I am concerned that the sidewalk down Tuckerman is not being built in a quicker manner. The increase in population, size of businesses, parking scarceness, Cabin John shopping center with inadequate parking has exploded exponentially!

Families do not allow their children to bike to Cabin John shopping center.

. Children are driven to schools because of fear crossing Tuckerman. It is just unsafe to walk to Cabin John and to get on/ off ride on bus. On weekends there are tremendous number of cars parked on Tuckerman for children to go to sports activities at Hoover CHS . It is unsafe pulling out of side roads into Tuckerman during this time because you can not see on coming traffic clearly.

Tuckerman lane has many houses that face the street and need on street parking. It is unclear why Tuckerman lane is best location for bike path?? Both Montrose Parkway, Democracy Road as well as Bells Mill Road have more space and less houses facing these roads. If Tuckerman Lane is the best location for bike path plus sidewalk should you consider making Tuckerman Lane a one way street?

I am concerned that we are competing with higher populated areas and getting less attention for funding and completion of necessary sidewalk. There needs to be a pedestrian pathway from Fall Road down Tuckerman Lane to Old Georgetown Road!!

We who live near Tuckerman Lane are not getting adequate tax money use for necessary adequate pedestrian walking. We are being short changed! I am concerned that any planning, funding, completion of pedestrian walkway will be out of date and not meet the needs of this fast growing community!

Please act promptly and use our taxpayer dollars wisely !

Sincerely,
Kathleen Van Aalten, M.D.
