## SUMMARY

- Background: On April 21, park planners provided the Planning Board with an overview of the staff draft park master plan, discussed what staff learned during nearly 2 years of extensive public outreach and community engagement, and shared high-level draft plan recommendations. During this work session, staff will present all the staff draft plan recommendations including proposed time frames to implement those recommendations.
- Next Steps: The Planning Board will receive testimony on the plan during the Public Hearing on May 19. Park planners will then summarize the testimony for the Board to discuss during a plan work session scheduled for June 9.
