

Montgomery County Planning Board

THE MARYLAND-NATIONAL CAPITAL PARK AND PLANNING COMMISSION

MCPB No. 23-029
Forest Conservation Plan No. CU202305
Free Rein Solar Farm
Date of Hearing: March 30, 2023

APR 25 2023

RESOLUTION

WHEREAS, under Montgomery County Code Chapter 22A, the Montgomery County Planning Board is authorized to review forest conservation plan applications; and

WHEREAS, on November 14, 2022, Free Rein Solar LLC (“Applicant”) filed an application for approval of a forest conservation plan on approximately 82.39 acres of land located at 5011 Riggs Road (“Subject Property”) in the Olney Policy Area and 2005 *Olney Master Plan* (“Master Plan”) area; and

WHEREAS, Applicant’s forest conservation plan application was designated Forest Conservation Plan No. CU202305, Free Rein Solar Farm (“Forest Conservation Plan” or “Application”); and

WHEREAS, following review and analysis of the Application by Planning Board Staff (“Staff”) and other governmental agencies, Staff issued a memorandum to the Planning Board dated March 20, 2023, providing its analysis and recommendation for approval of the Application, subject to certain conditions (“Staff Report”); and

WHEREAS, on March 30, 2023, the Planning Board held a public hearing on the Application and voted to approve the Application subject to conditions, on the motion of Commissioner Hedrick, seconded by Commissioner Piñero, with a vote of 5-0; Chair Zyontz, Vice Chair Piñero, Commissioners Bartley, Hedrick, and Pedoeem voting in favor.

Approved as to
Legal Sufficiency: /s/ Allison Myers
M-NCPPC Legal Department

NOW, THEREFORE, BE IT RESOLVED that the Planning Board APPROVES Forest Conservation Plan No. CU202305 on the Subject Property, subject to the following conditions:¹

1. The Applicant must schedule the required site inspections by M-NCPPC Forest Conservation Inspection Staff per Section 22A.00.01.10 of the Forest Conservation Regulations.
2. The Applicant must comply with all tree protection and tree save measures shown on the approved Final Forest Conservation Plan. Tree save measures not specified on the Final Forest Conservation Plan may be required by the M-NCPPC Forest Conservation Inspection Staff.
3. The Limits of Disturbance (“LOD”) shown on the Final Sediment and Erosion Control Plan must be consistent with the LOD shown on the approved Final Forest Conservation Plan.
4. Before the start of any demolition, clearing, grading, or construction for this development Application, whichever comes first, the Applicant must:
 - a) Record a Category I Conservation Easement over all areas of forest retention, forest planting and environmental buffers as specified on the approved Final Forest Conservation Plan. The Category I Conservation Easement must be in a form approved by the M-NCPPC Office of the General Counsel and must be recorded in the Montgomery County Land Records by deed.
 - b) Install permanent conservation easement signage along the perimeter of the conservation easements as shown on the FCP, or as directed by the M-NCPPC Forest Conservation Inspection Staff.
 - c) Execute a five-year Maintenance and Management Agreement (“MMA”) in a form approved by the M-NCPPC Office of the General Counsel. The MMA is required for all forest planting areas, mitigation tree plantings, including variance tree mitigation plantings, and landscape plantings credited toward meeting the requirements of the FCP. The MMA includes invasive species management control measures as deemed necessary by the M-NCPPC Forest Conservation Inspection Staff.
 - d) Submit financial surety, in a form approved by the M-NCPPC Office of the General Counsel, to the M-NCPPC Planning Department for the 1.5 acres of new forest planting and mitigation trees and maintenance, including invasive

¹ For the purpose of these conditions, the term “Applicant” shall also mean the developer, the owner, or any successor in interest to the terms of this approval.

species management controls, credited toward meeting the requirements of the FCP.

5. The Applicant must install the Afforestation/Reforestation plantings as shown on the approved FCP, within the first planting season following the release of the first Sediment and Erosion Control Permit from the Montgomery County Department of Permitting Services for the Subject Property, or as directed by the M-NCPPC Forest Conservation Inspection Staff.
6. Within the first planting season following the release of the first Sediment and Erosion Control Permit from the Montgomery County Department of Permitting Services for the Subject Property, or as directed by the M-NCPPC Forest Conservation Inspection Staff:
 - a. The Applicant must install the variance tree mitigation plantings on the Subject Property as shown on the approved FCP.
 - b. The variance tree mitigation plantings must be a minimum size of 3 caliper inches totaling 11.25 caliper inches, as shown on the approved FCP. Adjustments to the planting locations of these trees is permitted with the approval of the M-NCPPC Forest Conservation Inspection Staff.
7. Impervious surfaces are limited to no more than 10.0 percent within the transition area of the Patuxent River Primary Management Area ("PMA") of the Subject Property as shown on the Impervious Surface Plan dated February 7, 2023.
8. Before the start of any clearing, grading, or demolition on the Subject Property, the owner of the Subject Property must enter into an agreement with the Planning Board to limit impervious surfaces within the transition area of the Patuxent River Primary Management Area ("PMA") on the Subject Property to no more than 10.0 percent, as shown on the Impervious Surface Plan dated February 7, 2023. The agreement must be in a form approved by the M-NCPPC Office of the General Counsel and recorded by deed in the Montgomery County Office of Land Records.

BE IT FURTHER RESOLVED that having given full consideration to the recommendations of its Staff as presented at the hearing and/or as set forth in the Staff Report, which the Board hereby adopts and incorporates by reference (except as modified herein), and upon consideration of the entire record, the Planning Board FINDS, with the conditions of approval, that:

1. The Application satisfies all the applicable requirements of the Forest Conservation Law, Montgomery County Code Chapter 22A, and ensures the protection of environmentally sensitive features.

A. Forest Conservation

The Board finds that as conditioned, the Forest Conservation Plan complies with the requirements of the Forest Conservation Law.

The net tract area for the project is equal to the Property size of 82.39 acres minus the amount of land to remain in commercial agricultural production, 74.87 acres, for a net tract area of 7.52 acres subject to Chapter 22A. Within the net tract area is 0.30 acres of forest.

The project proposes to clear 0.30 acres of the existing forest. Based on the land use category of Agricultural Resource Area (ARA) and the applicable afforestation and reforestation thresholds (20% and 50% respectively), the application generates a 1.50-acre planting requirement. The applicant is proposing to meet the entire 1.5-acre planting requirement on the overall parent tract.

B. Forest Conservation Variance

Section 22A-12(b)(3) of the Forest Conservation Law identifies certain individual trees as a high priority for retention and protection ("Protected Trees"). Any impact to these Protected Trees, including removal or any disturbance within a Protected Tree's critical root zone ("CRZ"), requires a variance under Section 22A-12(b)(3) ("Variance"). Otherwise, such resources must be left in an undisturbed condition.

This Application will require the removal of one Protected Tree and CRZ impact to six Protected Trees as identified in the Staff Report.

The access route to the solar project site was selected to minimize impacts to natural resources to the greatest extent possible while remaining compatible with the property owner's existing agricultural use, an equestrian riding and boarding facility. The Applicant's proposed location of the access road is the most viable route through the property owner's farm to the solar project site. A route around the west side of the barn to avoid the variance trees would create an unwarranted hardship on the current agricultural operations.

The need for a Variance in this case is based upon existing site conditions and compliance with necessary design and infrastructure elements that are required of any solar collection system conditional use permit application, such that if disturbance or removal of Protected Trees pursuant to Chapter 22A is not allowed in this case, the Applicant would suffer unwarranted hardship.

In accordance with Section 22A-21(a), the Applicant requested a Variance, and the Board agrees that the Applicant would suffer unwarranted hardship by being denied reasonable and significant use of the Subject Property without the Variance.

The Board makes the following findings necessary to grant the Variance:

1. *Granting the Variance will not confer on the Applicant a special privilege that would be denied to other applicants.*

Granting the variance will not confer a special privilege on the Applicant as the removal of and impacts to the trees is due to the location of the trees and necessary site design requirements unique to a Solar Collection Facility. Therefore, granting of this variance is not a special privilege that would be denied to other applicants.

2. *The need for the Variance is not based on conditions or circumstances which are the result of the actions by the Applicant.*

The requested variance is not based on conditions or circumstances which are the result of actions by the Applicant. The requested variance is based upon the existing site conditions and necessary design requirements of this specific use.

3. *The need for the Variance is not based on a condition related to land or building use, either permitted or non-conforming, on a neighboring property.*

The requested variance is a result of the existing conditions and not as a result of land or building use on a neighboring property.

4. *Granting the Variance will not violate State water quality standards or cause measurable degradation in water quality.*

The variance will not violate State water quality standards or cause measurable degradation in water quality. The FCP proposes to provide mitigation for the removal of the Protected Tree in the form of tree planting on the Property. These trees will replace any water quality functions that may be lost by the removed tree.

Mitigation for the Variance is at a rate that approximates the form and function of the Protected Trees removed. The Board approves the replacement of the Protected Tree at a ratio of approximately 1-inch caliper for every four inches removed using trees that are a minimum of three caliper inches in size. This results in a total mitigation of 11.25 inches with the installation of four 3-inch caliper trees. No mitigation is required for Protected Trees impacted but retained.

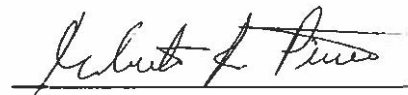

BE IT FURTHER RESOLVED that this Resolution constitutes the written opinion of the Planning Board in this matter, and the date of this Resolution is APR 25 2023 (which is the date that this Resolution is mailed to all parties of record); and

BE IT FURTHER RESOLVED that any party authorized by law to take an administrative appeal must initiate such an appeal within thirty days of the date of this Resolution, consistent with the procedural rules for the judicial review of administrative agency decisions in Circuit Court (Rule 7-203, Maryland Rules).

* * * * *

CERTIFICATION

This is to certify that the foregoing is a true and correct copy of a resolution adopted by the Montgomery County Planning Board of The Maryland-National Capital Park and Planning Commission on motion of Commissioner Hedrick, seconded by Commissioner Pedoeem, with a vote of 4-0; Vice Chair Piñero, and Commissioners Bartley, Hedrick, and Pedoeem, voting in favor of the motion, Chair Zyontz necessarily absent, at its regular meeting held on Thursday, April 13, 2023, in Wheaton, Maryland and via video conference.
