is approximately a 1/3 mile radius from the center of the New Hampshire and Route 108 intersection. Using this radius, the Planning staff put forward a recommendation which would add nearly 100+ families to the Ashton Village Center. This is would increase the density of the Ashton Village Center by over 100%. The proposed doubling of density would be in addition to the 20% density increase that Ashton Village Center has already absorbed through the Porter Road Project – which is adding over 20 housing units and retail space directly adjacent to the New Hampshire/Route 108 intersection.

Asking a small village like Ashton to increase housing stock to address the needs of Montgomery County is reasonable. Asking a small village like Ashton to help address the Missing Middle is also reasonable. But asking any community – Ashton, Silver Spring, Rockville, Olney, Germantown, Gaithersburg or any other community in Montgomery County to increase housing stock by 100% is simply **not reasonable**. You cannot double the density of a community without altering the very nature of the community. Nor should you reasonably ask a community to accept, on a percentage basis, density increases which outstrip and would overwhelm the resources of the community.

A reasonable solution to this issue, would be to leave the zoning for the Ashton Village Center as it currently stands, which would allow for an appropriate increase in the housing stock in Ashton, in a manner which is consistent with historic nature of the Ashton Village and in a manner which is consistent with the existing master plan for Ashton.

Another issue associated with the Planning staff’s recommendation is the inevitable increase in traffic that would accompany significant density increases. The Planning staff was, at best circumspect, regarding any potential road improvements or other infrastructure improvements needed to accommodate an additional 100+ families. As proposed, the 100+ families would be closely packed into a small corner parcel which borders a heavily used intersection. Wait times at the New Hampshire/Route 108 intersection are currently measured not in seconds or minutes but rather in the number of light cycles that you are required to endure. In addition, the intersection already has a large number of “blind spots” which must be carefully navigated to avoid collisions. The addition of 100+ families, and 200+, cars in Ashton Village Center would negatively, not positively, impact Project Zero.
The type of housing stock proposed by the Planning staff is inconsistent with the housing stock envisioned by the current Ashton Master Plan. The current plan envisions homes/buildings which are height restricted at 30 feet and are consistent the historic and rural nature of Ashton. The multi-level apartment buildings, duplexes, and large three and four-story townhomes contemplated by the Planning staff are simply out of character and would unnaturally dominate the Ashton Village Center. Furthermore, the current plan does not ensure/guarantee that the housing stock that a developer would build, would in fact address the issues associated with the Missing Middle housing stock. All recent townhomes built in the Ashton/Sandy Spring area have been $700,000+ townhomes. If the issue of affordable housing is a real concern for Montgomery County, I would offer up that the smaller, historically accurate cottage style homes, associated with Ashton would be better suited to address the Missing Middle problem.

The issue regarding affordable housing for the Missing Middle is important. But as contemplated by the County, efforts to address the Missing Middle are to be focused in areas which have adequate/appropriate public transit and adjacency to commercial/business centers to support employment opportunities. Ashton Village Center is a very small village with a single bus line, and no significant employment opportunities. We have a few small businesses, but we do not have the employment base needed to absorb 100+ families contemplated by the Planning staff. Significant increases in Ashton’s density, which doesn’t have access to adequate public transportation, will only exacerbate a traffic problem which is tenuous at best as the 100+ new families would be required to commute out of Ashton for employment opportunities. This single issue, in and of itself, should be justification enough to stop the planned rezoning/development of Ashton Village Center.

There are a host of other issues with the rezoning concepts which I could expand upon:

- Insufficient transitions between overly large buildings to smaller buildings.
- Insufficient open space.
- Overly broad language, lack of specificity, which would not provide adequate protection of the rural and historic nature of Aston.
- Increases in impervious surfaces, which will would have decremental effects on the fragile watershed which runs through Ashton.

I am fully cognizant of the need for change and progress. I recognize that every part of Montgomery County needs to do its part to support sustainable growth. But the current proposal is placing too much of the burden on Ashton. The plan is not a fair, as it would impose a material change upon the members of the community who deliberately moved to Ashton because is it inherently different from the rest of the County.

Thank you for your time and consideration.

Walt Fennell
17513 Hidden Garden Lane
Ashton, MD 20861
Waltster65@yahoo.com
Dear Planning Board members and staff,

I am writing this as the Planning Department staff is preparing for a talk session with the Montgomery County Planning Board on April 16, presumably to solicit further direction from the Board as planning staff presents its preliminary findings and tries to finalize its proposal for a new Sector Plan for the Ashton area. Residents in the area have made sincere and continuous efforts to participate in the planning process. Dozens of us attended presentations by the Planning Staff and three days of design workshops. The overwhelming consensus of those meetings and of the community at large has been to express a strong desire that zoning for the area preserve Ashton’s rural character, which was one of the main goals articulated, from the very beginning, as the Sector Plan process was announced.

At a meeting with the community on January 29, 2020, Planning Staff made a presentation of alternative scenarios that they are considering for the critical southeast corner of the intersection of Route 108 and New Hampshire Avenue, which forms the centerpiece of the community, and is the eastern gateway to the Sandy Spring/Ashton area. Planning staff rejected a plan – paid for and proposed by a group of neighboring residents – with lower building heights, more green space, and a rural village feel. Planning staff instead offered two preliminary proposals for that corner, one of which proposes 101 dwelling units (68 of which are apartments massed in large buildings) for the less than 8 buildable acres of the property (about 1.5 acres of the site is an environmental buffer, at the southeast corner of the property). The other proposes 67 units for the same space. The community proposal, and the planners’ preliminary proposals, are available at https://montgomeryplanning.org/wp-content/uploads/2020/02/Development-Scenarios-Handout-2020-01-29-1.pdf.

Planning staff has justified its proposal as a measure addressing the County’s creditable effort to provide housing for the “missing middle.” As a nearby resident, I back this effort, but believe that the effort should concentrate on building homes in areas that are close to employment centers and mass transit centers. In our area, traffic chokes the roads with school traffic (there are at least for high schools in the immediate area) every school-day morning and afternoon. No one can go shopping, or to school, or to work except in an automobile, and the prospects for sufficient mass transit to service even the existing residents of the area are nonexistent, realistically. The area is far from any employment centers. To sacrifice the rural feel of our area in order to build numerous apartment buildings in our rustic area – on a tract that has never been anything but open space – would be a travesty.

Community residents offered an alternative that would be tasteful, would increase the sense of community, and would provide attractive, lower-cost bungalow-style homes clustered around a village green that would be affordable and maintain a small-town feel. We understand that we cannot dictate to property owners the type and style of buildings that they are permitted to erect.
We are willing to work with the developer to come up with a mutually acceptable plan that avoids the kind of building and population density that is represented by the Planning Staff preliminary proposals. To date, the developer has not agreed to share with us any proposal, or his desires for the property.

Please, in your discussions with the Planning Staff on April 16, 2020, I beg you to ask questions and provide direction to Planning Staff designed to elicit development standards that limit the density of the development on that corner and that will not result in creating a population center that will be out-of-character with the area, and a colossal increased strain on traffic and infrastructure. The plan approved for the property in 2008 call for a FAR of .28, nearly all of it commercial property. That plan represented a compromise for the community. The current plan we propose, now that commercial development is no longer as marketable, has a FAR of about .25, with most of the square footage being residential (consistent with existing zoning on the property at .25 for residential, for most of the property). The goals we seek, and which the Planning Board should re-enforce, are to create a walkable, bikable primarily residential community with ample green spaces visible from public thoroughfares, with buildings of a style and scale that is consistent with a small town.

Sincerely,

Doug Farquhar

Benjamin/Jamey –

As 40+ year residents of eastern Montgomery County and 20-year residents of Ashton, we are writing to strongly support the proposed changes to the Ashton Village Center Sector Plan. It is our view that these changes are long overdue and will facilitate more connectivity and activity in our beloved town. The prospect of new retail stores and additional housing at the corner of New Hampshire Avenue and Sandy Spring Road is very exciting for the community. Our town needs more places for community engagement, work opportunities for young people and housing opportunities for families that want to call Ashton home. We believe that the proposed Sector Plan changes promote these worthwhile goals. Please approve the approved changes.

Thanks,
Steven & Meryl Bolen
17508 Skyline Drive
Ashton, MD  20861
I live in Ashton and have serious concerns about the density that is recommended by the developer. I purchased my home to have that edge of country feel and the massive changes to the development feel very different than what I bought into. I feel the developer is getting away with a lot of exceptions over here that do not seem in the spirit of the neighborhood. Also knowing there are no state road improvements happening this is just insane. Traffic is a mess already, it’s hard to get out of my driveway.

I own 127 Onley Sandy Spring Road. I would like to know what changes to my property are being considered with the new zoning. My property is just under 3 acres total. I pay full tax rate but I am not allowed to even bush hog the back parcel. Is there any consideration that can be made for my property while Mont CO is redesigning the entire area?

Also if a sidewalk is going onto my property doesn’t someone need to contact me about purchasing the amount of property needed for said sidewalk? I have not heard anything.

HOPE LYNCH

April 7, 2020

Dear Chairman Anderson and Planning Board members:

I am writing to express my thoughts on how the Ashton Village Sector Plan should be implemented to best serve our community.

As a Sandy Spring resident, and a longtime homeowner along Route 108, Ashton is my stomping grounds. I use the bank, the dry cleaner, the post office, and frequent the pharmacy and restaurants. The intersection of Route 108 and New Hampshire Avenue is a hub of community activity.

It would be nice if we could inherit development in this neighborhood that reflects the area’s cherished legacy of rural character--- for that is why we all live here. In a world just busting to overdevelop, let’s find a compromise in which developers marginally win their higher residential FAR and the community finally wins the right to contribute to what that density looks like. I believe we could find common ground if allowed to participate in the planning process for what will most certainly be a profoundly different landscape for our community.

For many of us, what happened to Sandy Spring Village is a heartbreaker. I am not proud that our community did not do enough to stop the gross overdevelopment of Thomas Village. (That would be more than 3,000 sq. ft massive townhomes that overshadow and diminish abutting homes and historic buildings.) Clearly, it does not make sense to write letters of vehement opposition, as my family did, to no avail.

This time my request is simple: let’s work together to make Ashton Village something we can all be proud of.

Please do not push on our community what you think we should become. We need a plan that reflects the best hopes of both parties.

Let’s get a plan that shows that the Planning Department has heard at least some of what the community has been asking for at the many meetings and workshops we have all attended in the past nine months.

Thank you for your consideration

Terry Franklin

Sandy Spring/Ashton Overlay Zone versus CRN Zone

The following uses are **allowed** in the CRN zone but **prohibited** in the Sandy Spring/Ashton Overlay Zone. “L”, “C” or “P” after the listed use means Limited, Conditional or Permitted. Note that virtually all uses allowed in the CRN zone but prohibited in the overlay zone are either Limited or Conditional uses.

- **Surface Parking for Use Allowed in the Zone 3.5.9.C (L)**
  - Limited use means the parking setbacks must accommodate the landscaping required under Section 6.2.9.

- **Recreation and Entertainment Facility, Indoor (Capacity up to 1,000 Persons) 3.5.10.F (C)**
  - Extra conditional use requirement is:
    - The Hearing Examiner may deny the application if it finds the use would be inconsistent with the intent of the zone due to the facility’s size, intensity, level of noise, traffic activity, hours of operation, or lighting.

- **Recreation and Entertainment Facility, Outdoor (Capacity up to 1,000 Persons) 3.5.10.G (C)**
  - Extra conditional use requirements are:
    a. In the Commercial/Residential, Employment, and Industrial zones, in addition to screening under Division 6.5, when the use abuts a lot in any Residential zone, a solid wall or solid fence a minimum of 6 feet in height must be constructed and maintained between the use and the lot line.
    b. Parking must be sufficient to accommodate the number of people participating in the events.
    c. The Hearing Examiner may deny the application if it finds the use would be inconsistent with the intent of the zone due to the facility’s size, intensity, level of noise, traffic activity, hours of operation, or lighting.

- **Retail/Service Establishment (Up to 5,000 SF) 3.5.11.B (P)**
  - Limited use in the CRN zone means:
    a. If the subject lot abuts or confronts a property zoned Agricultural, Rural Residential, or Residential Detached that is vacant or improved with an agricultural or residential use, site plan approval is required under Section 7.3.4.
    b. A Retail/Service Establishment over 15,000 square feet of gross floor area must be a grocery store.

- **Light Manufacturing and Production 3.6.4.C (L)**
  - Specifically prohibited in the overlay zone:
    - newspaper, printing, and publishing
  - Limited use means:
    - If the subject lot abuts or confronts a property zoned Agricultural, Rural Residential, or Residential Detached that is vacant or improved with an agricultural or residential use, site plan approval is required under Section 7.3.4.
- The only light manufacturing uses allowed are:
  a. brewing alcoholic beverages up to 22,500 barrels a year; and
  b. distilling alcoholic beverages up to 50,000 gallons per year.

- Pipeline (Above Ground) 3.6.7.C (C)
  o Extra conditional use requirements:
    a. The proposed pipeline is necessary for public convenience and service.
    b. The proposed pipeline will not endanger the health and safety of workers and residents in the community and will not substantially impair or prove detrimental to neighboring properties.

The table below shows all uses **prohibited** by the overlay zone that are **not permitted** in the CRN zone.

Notes
* Includes approved SF from Ashton Market (site plan 820180160)
** The Ashton Meeting Place plan (site plan 820080040) showed 353,778 SF for the gross tract area of which 27,301 was prior dedication. The 53,325 SF RC-zoned parcel was included in the plans but not all of the tables show it. The GTA in C-1 was shown as 207,150 SF and in R-60 as 146,620 SF. Staff calculates 393,280 SF here for a difference of 13,135 SF.
*** Actual yield would be slightly lower based on future dedication for NH Ave and other streets. Calculation already includes some prior dedication not shown.
### Development Yields: CRN-0.25 C-0.25 R-0.25 H-35 to 45
