SUMMARY

- Planning staff will provide a presentation of the proposed draft Scope of Work for the Master Plan of Highways and Transitways – Technical Update.
- Planning Board comments/changes on this draft Scope of Work are requested.

RECOMMENDATION

Approve the draft Scope of Work for the Master Plan of Highways and Transitways – Technical Update.

INTRODUCTION

A technical update to the Master Plan of Highways and Transitways (MPOHT) is necessitated by the County Council’s approval of two bills in 2022 (Bill [24-22](#) and [34-22](#)) that revised the street types identified in Chapter 49 of the County Code, also known as the “Road Code,” to conform to the county’s Complete Streets Design Guide. While the updated county code provides an interim translation from the previous “functional” classification system to the new “complete streets” classification system, adjustments to these default translations are needed for various road segments in the county.

The draft scope of work for the Master Plan of Highways and Transitways – Technical Update is included as Attachment A to this staff report.

This master plan technical update is included in Montgomery Planning’s FY24 work program. This effort is being led by the Countywide Planning and Policy Division. It commenced in July 2023 and is scheduled to be completed in November 2024. Planning staff will provide a presentation of the draft Scope of Work and request any comments/changes and approval from the Planning Board.
